

Safety Precautions

- Important Notes on exporting this product or equipment containing this product;
If the end-user or application of this product is related to military affairs or weapons, its export may be controlled by "Foreign Exchange and Foreign Trade Control Law" of Japan where export license will be required before product can be exported from Japan.
- This product is designed and manufactured for use in General Purpose Industrial Equipment and it is not intended to be used in equipment or system that may cause personal injury or death.
- All servicing such as installation, wiring, operation, maintenance and etc., should be performed by qualified personnel only.
- Tighten mounting screws with an adequate torque by taking into consideration strength of the screws and the characteristics of material to which the product will be mounted. Over tightening can damage the screw and/or material; under tightening can result in loosening.
- Install safety equipment to prevent serious accidents or loss that is expected in case of failure of this product.
- Consult us before using this product under such special conditions and environments as nuclear energy control, aerospace, transportation, medical equipment, various safety equipments or equipments which require a lesser air contamination.
- We have been making the best effort to ensure the highest quality of our products, however, some applications with exceptionally large external noise disturbance and static electricity, or failure in input power, wiring and components may result in unexpected action. It is highly recommended that you make a fail-safe design and secure the safety in the operative range.
- If the motor shaft is not electrically grounded, it may cause an electrolytic corrosion to the bearing, depending on the condition of the machine and its mounting environment, and may result in the bearing noise. Checking and verification by customer is required.
- Failure of this product depending on its content may generate smoke of about one cigarette. Take this into consideration when the application of the machine is clean room related.
- Please be careful when using the product in an environment with high concentrations of sulfur or sulfuric gases, as sulfuration can lead to disconnection from the chip resistor or a poor contact connection.
- Do not input a supply voltage which significantly exceeds the rated range to the power supply of this product. Failure to heed this caution may lead to damage of the internal parts, causing smoke and/or fire and other troubles.
- The user is responsible for matching between machine and components in terms of configuration, dimensions, life expectancy, characteristics, when installing the machine or changing specification of the machine. The user is also responsible for complying with applicable laws and regulations.
- Manufacturer's warranty will be invalid if the product has been used outside its stated specifications.
- Component parts are subject to minor change to improve performance.
- Read and observe the instruction manual to ensure correct use of the product.

Repair

Consult to the dealer from whom you have purchased this product for details of repair work.
When the product is incorporated to the machine you have purchased, consult to the machine manufacturer or its dealer.

Motion Controller GM1

Manufacturer/ Distributor: **Panasonic Industry Co., Ltd.**

Equipped with main functions necessary for general-purpose machine

Positioning **Torque control** **Speed control** Improves high-speed and high-accuracy

Motion control

- RTEX type Real axes: 16
- EtherCAT type Real axes: 32

Ethernet: 2 ports

- EtherNet/IP* (1 port)
- Modbus-TCP
- General-purpose communication

RS-232C

- Modbus-RTU
- General-purpose

High-speed counter input: 2 channels

- 4-multiple, 16 MHz

PWM output: 4 channels

- Up to 100 kHz

SD memory card

Selectable network

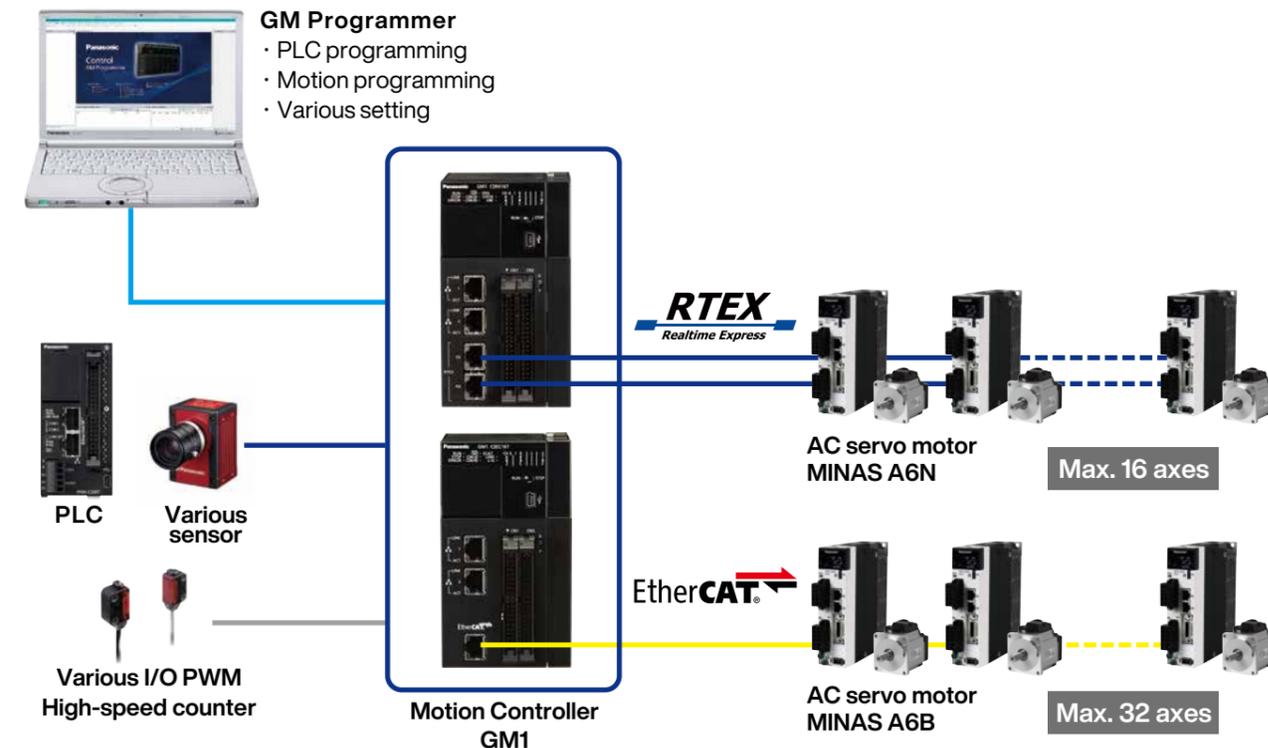

General-purpose I/O: 16 points each

- Input: 16 points/output: 16 points NPN/PNP transistor
- Expansion unit (64 points) × Up to 15 units

* EtherNet/IP is a trademark of ODVA, Inc.

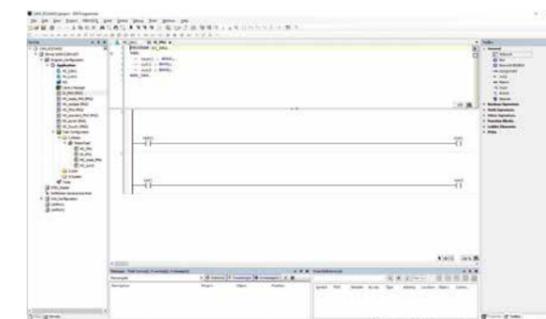

System configuration

* Realtime Express and RTEX are registered trademarks of Panasonic Corporation. Realtime Express is a high-speed and synchronous motion network exclusively developed by our company.
* The EtherCAT is a registered trademark of patented technology licensed from Beckhoff Automation GmbH in Germany.

Configuration software

Complies with IEC 61131-3 standard

6 programming languages

- LD (Ladder Diagram)
- FBD (Function Block Diagram)
- ST (Structured Text)
- SFC (Sequential Function Chart)
- CFC (Continuous Function Chart)
- IL (Instruction List)*

* Selectable by changing software settings.

Product name	Number of axes	Network	Number of I/O	High-speed counter	Rated voltage	Output specifications	Part No.
GM1 controller	16 axes	RTEX	Input:16 points Output:16 points	2 ch	24 V DC	Transistor output sink(NPN)	AGM1CSR16T
	32 axes	EtherCAT				Transistor output sink(NPN)	AGM1CSEC16T
						Transistor output source(PNP)	AGM1CSEC16P*

* Excluded from KC marking.

Ultra High-Speed Network Servo

MINAS A6N series

Manufacturer/ Distributor: Panasonic Industry Co., Ltd.

RTEX
Realtime Express

Realtime Express (RTEX)

Ultimate Real-time performance

- Com. period min. **0.0625 ms** Max 16000 times/s
- Com. speed **100 Mbps** Full-duplex
- Velocity response **3200 Hz**

Functionality to meet various needs

- Precise position latch & comparing
- Infinitely rotatable absolute encoder
- IEC safety I/F model available ^{*1}

Simple network

- High-performance & Low-cost
- Isochronous established by ASIC
- Easy device development

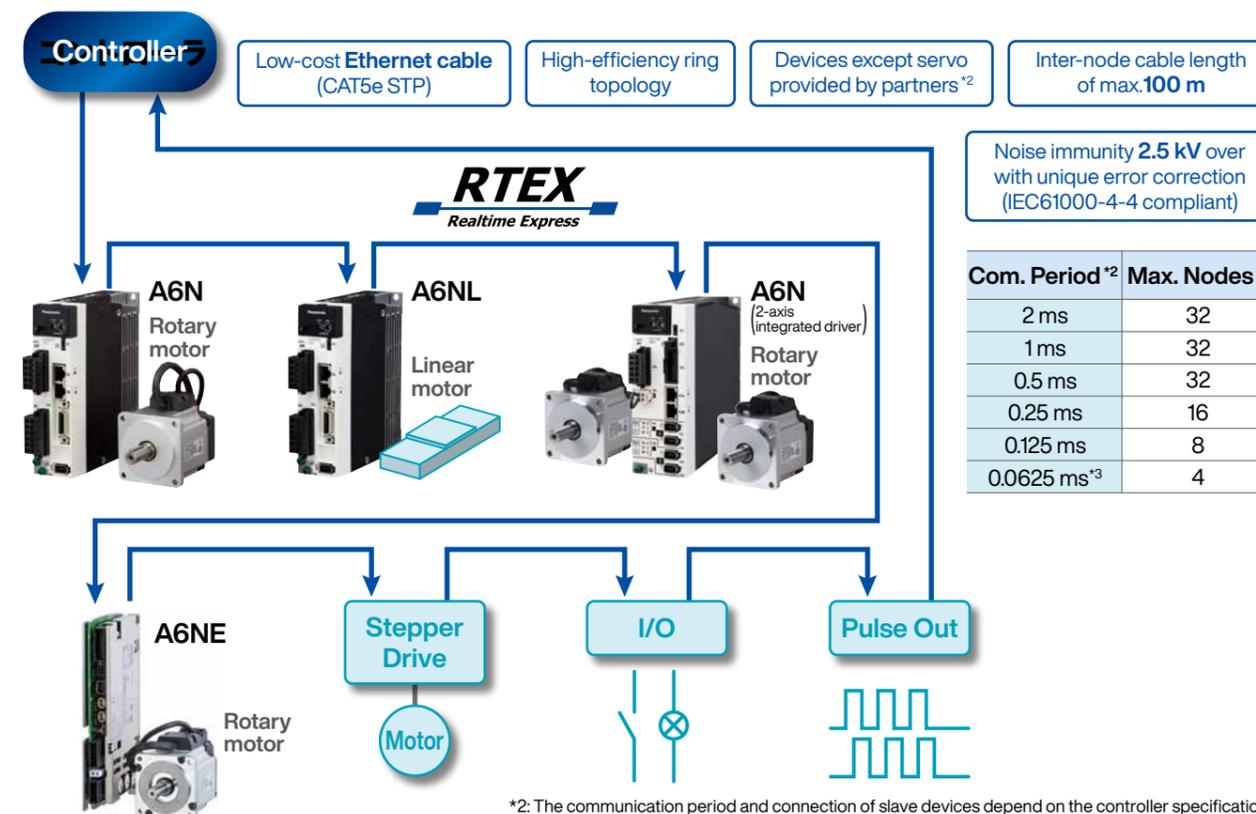

Drive list

Drive power supply		Motor rated output													
		50 W	100 W	200 W	400 W	750 W	1kW	1.5 kW	2 kW	3 kW	4 kW to 5 kW	7.5 kW	11 kW to 15 kW	22 kW

Integrated driver 2-axis	1 or 3-phase 200 V to 240 V AC	Model No.	MPDLT15N Δ												
				MPDLT 25N Δ											
Integrated driver 2-axis	3-phase 200 V to 240 V AC	Model No.													

- The above table shows a drive model number (Type E) in typical combination. (400 V specification, G frame and H frame are only multi-function type.)
- Since some motors are not suitable for the model number listed above, confirm the valid combination by the A6 family catalog.
- Δ part 2-axis integrated driver S: Serial scale type A: AB phase scale type Refer to the specifications for details.
- For the 2-axis integrated driver, the rated motor output applicable to each axis is shown. Refer to catalogs and specifications for details on combinations.

*1: Multi-functional type F. IEC61800-5-2 STO, IEC61508 SIL3.

Typical system configuration

Noise immunity 2.5 kV over with unique error correction (IEC61000-4-4 compliant)

Com. Period ^{*2}	Max. Nodes ^{*4}
2 ms	32
1 ms	32
0.5 ms	32
0.25 ms	16
0.125 ms	8
0.0625 ms ^{*3}	4

*2: The communication period and connection of slave devices depend on the controller specification.
*3: For communication period 0.0625 ms, command update period is 0.125 ms only. *4: Slave nodes.

Model nomenclature

M A D L N 1 5 N E

Servo drive A6 family

Specific model

	Type*	Safety STO	Full-closed control	External scale
Single axis driver	E: Standard	x	x	x
2-axis integrated driver	F: Multi-functional	○	○	Serial/AB phase
	S: Supports serial scale	○	○	Serial
	A: Supports AB phase scale	○	○	AB phase

Frame size symbol
A to H: A Frame to H Frame (Single axis driver)
P: P Frame (2-axis integrated driver)
Q: Q Frame (2-axis integrated driver)

Safety I/F*
N: Without safety
T: With safety STO

Specifying max. current

Interface
N: RTEX

Power input
1: 1-phase 100 to 120 VAC
3: 3-phase 200 to 240 VAC
4: 3-phase 400 V
5: 1 or 3-phase 200 to 240 VAC

* The combination has the following limitation. The standard type E is without safety I/F, and the multi-functional type F is with safety I/F.

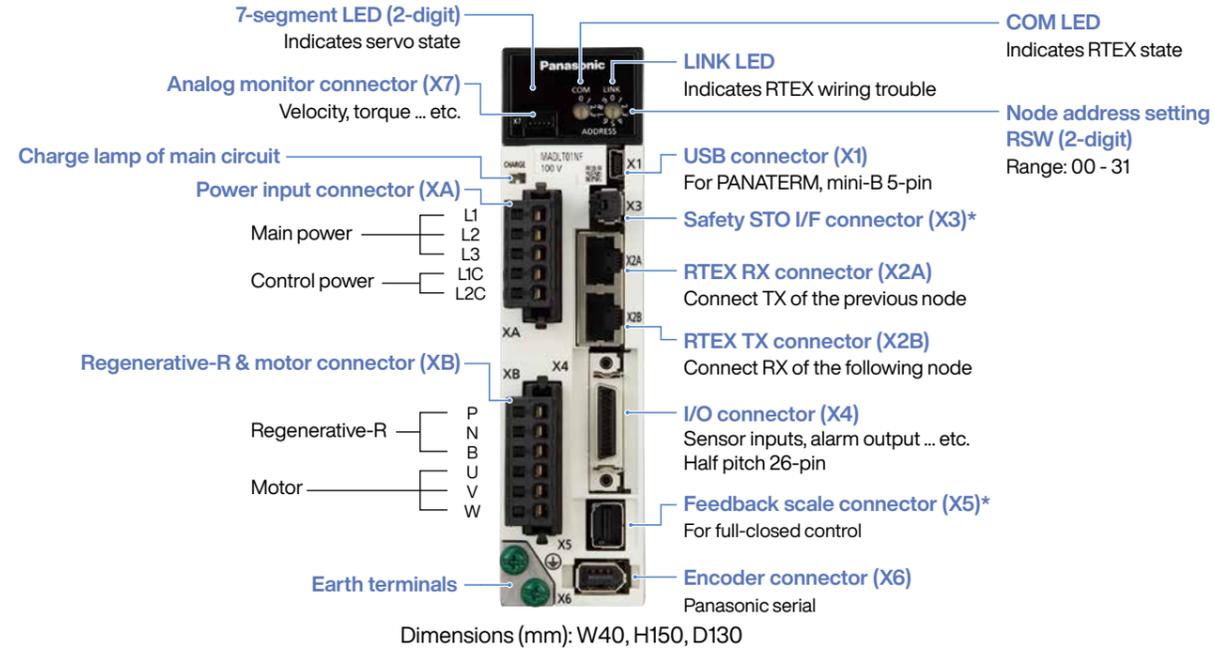

Compliance

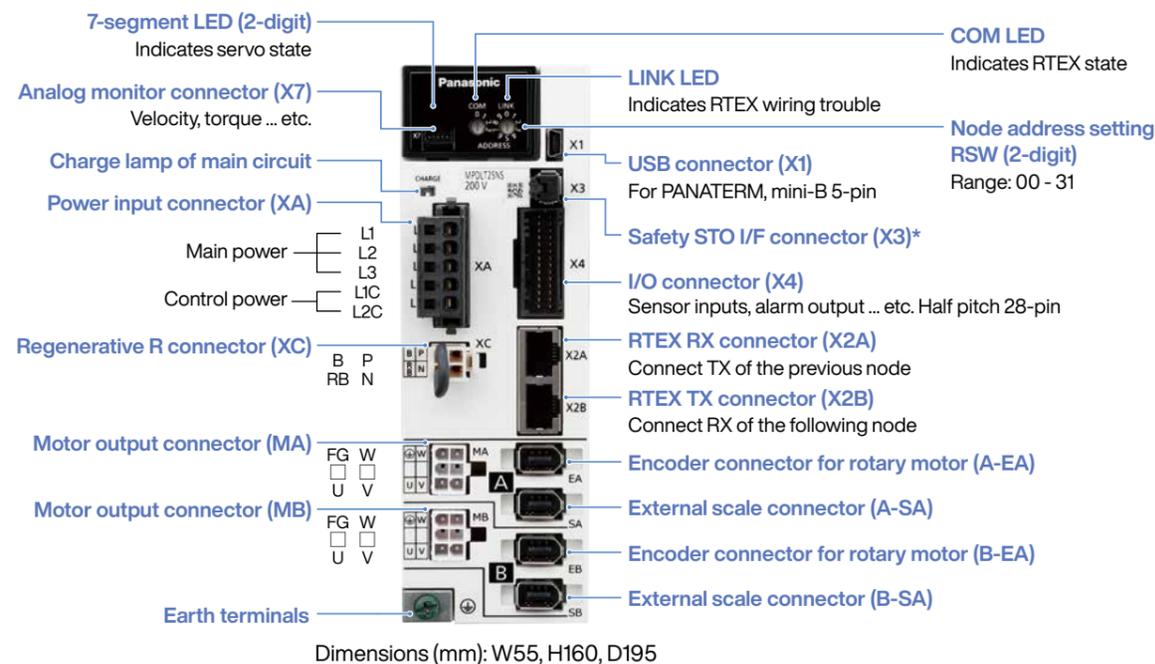

Drive appearance

A6N size A

* This photo shows multi-functional type F. Standard type E does not have X3 and X5 connectors.

A6N size P (2-axis integrated driver)

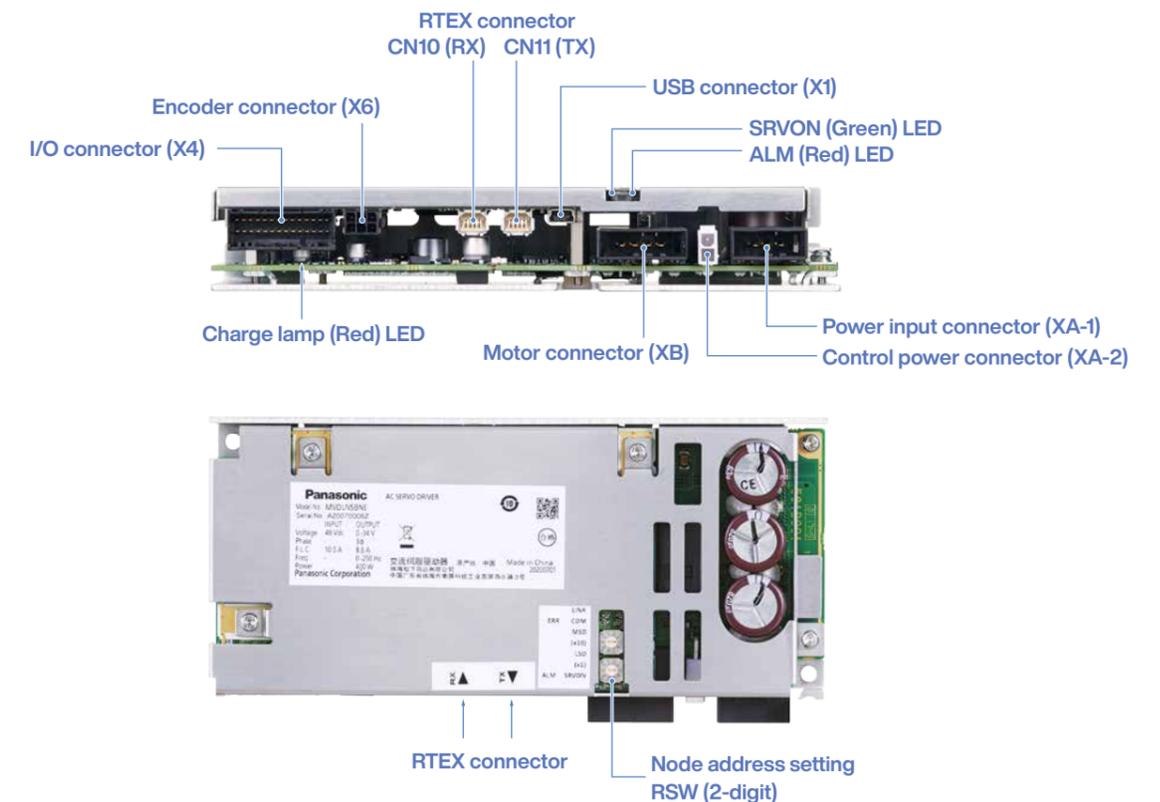

Low voltage small servo

List of drivers

Driver power		Rated output of motor		
		100 W	200 W	400 W
DC 24 V	Frame symbol	V		
	Driver model number	MVDLN5CNE		
DC 48 V	Frame symbol	V		
	Driver model number	MVDLN5BNE		

• Depending on the motor series, there may be a combination different from the model number in the table, so be sure to check the specifications.

RTEX Network Motion Controller

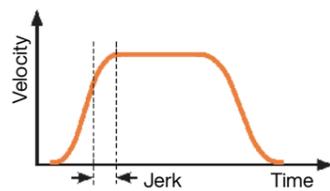

PMC-KM2500P

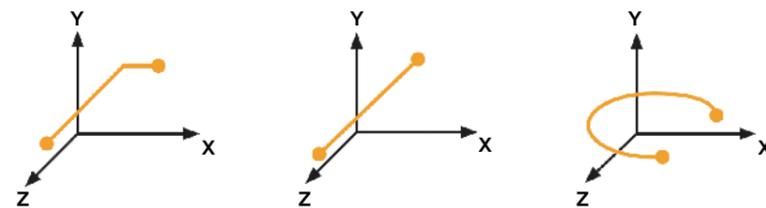

Features

- RTEX (Realtime Express) Network
- PCI Interface
- Max. 16 Axes
- Max. 32 Nodes
- Multi-Axes Motion
- Linear / Circular Interpolation
- Synchronous Control, Gantry Control
- 1D / 2D Position Error Compensation
- Motion API
- Controller Setup Software
- High Speed, High Precision and High Performance
- Very Simple and Easy to Develop Applications

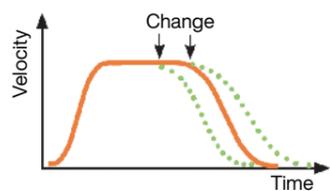

Velocity Profile

RTEX Master Board

PCIe-Rxx04-RTEX, PCI-R1604

Features

- RTEX network Master Board
- Network Speed 100 Mbps, Communication Period 0.5 ms
- Support RTEX Standard Servo Profile, Standard I/O Profile
- PCIe-Rxx04-RTEX Basic configuration is 8 axes control (Can be expanded to 16, 24 and 32axes)
- PCI-R1604 Basic configuration is 16 axes control (Can be expanded to 20, 24, 28 and 32axes)
- Easy to wire, saving wiring working-hour
- Max. 32 nodes
- Network connection - 100 BASE-TX, STP Cable (above CAT5e)
- Excellent Error correction
- Multi-axes linear / circular interpolation
- Limit setting functions : soft stop, emergency stop, and two positions

Application Sample

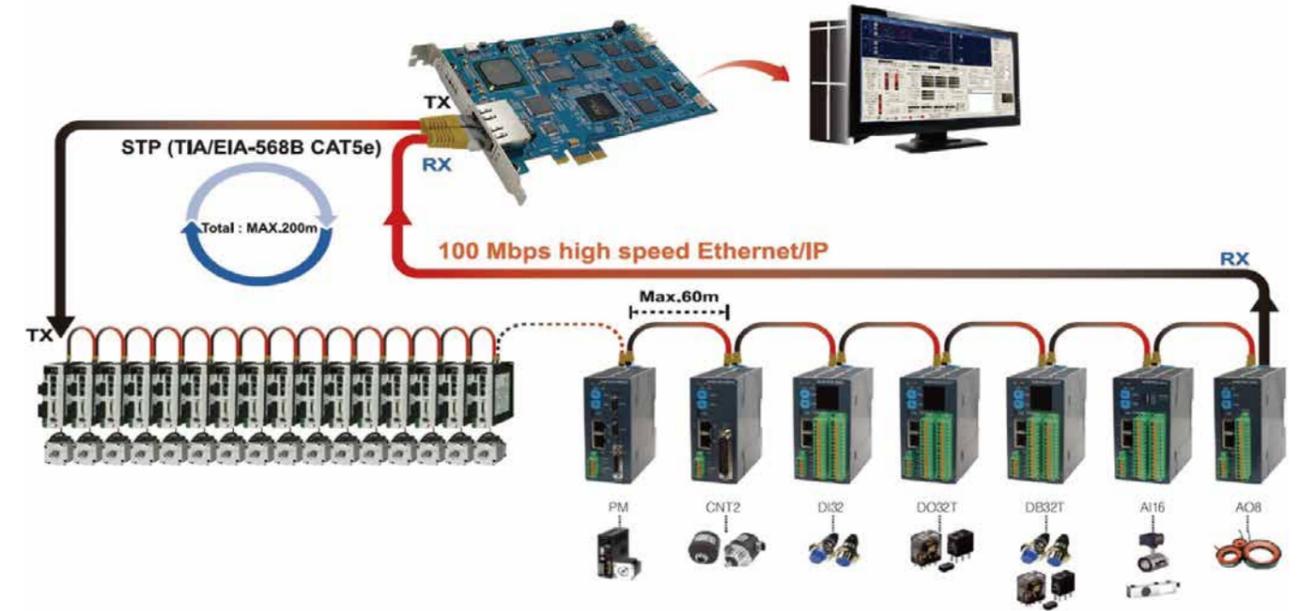

- Semiconductor front/back end process field
- Solar Energy/FPD/PCB field
- Processing machine field

PLC Direct Access RTEX Motion Controller

PI-2300

Building a leading edge high speed motion network at low cost under PLC

- (1) Accessing PLC data register from PI-2300 over Ethernet
- (2) Based on the contents of data register, the PI sends command to each axis (motor operation).
- (3) The PI writes status information of each axis to data register.
Sales area Language

Features

1 Direct PLC access

- The controller runs the motion program installed in PI while accessing PLC data register.
- Preparation of ladder program for communication is not required on PLC.
 - No CPU burden on PLC.

2 Simple motion control through data register

- Motor can be controlled by operating PLC data register.
- Multiaxial motor can be controlled/monitored by simply operating numeric values on the data register.
 - PLC operator having no knowledge on communication of motion (RTEX) can control the motor.

3 Stepping motor can be mixed

- The motion network can contain servo motor and stepping motor.
- Ultra high-speed fully-synchronized motion system can be built.

4 We also have simple controllers other than standard products.

Please contact us as individual special support is also available.

2-phase Microstep Drive

D4610 (1 Axis type) / D4620 (2 Axis type)

Leading Edge High Speed Motion Network (RTEX) At Low Cost

Features

1 High performance CPU enhances drive capability

- Step-out detection
- Motor over current protection
- Brake control (only D4610)
- Triangle drive prevention
- Vibration suppression
- Closed loop control by encoder signal (only D4610)

2 Network can connect up to 32 axes (depending on master specification)

3 Simultaneous multiaxial control within 0.16 ms, 0.5 msec, 1 msec communication period

Multifunctional motion controller

PXRP-3216CN / CSRC-32CN-RP

A controller that combines the high speed of hardware with the flexibility of software

Features

1 Enhanced motion function and enhanced software processing speed

With conventional products, the processing related to control is controlled in a manner that depends on the PC side, so a waiting time is required between the PC and the controller. However, this product, which performs arithmetic processing with a motion engine, processes even complicated controls and functions at high speed.

2 Common software and selectable control method

PXRP-3216CN and CSRC-32CN-RP operate in the same software development environment. Since it can be operated with PCI-Express and USB (notebook PC, etc.), you can select the product that suits your device environment.

3 Camshaft control function

You can select from 6 types of cam curves "equal acceleration / single string / cycloid / deformed trapezoid / deformed sine / deformed constant velocity". While the electronic cam is being executed, cam data / arrival position change / correction, operation pause, and restart can be executed.

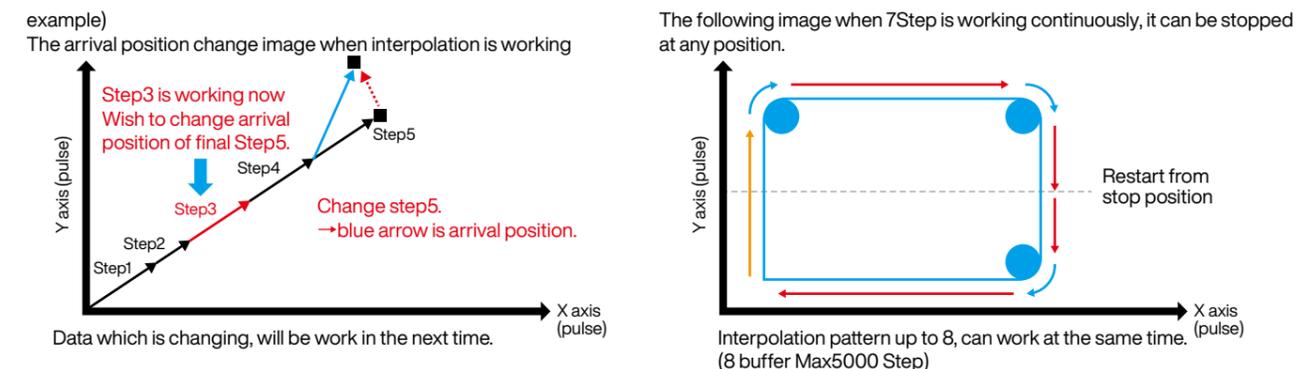

4 Compatible with a wide variety of devices

In addition to RTEX-compatible servos, it supports equipment required for device operation, such as in-house input boards, output boards, stepping drivers, analog conversion boards, digital conversion boards, and high-speed digital I / O boards.

Main functions

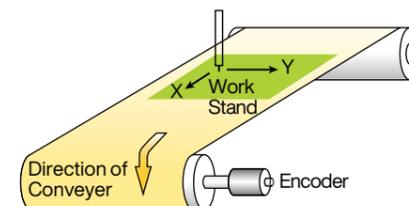

Interpolation Control function

Interpolation data up to 5000 steps can be recorded. During working, changing Interpolation data, changing/revising object position, pausing interpolation actions is possible at any time. In addition, from pausing to restarting, exchanging interpolation axis etc, is possible.

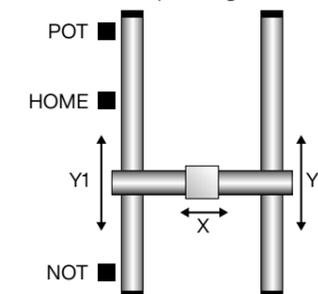

Axle linkage function / Gantry Axis Control / Soft landing function

Axle linkage function is on one axis we can addition and subtraction command position (output pulse) or actual position (input pulse) of another axis.

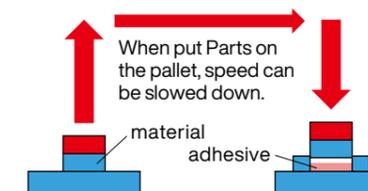

Connect Work Stand (XYZ axis) to the encoder of conveyor, we do not need to stop conveyor to control Work Stand.

Gantry Axis Control is carried as a base function. Using axle linkage function, connect axis Y2 to axis Y1, then send command to axis Y1 only, axis Y2 is also operating.

When to stop the bonding equipment etc., according to the overshoot, shock will happen. Parts may be damaged. Soft landing function can control the overshoot, protects machine, material, or worker.

Others

- A total of 36 axes of RTEX 32 axes / pulse train 4 axes can be controlled. (Pulse train is PXRP-3216CN only)
- Speed, acceleration, and deceleration can be set between 1PPS and 400 MPPS in 1 msec increments.
- You can set the output signal that can be used to turn ON / OFF the strobe, camera, sensor device, etc. in the motor position information.
- The general-purpose input can be used as a trigger signal for preset operation start and synchronization control.
- By measuring and storing the pitch error of the power transmission mechanism in advance, it is possible to add the pitch error to the position command and correct the movement amount.

Motion Controller (Stand-alone & Remote Control type)

SNET-RTEX Serie

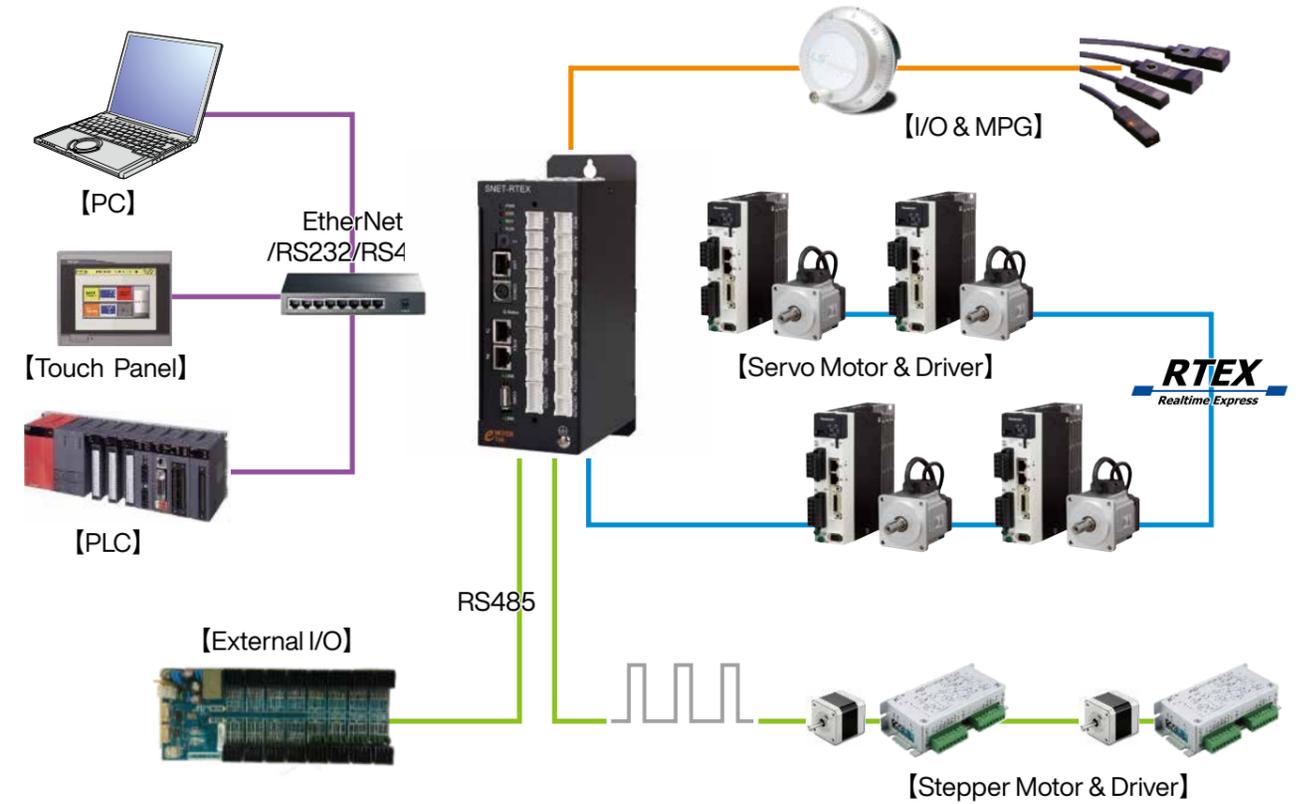

Features

- Both Stand-alone & Remote Control
- Adopt standard G code and used Motion Instruction
- Position, Speed change and intervariable calculation using L variable, Macro Function
- PTP/CP/Helical
- Supports communication protocol with PLC, Touch Panel (Melsec etc.)
- 16 Axes - 6 Channel - Multi Tasking
- 2 Port - Supplied external Encoder Input
- Analog In/Out (Option)
- Gantry and Synchronous operation, S-curve, etc
- Remote I/O expansion using RS-485

Network Stepper Drive

EM3RT Series

Features

- Support RTEX network protocol
- Perfectly combine with RTEX servo
- Matched motor from NEMA 8 to NEMA 34
- Excellent performance & High reliability
- Easy development & Low cost
- 7 input signals, include 2 differential connections (200 KHz, 3.3 V - 5 V input voltage) and 5 single - ended connections (20 KHz, 12 V or 24 V input voltage)
- 2 output signals, optically isolated, maximum 24 mA/100 mA
- 1 brake output signal, maximum 24 mA/100 mA

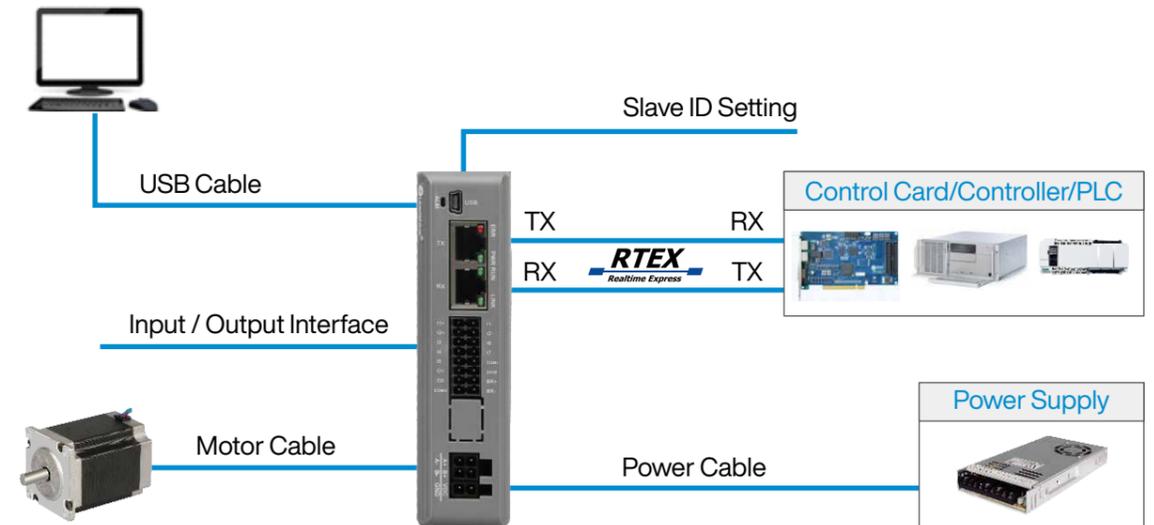

Overview

EM3RT series drives are based on Panasonic RTEX network which supports CP operating mode (built in HM mode) and connect up to 32 axes. The products can be combined with RTEX servo drives perfectly and matched with various stepper motors from NEMA 8 to NEMA 34. The EM3RT series has excellent performance including enhanced reliability, super-low stepper noise, anti-resonance and low-speed ripple smoothing and remains low cost.

64-Axis Multi-Function Soft Motion Controller

WMX3 with Realtime Express

<Advantages of hybrid controls>

If you feel...

- ✓ Not enough I/O points left for operations.
- ✓ A large number of nodes sacrifices the communication cycle.
- ✓ I/O modules are too costly.
- ✓ Want to choose the right I/O module from a lot of options.

Hybrid Network can provide solutions

- ➔ High-performance RTEX servo network for axis control requiring high synchronization
- ➔ High cost performance EtherCAT modules for I/O control and stepper motors.
- ➔ Soft motion enables high-speed real time control over the servo network and I/O network.

Solution!

Features

1 RTEX and EtherCAT. Soft Motion technology gets the best of both worlds.

- Proven high-performance motion controller WMX3 (patented) now supports "hybrid" networks that simultaneously communicate with the high-speed networks RTEX and EtherCAT. Up to 64 axis synchronous control is possible.
- Applying RTEX to the servo network and EtherCAT to the sub-network enables using cost effective EtherCAT I/O modules.
- Advanced functions such as gantry control and various acceleration/deceleration profiles can be easily realized.

2 Integrated into one PC. Slimming. Networking.

- WMX3 enables the integration of operation screens, image processing, and motion control applications of up to 64-axis for a slimmer control device.
- Reduced wiring man-hours and material costs by reducing wiring through networking. Contributes to noise immunity.
- Use a commercially available Windows PC: Users can freely choose between PCs for small embedded applications as well as high-spec industrial applications depending on the user's application and concept.

Specification (Motion)

Positioning	64-axis * Simultaneous override (Dynamic destination can be changed)
Acceleration / Deceleration Profiles	Speed curve: Trapezoid, S-Curve, Jerk, Two-Step Speed, Acceleration time specification trapezoid, Acceleration curve: S-Curve, Quadratic Curve, Sine Curve
Interpolation Types	Linear, Arc, 3D Arc, Helical, PVT
Continuous Trajectory	Combination of straight line and Arc, Spline interpolation, Automatic prefetch speed control, Linear / Circular continuous trajectory with rotating stage
Gantry Control	Complete synchronous gantry control
Event	Register triggers (reach axis target value, I / O input, etc.) and actions (start axis movement, I / O output, etc.) and execute real-time operations
API Buffer	Register the motion API in the buffer and perform real-time operation. Execution waits and branches can be made depending on conditions.
Position synchronization output (PSO)	Real-time output of I / O at the specified position (position comparison performance depends on the communication cycle). When more precise operation is required, position comparison at 1 pulse level is possible with a dedicated hardware option.
Synchronization Control	Simple synchronization, synchronous gear ratio / offset specification, synchronization deviation correction, dynamic synchronization axis setting / change / cancel. Multiple axes (up to 32 sets for EtherCAT and up to 32 sets for RTEX) can be defined for single-axis to multi-axis synchronization.
Electronic Cam	8 cam curves can be defined. Cam curve for each communication cycle. Phase manipulation. clutch.
Return to Origin	Index pulse, origin sensor, limit sensor, limit proximity sensor, external input signal, mechanical end, etc. It is possible to return to the origin of the gantry axis.
I/O	11600 inputs / 11600 outputs, Supports most commercial EtherCAT I/O modules
Compensation Function	Pitch error, Backlash, Straightness correction
API Supported Language	C Language (C/C++), .NET Languages (C#,VB), .NET Framework: 4.0 or later
Development Environment	Microsoft Visual Studio 2012, 2013, 2015, 2017, LabVIEW, Python 3.6
Recommended Operating Environment	OS: Windows 7(32-bit/64-bit), Windows 10 (64-bit), IoT Enterprise LTSC CPU: Min. ATOM 2 GHz (E3845, etc.) 2 cores or more, Memory: 4 GB or more

ETHERNET to RTEX Motion Controller

NMC-XR Series

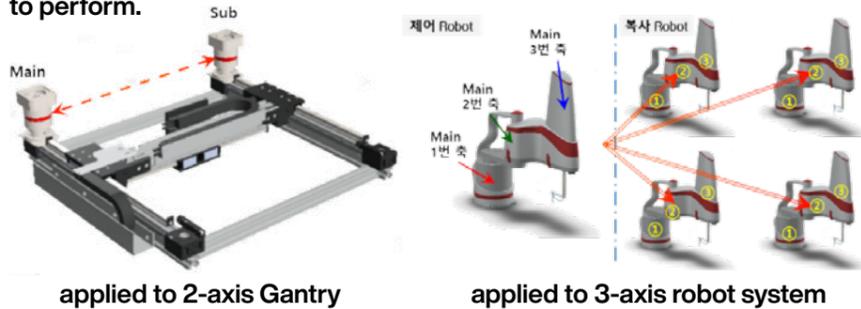

NMC-XR

"EtherPara" software

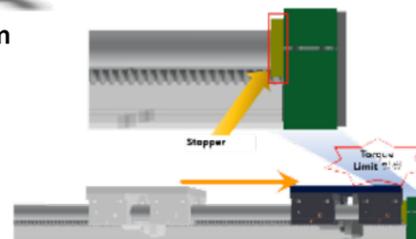

Features

- 32 axes control is possible with one NMC-XR motion controller.
- It is possible to connect up to 255 NMC-XRs with one low-specification PC.
- Provide SDK in various languages
 - Dynamic Linking Library (x32, x64), C, C++, Visual C
 - Labview DLL
- Provide various motion function
 - Multi axis, circular arc, helical, continuous interpolation, list motion, torque value monitoring, etc.
- All 32 SERVO parameters connected to the NMC-XR
Editing is possible at once, You can check motor status information in real time
- Provide a protocol for ModBus.
- Provide Mirror function
 - Mirror function copies the motion motion of the main axis like a mirror, It is a special function developed to perform.

applied to 2-axis Gantry

applied to 3-axis robot system

- Real-time Torque Monitoring and Torque Limit
 - You can set the limit range of the instrument as well as perform the origin with the stopper of the instrument.

Product Line-up

NMC-XR040
32 axes
(CP 4 axis + PP 28 axis)
digital 8 input + 8 output

NMC-XR080
32 axes
(CP 8 axis + PP 24 axis)
digital 8 input + 8 output

NMC-XR120
32 axes
(CP 12 axis + PP 20 axis)
digital 8 input + 8 output

NMC-XR160
32 axes
(CP 16 axis + PP 16 axis)
digital 8 input + 8 output

NMC-XRDI32
digital 32 input

NMC-XRDO32
digital 32 output

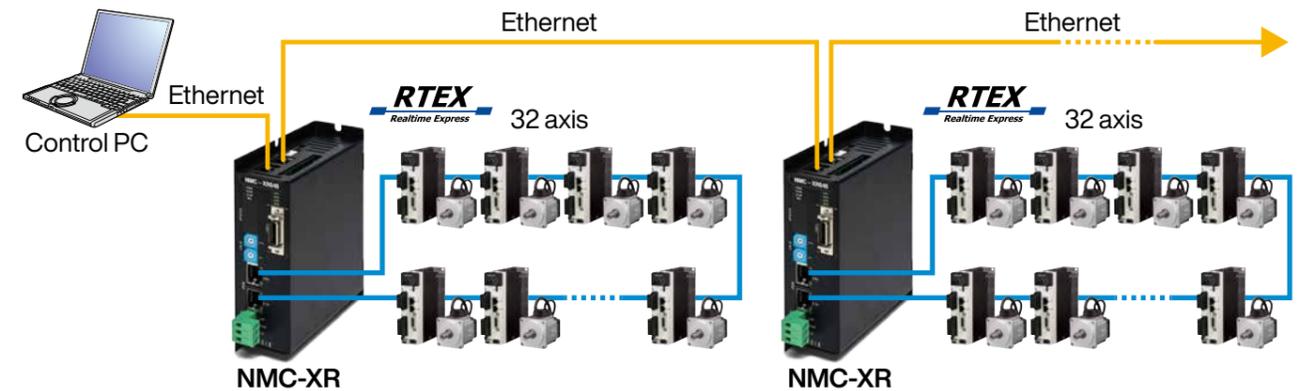

Products that can be used
with the NMC-XR
ETHERNET to PULSE

NMC2E

- NMC2E-220 : 2 axis
- NMC2E-420 : 4 axis
- NMC2E-620 : 6 axis
- NMC2E-820 : 8 axis

Multi PLC Direct Connection 40-axis Motion Controller

“InterMotion” Series JOY-AMXR-P8 Including PLC (Using a C-like Language)

Features

- Directly connectable to Mitsubishi PLC (CPU with Ethernet: e.g. Q03UDECPU). Reference to the CPU D register in accordance with MC Protocol.
- Directly connectable to Keyence PLC KV-5000. Reference to the CPU D register in accordance with MC Protocol.
- Directly connectable to OMRON PLC (CPU with Ethernet: e.g. CJ1M-CPU11-ETN). Reference to CPU the Data Memory in accordance with FINS commands.
- Can be directly connected to Panasonic PLC (FP7, GM1). See data memory in MC protocol.
- Real-time logging such as 1 ms sampling position field data is possible on a Windows PC.
- Control with the .NET Framework interface on a Windows PC with Ethernet is possible.
- Position command generation and DIN/DOU scan controls with the cycle time of 1ms.
- Series model: RTEX64 axis "JOY-AMXG64". RTEX32 axis "JOY-AMXG32".
RTEX 16 axis "JOY-AMX G16".
RTEX 32-axis + pulse train 8-axis control "JOY-AMXG40P8". *
RTEX 16-axis + pulse train 8-axis control "JOY-AMXG24P8". *

* Scheduled to acquire the KC mark

Specification

Item	Description
No. of control axes	40 axes. 32-axis RTEX interface. 8-axis 10 Mpps pulse train position command.
Controlling method	Independent PTP control for each axis. Max. 8-axis synchronized PTP control. Linear interpolation, 2-axis arc interpolation, 3-axis spiral interpolation. 32-bit length.
Internal control program development	Control program can be developed using the C-like multiprocessing machine control language "MOS language." Motion control, IO control, communication control, and sequence control are possible. "MOS Bench AM" is required as a development environment.
Accessory IO	±CW/±CCW pulse output, ±A/±B/±Z input. Servo on, reset output. ±OT, alarm input. (The above-mentioned items are for 8 axes.) General-purpose IN 8 points. General-purpose OUT 8 points. Non-insulated RS232C-1ch. Insulated RS485-1ch.
Optional functions	Camera trigger function using ±A/±B input counter and general-purpose OUT.
Optional devices	Non-insulated RS232C-1ch. Insulated RS485-1ch. 192IN, 192OUT are available by adding 6 general-purpose 32/32 IO boards. Non-insulated RS232C-6ch is available using a RS232C extender board.

PCIExpress-40-axis Motion Control Board, PCI-40-axis Motion Control Board

“RT40PRE”, “RT40PR” Including PLC (Using a C-like Language)

Features

- Max. 40 axes: 32-axis RTEX Interface and 10Mpps pulse train position command for 8 axes.
- Synchronization of axes controlled by RTEX and those controlled by pulse train output is possible.
- Windows Real-time software PLC using the C-like multiprocessing machine control language “MOS language.”
- Windows10 IoT Enterprise LTSB High End is supported.
- DIN, DOUT, AD, DA, RS232, and RS485 can be controlled in real time as well as motion control boards.

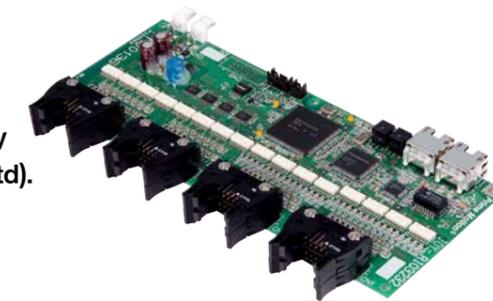

General Purpose 32/32 Input/Output Board

InterMotion Series JOY-RIO3232

Features

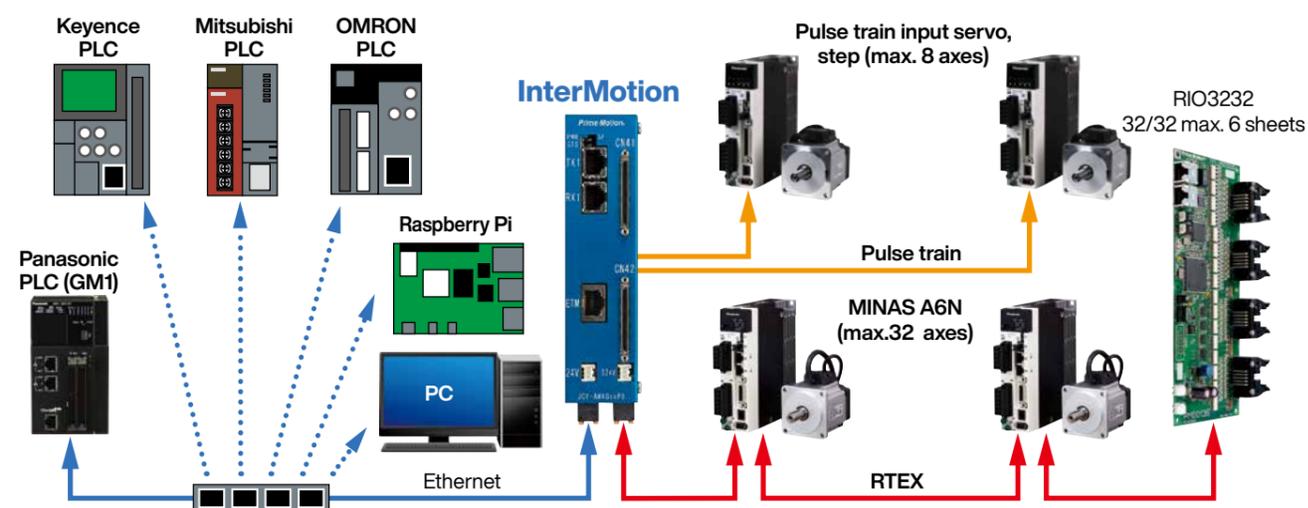

- Single board with 32 IN points and 32 OUT points
- 10 PIN connector for 8-point IN and 8-point OUT. Can be directly connected to terminal block PRS-DG10-08 (TOYOGIKEN Co., Ltd).
- 24 V DC supply

Specification

Item	Description
Input	32 points (8 points × 4 ports), 24 VDC, 4.7 kΩ
Output	32 points (8 points × 4 ports), 24 VDC, 100 mA
Max. No. of connectable boards	6 (IN 192 points, OUT 192 points)

SYNTEC Ethernet-base Controller

SYNTEC -E Controller

Keyboard

Control Panel for Mill

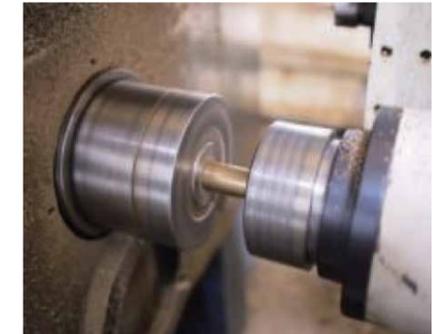

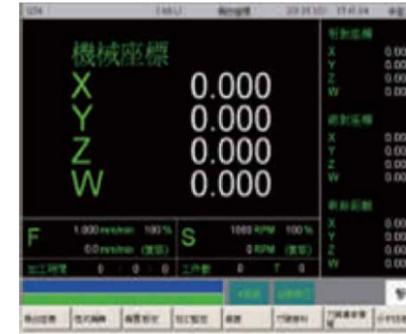

Control Panel for Lathe

Features

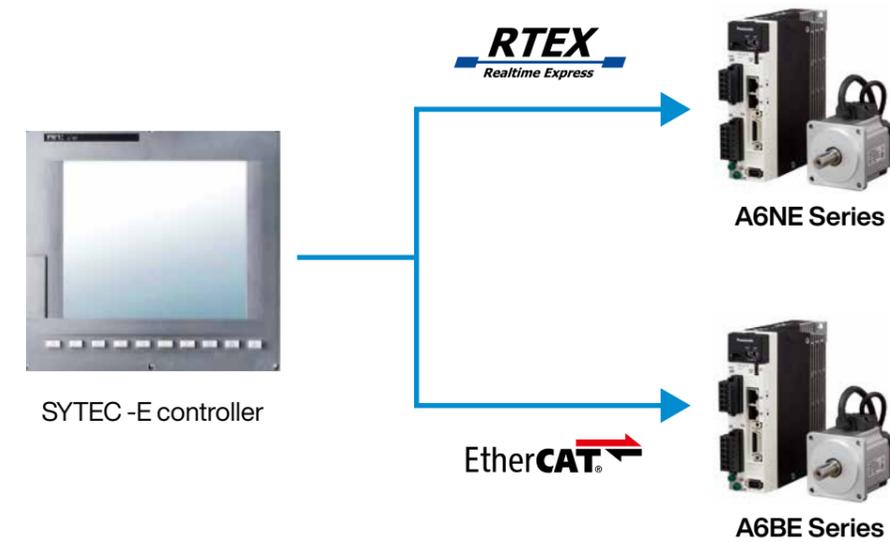

- Provide eHMI application for users to customize operation interface conveniently.
- Customized G/M code, dedicated machine can be used easily.
- Provide dipole architecture, users can integrate the customized software on PC.
- Provide optional vision system or pick-and-place equipment for highly automated integration solutions.
- Also supports EtherCAT communication

Application Sample

- **Standard Machine:**
Lathe, milling machining center, engraving and milling machine, mill-turn machine.
- **Dedicated machine:**
Tapping center, glass cutting machine, cutter grinding machine, PCB molding machine, spring machine, laser processing machine, flame cutting machine, stone processing machine...etc.

PLC Motion Unit

B3632101-UNT-LE02

PLC motion unit best suited to build motion control system

A6N series
Servo drive compatible

Yokogawa Electric e-RT3 2.0 series
PLC compatible

Features

1 32 axes synchronous control

All servos sync to the host device assuring precise CP control.
Communication period is 1 ms over max. 32 axes allowing various control settings.

2 Software interface easily transportable from pulse train typesoftware

Command functions such as single axis PTP control, linear interpolation, arc interpolation, origin return and drive parameter change are provided. The unit will operate as the host controller sets the parameters and calls DLL functions. (DLL functions will be disclosed.)

3 Connection of Yokogawa PLC to Panasonic network servo

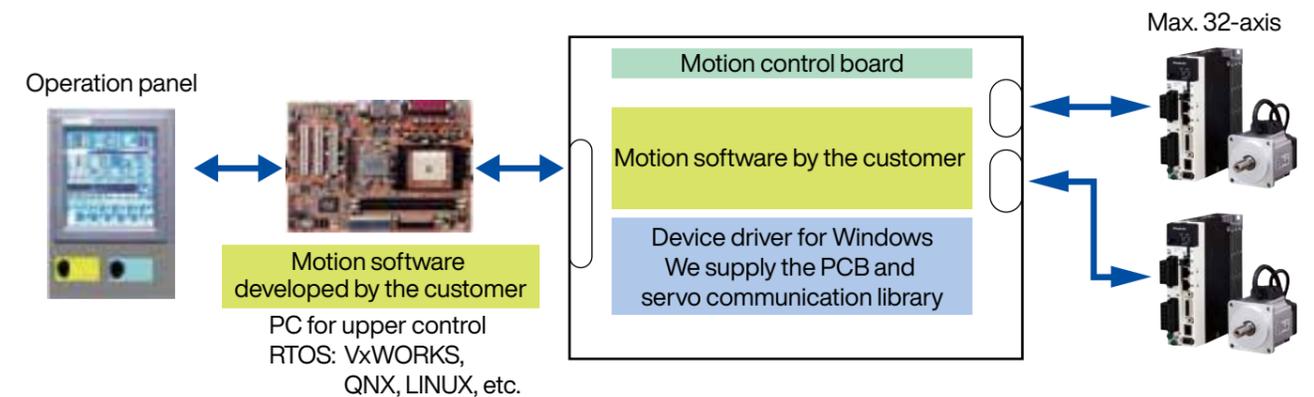

By connecting the unit to the host PLC via PCI bus and to the driving section via network interface, various monitoring operations can be performed without stress.
The combination of the unit and PLC expands functions such as to external signal interface.

Application Sample

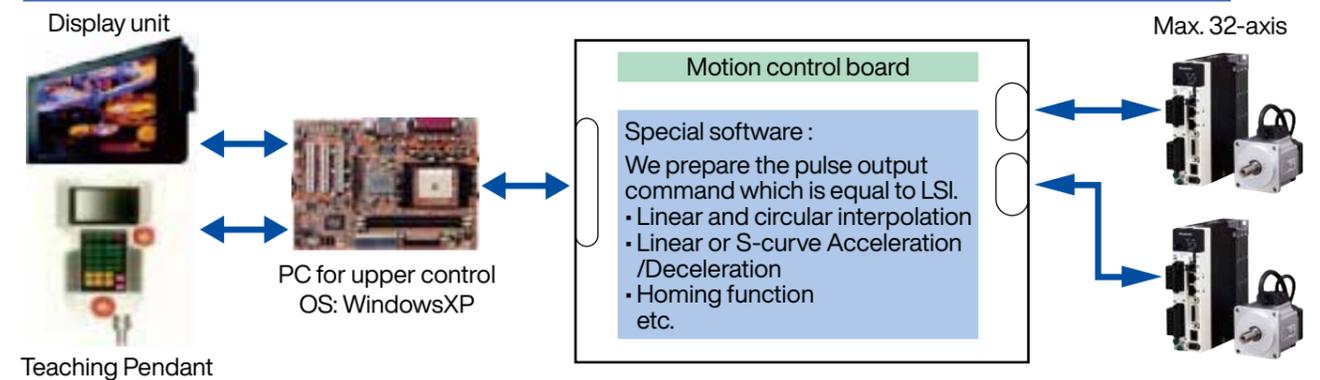

- Semiconductor equipment
- Chip-Mounter
- Machine tool
- Industrial Robot

System Configuration

Sample 1 : In case that the customer develops the motion software

Sample 2 : In case that the customer uses installed software and develops the upper application.

Motion Coordinator and RTEX Interface Module

MC664 / MC664-X / MC4N-RTEX

Features

MC664 / MC664-X

- Up to 128 Axes
- Servo period 50 µsec minimum (8 axes)
- Precise 64 Bit Motion Calculations with Quad Core Cortex A9 1 GHz Processor (P862)
- Dedicated Communications Core (P862)
- Built-in EtherCAT Port
- EtherCAT, Sercos, SLM and RTEX Digital Drive Interfaces
- Linear, Circular, Helical and Spherical Interpolation
- Flexible CAM shapes, Linked Motion
- EnDAT, BISS and SSI Absolute Encoder Supported
- Hardware Linked Outputs for Camera / Laser Control
- Ethernet-IP / Modbus TCP / Ethernet Interface Built-In
- Anybus-CC Module for Flexible Factory Comms Including ProfiNet/Profibus
- IEC 61131-3 Programming
- Multi-tasking BASIC Programming
- Text File Handling
- Robotic Transformations
- SD Memory Card Slot
- CANopen + EtherCAT I/O Expansion
- Backlit LCD Display
- RoHS and CE Approved

System Configuration

Application Sample

URL : Sample applications

<http://www.triomotion.uk/public/applications/applications.php>

Please refer to the sample and typical applications for the MC464 with A6N as shown above URL.

Features

MC4N-RTEX

- Up to 32 RTEX Digital Drive Axes
- Supports Position, Speed and Torque Drive Modes
- Up to 1024 I/O
- Linear, Circular, Helical and Spherical Interpolation
- Flexible CAM shapes, Linked Motion
- Isolated Encoder Port
- EnDAT and SSI Absolute Encoder Supported
- Hardware Linked Output for Camera / Laser Control
- Ethernet-IP / Modbus TCP / Trio ActiveX / TCIP / Uniplay HMI / UDP / Ethernet Interface Built-In
- Precise 64 Bit Motion Calculations with 532 MHz ARM 11 Processor
- IEC 61131-3 Programming
- Multi-tasking BASIC Programming
- Text File Handling
- Robotic Transformations
- 4 high speed registration inputs
- Isolated RS232 and RS485 ports
- SD Memory Card Slot
- CANopen I/O Expansion
- Backlit LCD Display
- RoHS and CE Approved

RTEX/AnyWire Gateway

AG42-R1

Connect a wiring-saving system to RTEX

Features

1 AnyWire Wiring and connection

AnyWire wiring saving adopts the Dual-Bus function that can transmit DI / O and AI / O independently on one transmission line.

2 Cable-free, topology-free

It can be connected with a general-purpose electric wire, and there are no branch restrictions.
Layout-free such as T-branch, multi-drop, tree wiring.

3 basic specifications

The maximum number of I / O points is 2560, the maximum number of I / O terminals connected is 128, and the maximum connection distance is 1000 m.

Communication ASIC MNM1221

For developing RTEX product, this ASIC is necessary. (See note)

	Specification
Part No. for ordering	DV0P444-9
Packing quantities	90
Power supply voltage	3.3 V
Current consumption	Max. approx. 100 mA (for reference)
Operating ambient temperature	-40 °C to +85 °C
Package	LQFP100pin 14 mm × 14 mm Lead pitch 0.5 mm
RoHS	Compliant
Operation mode	Master/slave

Note: As long as the target is noncompetitive to Panasonic products.

Drive appearance

A6B size A

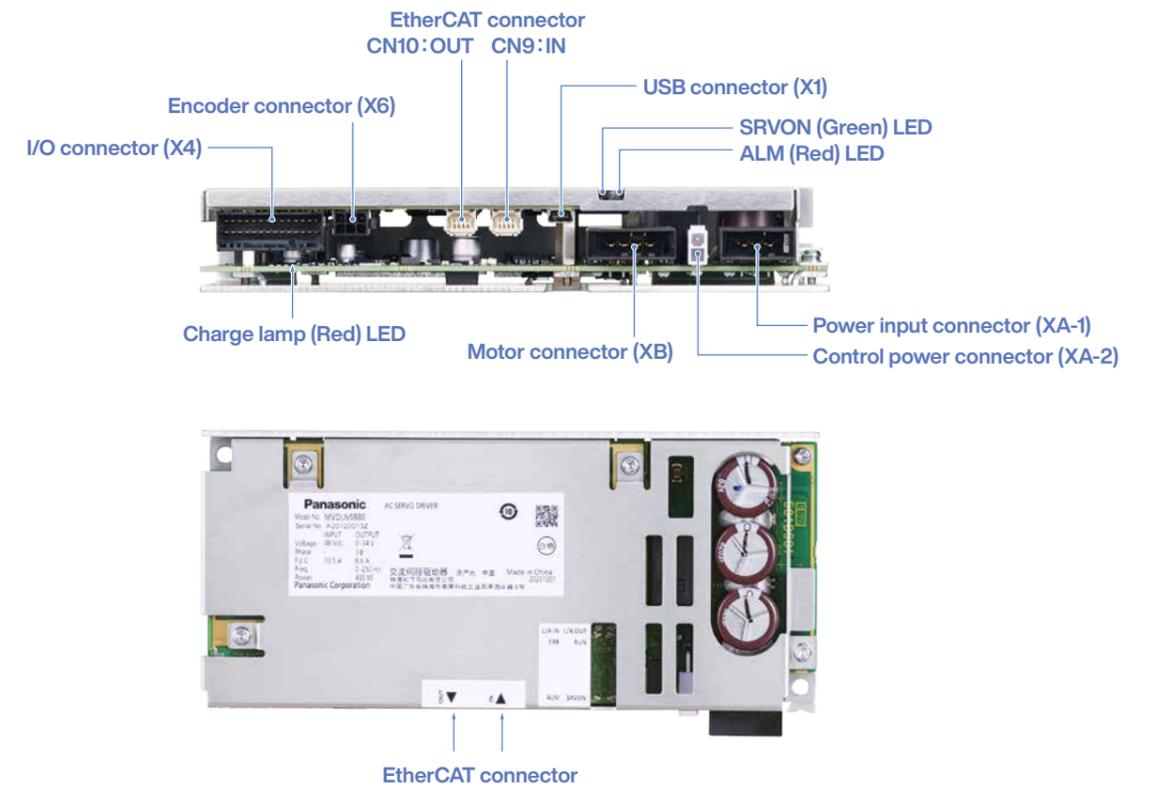

* This photo shows multi-functional type. Standard type does not have X3 and X5 connectors.

EtherCAT® Product Family

EtherCAT® Master Stack software, available for real-time OS as well as Windows

Features

- EtherCAT® Master Stack software, available for real-time OS as well as Windows
- Ready-to-run implementations for many embedded operating systems
- EC-Win: high performance Windows Real-time extension included to achieve up to 50 µsec cycle time on Windows!
- Use multiple CPU cores on Windows for distributed EtherCAT applications
- CPU architectures: x86, ARM, PowerPC, SH, MIPS
- Reliable and well proven in many customer applications worldwide. Market leading companies in the Semiconductor, Robotics, PLC/Motion, Measurement and other industries rely on this software.

EC-Master according to ETG.1500 Master Classes Directive

Class A Core

- Compare network configuration
- Cyclic process data exchange
- All mailbox protocols: CoE, SoE, EoE, FoE, AoE, VoE
- Slave to slave communication
- **Distributed Clocks with master synchronization**

Class B Core

- Compare network configuration
- Cyclic process data exchange
- Mailbox protocol CoE
- Mailbox protocol SoE
- Mailbox protocol EoE
- Slave to slave communication

Feature Pack
Cable Redundancy

Feature Pack
Hot Connect

Feature Pack
Remote Access

Feature Pack
Superset ENI

Feature Pack
EoE Endpoint

Feature Pack
Master Obj. Dict.

The ETG (EtherCAT Technology Group) has defined EtherCAT Master Classes (ETG.1500) with a well defined set of Master functionalities. 2 Master Classes are defined:

- Class A: Standard EtherCAT Master Device
- Class B: Minimum EtherCAT Master Device

Additional functionality is described by Feature Packs. Acontis supports all Feature Packs in industry proven quality.

EtherCAT Master Controller

PCIe-8332/8334/8338

Features

- PCI Express® x 1 compliant
- Up to 64-axis motion control & 10,000 I/O point control
- EtherCAT cycle times up to 250 μs
- Broad range of compatible EtherCAT slaves
- Dedicated emergency stop input
- 4CH isolated digital input/4CH isolated digital output
- 1CH pulsar input
- Point-table functions for contouring application

Software Support

APS Solution Development Kit—A single platform for easy configuration and faster secondary development

- Powerful motion kernel for smart manufacturing
- Rich built-in function with 15+ motion and 30+ I/O products
- Easy configuration with one library, One UI for no-code testing developer

EtherCAT Slave System and Module

EU Series

Features

- Compliance with EtherCAT standard
- Optimization with ADLINK EtherCAT master (250 us cycle time)
- Comprehensive slave modules including digital I/O, analog I/O, coupler, power supply and terminal shield
- Compliance with industrial IEC standard
- Excellent scalability powered by modularized and slice-type design
- Compact Size: 100 mm 69 mm 63 mm (each module)

Sales area

- Worldwide response

EtherCAT

EtherCAT

Intelligent EtherCAT® Master Board

Low CPU load EtherCAT® Master Communication

Features

Low CPU load EtherCAT® Master Communication

EtherCAT® environment is enabled typically by implementing the master stack on Ethernet hardware. Advanet provides EtherCAT® master communications on-board by implementing the Xilinx Zynq® with ARM® Cortex®-A9 on a board to minimize the impact for the host CPU as bus master.

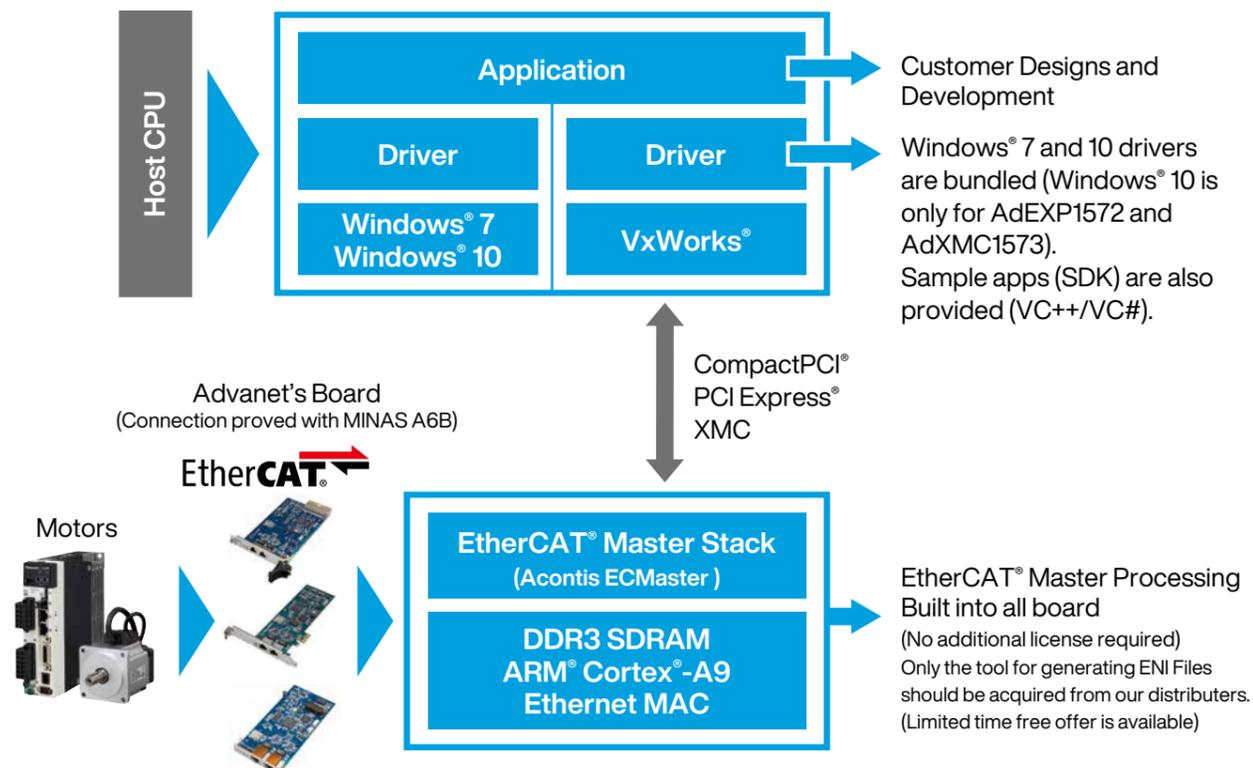

Secure Cable Redundancy

The redundant cable configuration adopting ring topology which recovers the communication cable failure in the EtherCAT® system allows the communications to reach any branch even in case of cable fracturing happened at any point.

Hot Connect Responds to Unexpected Replacement

The protocol of the EtherCAT® system utilizing a hot connect capability provides flexible and responsive functionalities to change the system configuration which allows you to connect/disconnect or reconfigure any part of the network “on-the-fly”.

System Configuration

Features of Advanet EtherCAT Slave

- Simultaneous measurement of 24ch in 1 slave
- Connectable 4-wire Pt100 or JPt100
- Temperature conversion on module
- Measurement overall precision at±0.1 °C (*Measurement range: -20 °C to 80 °C)

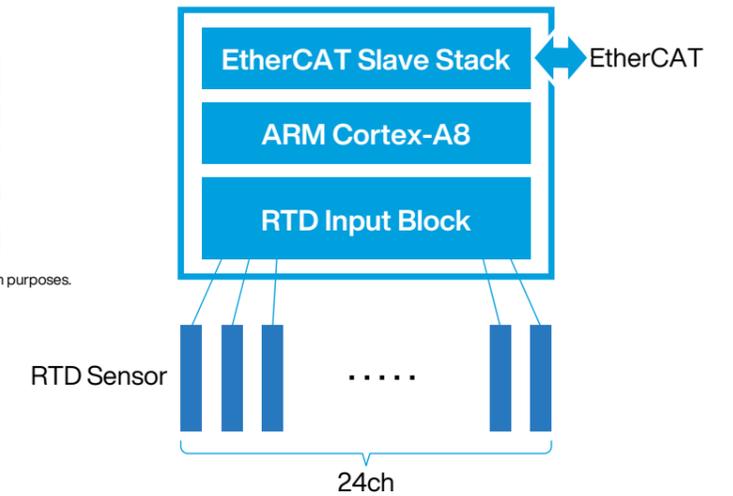

24-Channel RTD EtherCAT Sensor Module
E-070

Available Customization of EtherCAT Slave!

2-Port EtherCAT PCI/PCle Motion Control Master Card

PCI-1203/PCIE-1203/PCIE-1203L

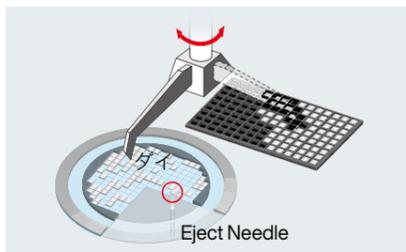

Features

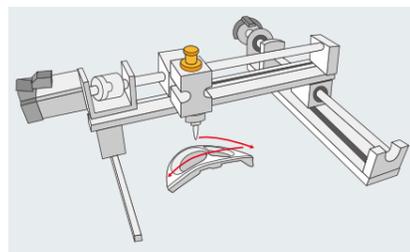

- Dual EtherCAT ports for high-performance of Motion and I/O applications
- Up to 64 axes support for motion control
- Motion cycle time: 32 axes = 500 μ s; 64 axes = 1 ms; I/O cycle time=200 μ s
- Supports ready-to-use API for rapid application development
- Multi-axis synchronous motion
- Trace logger for fast error diagnostics
- Easy to wire, saving wiring working-hour

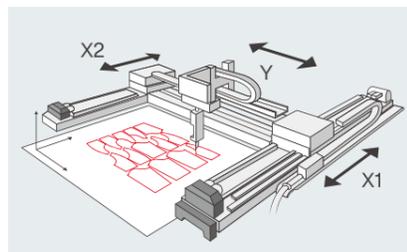

Application Sample

Torque Limit Table

3D Arc Interpolation

Gantry

Real-time PC-based SoftLogic Edge Controller

AMAX-658, AMAX-637

Features

Easy Data Access & Self-Management

- Self-diagnosis for controller hardware information
- OPC UA, MQTT & various database connection by ODBC

Flexible Expansion & Connection

- Easy expansion for PC peripheral by AMAX-5000 & iDoor Module
- Slice I/O & Distributed I/O provide 100 μ s real-time EtherCAT control
- iDoor fieldbus module support CANOpen & Profibus communication

Real-Time Industry Ethernet Control Protocol

- CODESYS RTE with Visualization (Target & Web) ready for control
- EtherCAT, ProfiNet, Ethernet/IP ready for real-time communication
- Support remote upgrade SoftMotion or CNC Robotic function
- Soft PLC can reach a 50 μ s program processing cycle
- Motion control achieve 64-axis with 1ms cycle time

EtherCAT master

“All-in-one Controller”, based on the Industrial PC equipped with EtherCAT master stack

Features

All-in-one controller can execute SCADA, synchronous motion control and image processing just by itself.

- International standard (IEC 61131-3) compliant software PLC
- PLCopen compliant positioning/synchronous motion control software
- OpenCV, OpenVX compliant image processing engine (option)
- SCADA-based HMI software

Specification

- Intel® high-performance processor, Atom E3845 Quad Core 1.91GHz
- Real time OS (INtime). High-speed 28000 steps/50 μs processing.
- Windows10 IoT Enterprise allows effective utilization of various software
- Top-class ultra-thin compact design and lower power consumption allow for installing in small space for new, expanded use. Free switch off. Multi-touch panel. Multilingual
- Fanless, diskless, completely spindleless. 2 storage, mini m-SATA, slots. support.

UPS equipped standardly

GPIO, 6 IN / 4 OUT, equipped standardly

LTE equipped, can access directly to Cloud

Suitable for dedicated controller

Application Sample

ALGOSYSTEM's All-in-one Controller had replaced PLC and has been adopted as de facto standard controller of the minimalfab for processing a half-inch wafer to make semiconductors in high-mix low-volume production. Minimalfab is the national project carried out by the National Institute of Advanced Industrial Science and Technology (AIST). The key to adoption of the All-in-one Controller is its high performance and space saving, it can support multi-vendors' products and encrypt, it can be programmed by either C or software PLC compliant to IEC61131-3 Standard which provides 5 languages: LD, FBD, IL, ST and SFC.

EtherCAT slaves

Features

Digital input/output (NPN/PNP)

- 16-point input unit
- 16-point output unit
- 32-point input unit
- 32-point output unit
- 16-point input/16-point output unit

<“Chibimarukun” series>

e-CON connector

- 8-point input unit
- 8-point output unit
- 4-point input/4-point output unit

MIL connector terminal block

- 16-point input unit
- 16-point output unit
- 8-point input/8-point output unit

Relay output (terminal block)

- 4-point relay output unit

Motion controller

- Up to 4-axis control
- Execute from high-order PC, etc.
via restricted EtherCAT connection

Analog input/output

- 4ch analog input unit
- 4ch analog output unit

IO-Link, Modbus, 4ch SIO Gateway

* IO-Link, Modbus, Serially controlled devices such as RS-232C and RS-485 devices are converted to EtherCAT. EtherCAT can be installed without putting old assets to waste.

Encoder input

- Line receiver input
- Open collector input

Software PLC/ NC/ CNC/ Vision/ Machine Learning

TwinCAT 3

Real-time control system in PC base system TwinCAT® 3 Software PLC/ NC/ CNC/Vision/Machine Learning

Features

1 IEC 61131-3 3rd edition

Integration of Microsoft Visual Studio Support for IEC61131-3 (IL, ST, FBD, LD, SFC) +CFC and object-oriented extension of the 3rd edition

Supports simultaneous editing of IEC61131 and C/C++ language

2 Development environment

Support for C/C++, real-time environment in MATLAB®/ Simulink®, programming in .NET/C#.

3 Link to MATLAB®/Simulink®

Link to MATLAB®/Simulink® optimizes development and simulation

4 Supports advanced technologies such as real-time Vision and Machine Learning (ML)

We support the implementation of advanced technologies such as TwinCAT Vision, which realizes real-time control using image data taken by a camera, and TwinCAT ML, which can import machine learning results as a real-time execution function.

5 Multi-core CPU support

By assigning different functions to each core, you can maximize the performance of the multi-core CPU.

- PC base controller with TwinCAT supporting multicore maximizes EtherCAT performance
- Compact controller on DIN rail (CX5100 series)
- TwinCAT PLC processes minimum 50 μs real-time task, and controls motion system in minimum 125 μs

Industrial PC

C6015 / C6030

The Ultra Compact IPC Generation

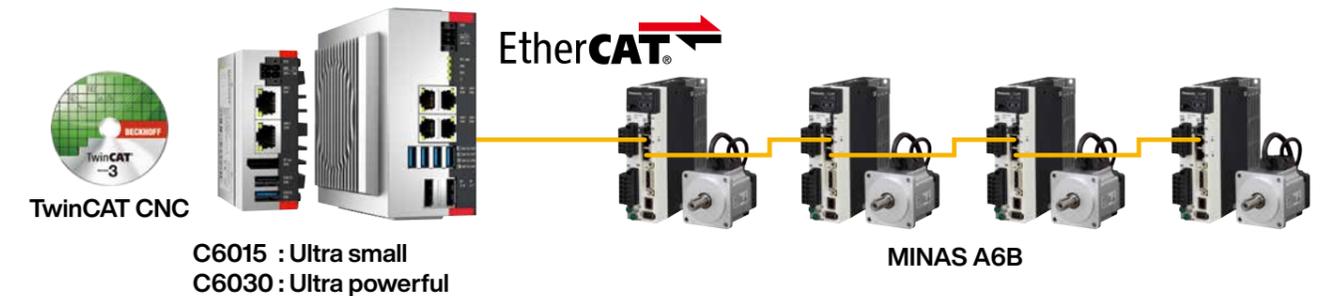

Features

C6015: Ultra small

C6030: Ultra powerful

System Configuration

Sales area

Local support: Japan, China, Korea, south-eastern Asia, Europe, the Americas, etc. More than 75 countries

CODESYS

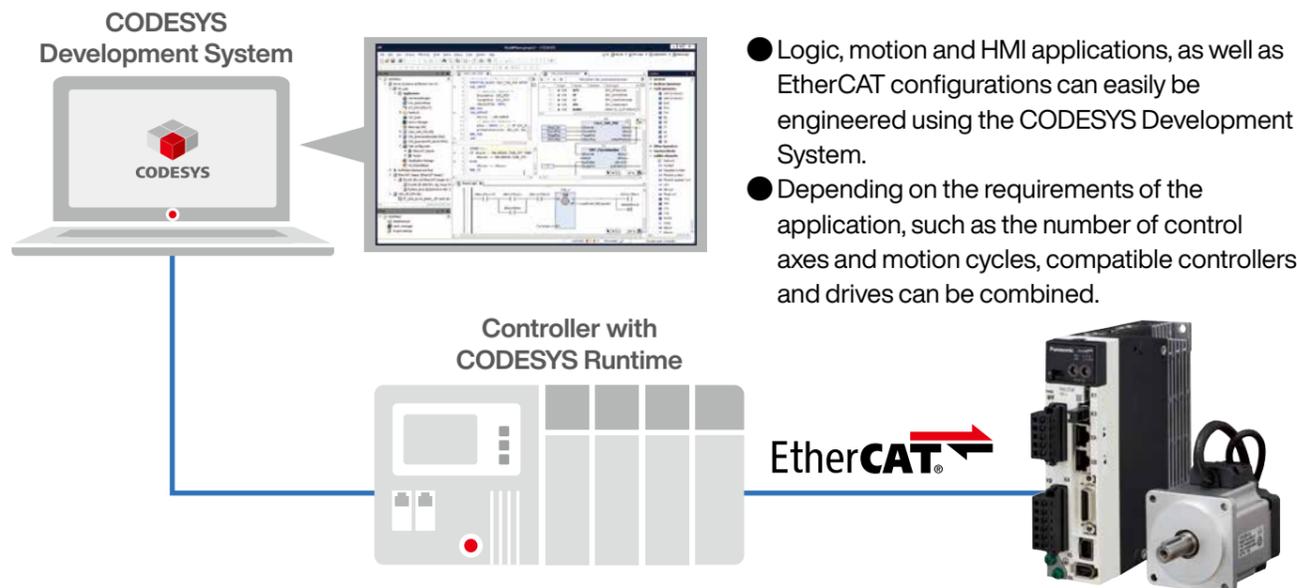

IEC 61131-3 Engineering / Software PLC / Motion / CNC / HMI

Features

CODESYS is the number one hardware-independent IEC 61131-3 software suite for the automation industry. The tool is used to develop application software for compatible hardware and software PLCs, professional HMI screens and motion control projects with CNC or robotics for example using EtherCAT. More than 400 device manufacturers worldwide use the tool to engineer their intelligent devices. Well over one million such devices are used to operate different industrial machines and plants every year.

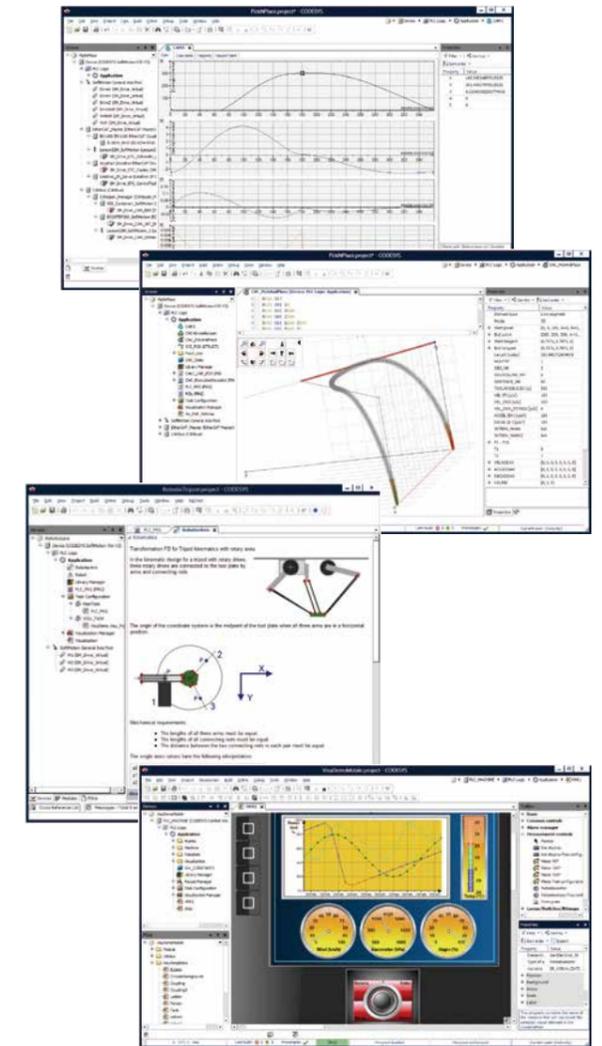

System Configuration

Specification

Fully integrated: Realize PLC, Motion and HMI functions on a single device with CODESYS.

- PLC Programming**
 IEC 61131-3-compliant, all languages (ST, Ladder, FBD, SFC, CFC) supported, plus real object oriented programming
- SoftMotion**
 For single axis control, electric cam and gear, using the integrated FBs (PLCopen Motion Control part 1, 2 compliant)
- SoftMotion CNC+Robotics**
 For complex coordinated motion control tasks such as robotics/CNC applications using the integrated FBs (PLCopen Motion Control part 4); linear / circular interpolation, various kinematics, G-code programming, comfortable axis configuration etc.
- HMI, Visualization**
 Integrated visualization editor in the CODESYS Development System: easy creation of modern operation screens and linking to IEC 61131-3 variables; display of the generated screens on IPCs, on panel PLCs with CODESYS TargetVisu, on standard Web browsers with CODESYS WebVisu (via HTML5) or in the engineering tool
- Fieldbus**
 Integrated fieldbus configurators and protocol stacks as CODESYS libraries seamlessly integrated in the CODESYS Development System for numerous fieldbus systems, such as EtherCAT, PROFINET, Ethernet/IP

Hard- and Software: PLC, Motion and CNC Controller

EXC89: CNC and Motion Controller

EXC89 Controller + UBM-I/O-Modules

Features

The EXC89 Controller and its UBM I/O System are the result of **over 40 years of experience** in the automation of CNC and Motion applications. Staying in close contact with our partners and customers, Eckelmann has built up experience in various industries and different fields of application. That expertise flows into the Eckelmann CNC Kernel and the EXC89 CNC controller.

- Suitable for PLC, Motion and CNC
- Up to 64 Axes
- Up to 8 NC Channels
- CODESYS V3 runtime system
- Motion according to PLC open
- PLC freely programmable

Your Advantages:

- Customer specific solutions and software extensions possible
- Experienced application engineers will support you
- Standardized Motion according to PLC open
- CNC with powerful Eckelmann CNC kernel
- Compact Controllers available
- Wide range of fast I/O's with the UBM-I/O-Module family
- Wide range of technology specific functionality and kinematics
- HMI and GUI's available
- OPC-UA for Industrie 4.0

Application Sample

CNC Application Examples:

- Cutting
- Tooling
- Drilling
- Sewing
- ...

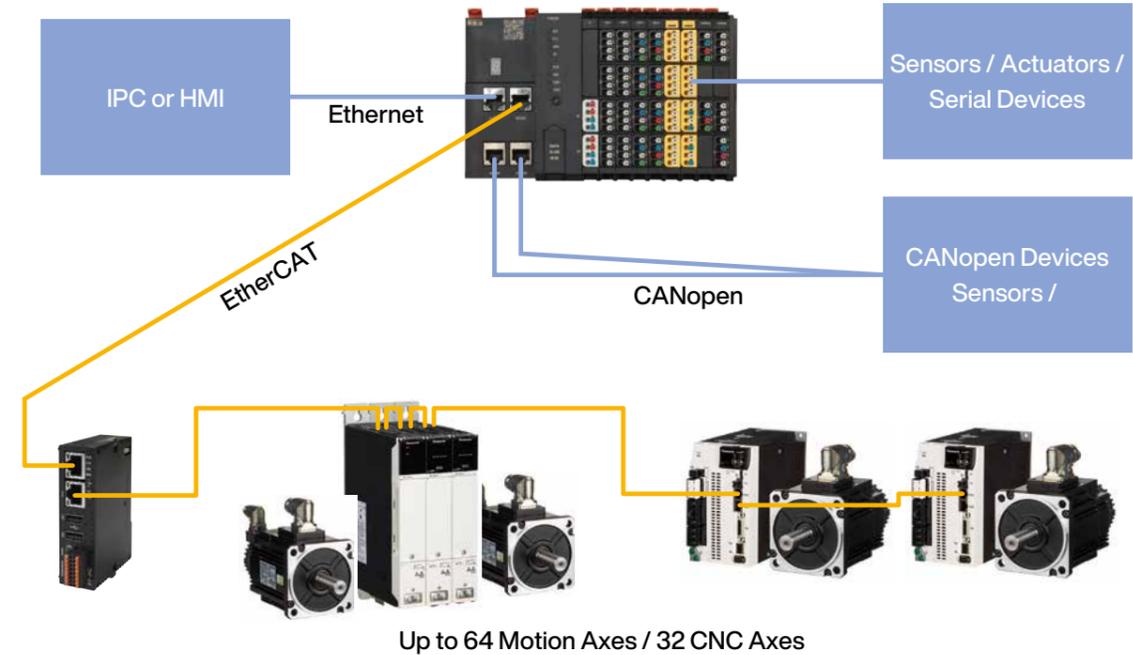

Motion Application Examples:

- Handling
- Logistics
- Battery production
- Wafer production
- ...

CNC with EtherCAT Master integrated

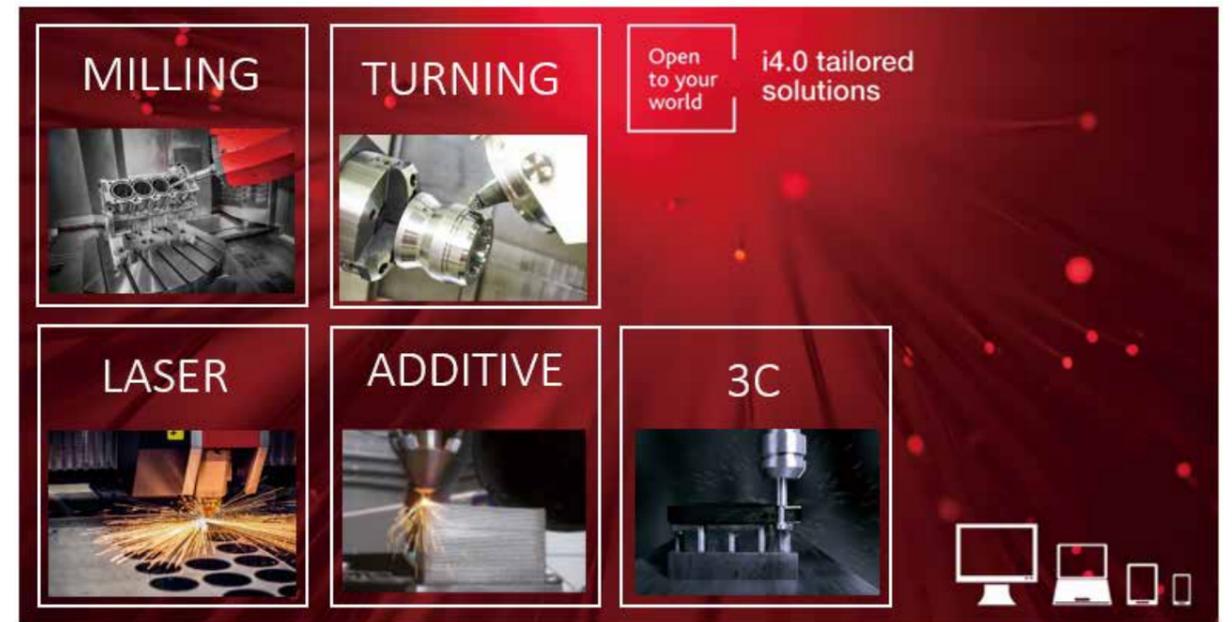

CNC 8060/65/70 families

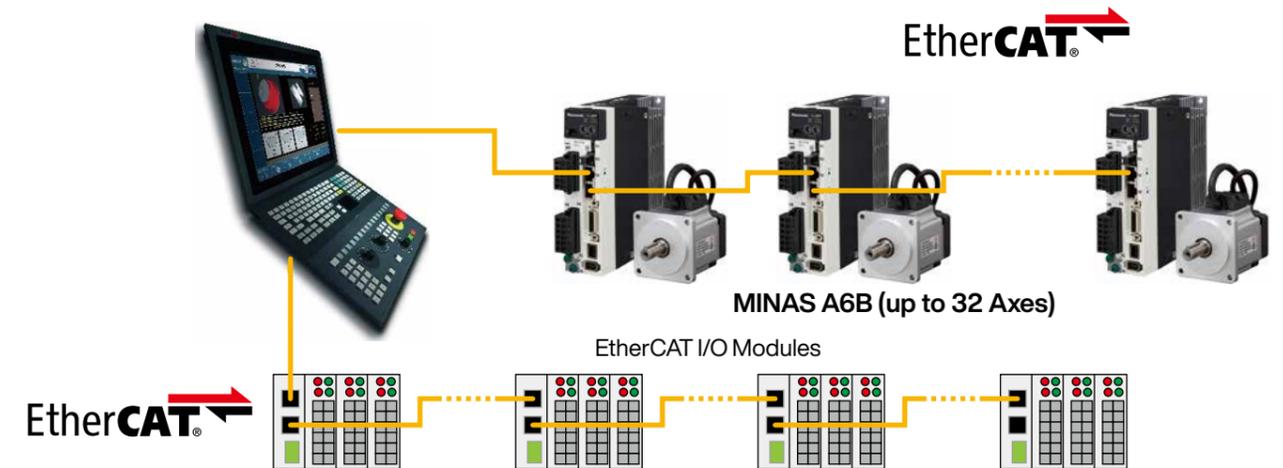

Features

- Easy programming. There is no need to know ISO programming language.
- Algorithm that provides the best performance, speed and accuracy in the machining process.
- Ergonomic and functional design (touch-screen, easy navigation, integrated manuals, sms communication, high-resolution graphics, keyboards and monitors with the highest level of sealing protection, etc.)
- Interface customizing tools.
- Free software download with no time limit to work at any PC.
- Axis position control (position loop) every 250 μs.
- High Speed Machining and Look-Ahead up to 2400 blocks and block processing time of 0.25 ms.
- EtherCAT master integrated in the CNC, with the following operation modes implemented: interpolated position mode, cyclic sync position mode, cyclic sync velocity mode, cyclic sync torque mode, homing mode.
- "KPA Studio" EtherCAT configurator, from Koenig-pa GmbH, supplied under license.

EtherCAT Master Controller

Model DMC-50000

Features

- Configurable controller for up to 8 axes of EtherCAT Master with any of the first 4 axes for local control or EtherCAT Master
- 10/100BASE-T Ethernet port; (1) EtherCAT Port; (2) RS232 ports up to 115 kbaud
- Available with internal, multi-axis servo or stepper drives. Or, connect to conventional external drives (only first four axes)
- For local axes, accepts up to 22 million counts per second of quadrature encoder for servos; Outputs up to 6 MHz for steppers; EtherCAT command speed up to 1 billion counts per second
- Sample times as low as 375 microseconds for 1-4 axes and 750 microseconds for 5-8 axes
- First four axes, advanced PID compensation with velocity and acceleration feedforward, integration limits, notch filter and low-pass filter
- Modes of motion include jogging, point-to-point positioning, position tracking, contouring, linear and circular interpolation, electronic gearing, ECAM and PVT
- Ellipse scaling, slow-down around corners, infinite segment feed and feed rate override
- Multitasking for concurrent execution of up to eight application programs
- Non-volatile memory for application programs (4000 Lines), variables and arrays (2400)
- Dual encoders for every local servo axis
- Optically isolated home input and forward and reverse limits for every local axis; Uses EtherCAT drive for home and limit switches
- Uncommitted, I/O:
 - 8 optically isolated inputs and 8 optically isolated outputs
 - Isolated, high-power outputs for driving brakes or relays (local axis only)
 - 8 uncommitted analog inputs
 - High speed position latch and output compare
 - 32 additional 3.3 V TTL I/O (5 V option)
 - More I/O available with RIO PLC
- 2 line x 8 character LCD
- Accepts single 20 - 80 VDC input
- Communication drivers for Windows and Linux
- Custom hardware and firmware options available

System Configuration

EtherCAT Master Controller

Model DMC-52000

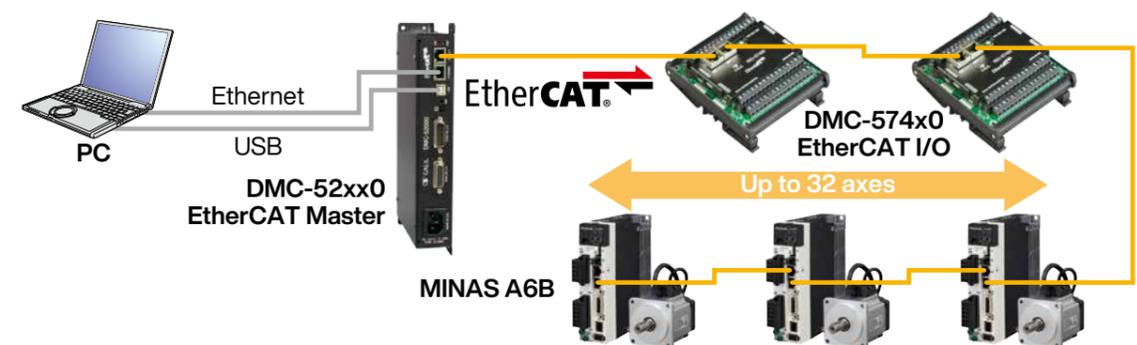

Features

- Available in 2, 4, 8, 16, and 32 axis configurations
- 10/100BASE-T Ethernet port; (1) EtherCAT Port; (1) USB port
- EtherCAT cycle time 1000 microseconds
- Cyclic Synchronous Position mode (CSP)
- Modes of motion include jogging, point-to-point positioning, position tracking, contouring, linear and circular interpolation, electronic gearing, ECAM and PVT
- Ellipse scaling, slow-down around corners, infinite segment feed and feed rate override
- Multitasking for concurrent execution of up to eight application programs
- Non-volatile memory for application programs (4000 Lines), variables and arrays (2400)
- Inputs including forward limits, reverse limits, and homing inputs are located on drives that support these inputs
- Uncommitted, I/O:
 - 8 optically isolated inputs
 - 8 optically isolated high powered outputs
 - 8 uncommitted analog inputs
 - 8 uncommitted analog outputs
 - More I/O available with the RIO-47xxx or RIO-574x0
- Accepts single 120 - 240 VAC input
- Communication drivers for Windows and Linux

Motion Control Software · Software Modules

HLS-ECAT02xx/Win, HLS-ECMC02xx/RSI (xx: represents the number of axes)

Features

HLS-ECMC/RSI	HLS-ECAT · Win
EtherCAT multi-axis positioning software module	EtherCAT that can be developed with VC ++, VC #, VB
<ul style="list-style-type: none"> ● The software module that performs motion control on real time OS ● Controlling servo driver with EtherCAT communication (CiA 402 drive profile) ● Control axes will be from 6 up to 64 axes (can be handled in by 1 axis unit) ● The program is written in C language ● API functions conforming to international standard specifications ● Development environment: Visual Studio + INtime SDK <p>※ The cycle time will depend on the PC (PDO cycle: 125 μs possible)</p>	<ul style="list-style-type: none"> ● EtherCAT motion control software by Windows PC ● Execute real-time processing on the RTOS with Windows as the interface. Easy developing the EtherCAT system ● Control axes will be 32 axes ● Motion control can be embedded into Windows application development ● Development environment: Visual Studio 2008 or later (VC++, VC#, VB) <p>※ The cycle time will depend on the PC (PDO cycle: 125 μs possible)</p>

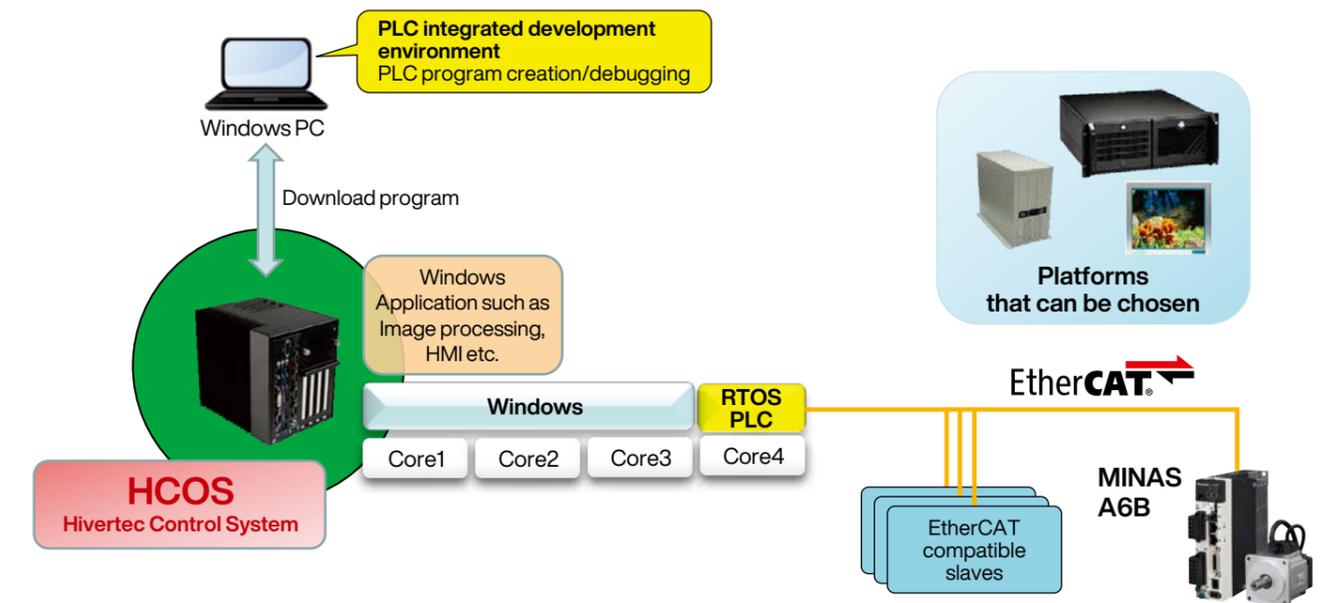

IPC base PAC (Programmable Automation Controller)

HCOS series

Features

- **Easy to use**
→ The open international standard IEC 61131-3
- **Stable supply**
→ Cooperated with IPC manufacturers
- **Benefits of using a PC**
→ Huge memory, storage, connectivity with the network, Windows
- **Real time**
→ PLC operating on RTOS

Programmable Automation Controller to realize the above

Industrial plate, sheet, and pipe/tube cutting CNC

EDGE® Connect CNC

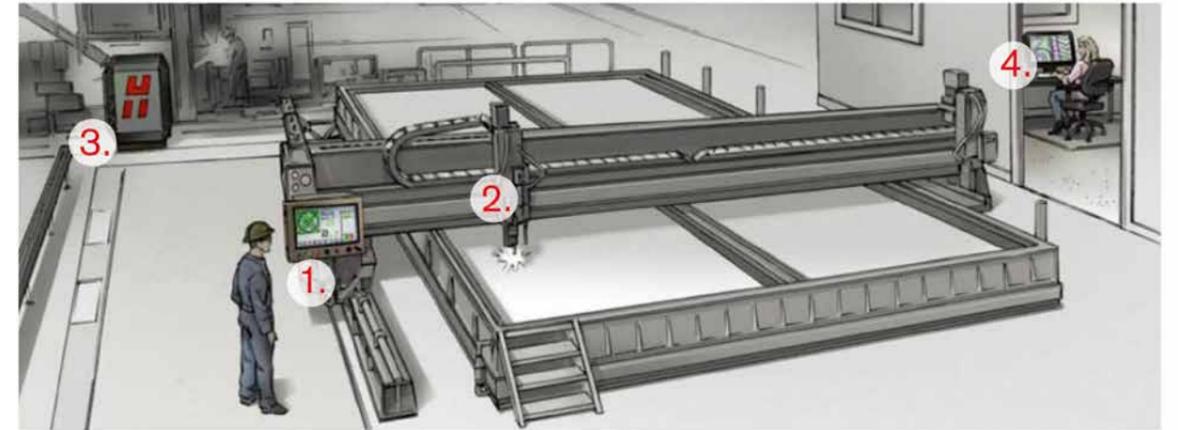

Companion products available

- ProNest® CAD/ CAM Software
- Conventional Plasma Systems
- HyPerformance® Plasma Systems
- Plasma Consumables
- Torch Height Controls
- HyPrecision™ WaterJet Pumps
- Waterjet Consumables

Features

- Industrial PC-based CNC for X/Y gantry machines.
- Built-in motion control logic for straight “I”, Bevel, & Pipe/Tube cutting.
- Two hardware configurations
 - 495 mm (19.5” in) touchscreen display with integrated hardware operator’s panel.
 - Compact PC for integration of custom operator’s panel and display.
- A proprietary graphical User Interface (GUI) for intuitive machine operation.
- Integrated torch height control (positioner) for plasma cutting.
- Real-time operating system for precise motion and process control.
- Embedded process control for oxyfuel, plasma, and waterjet.
- On-screen operator’s console for station and process control.
- Optional PLC available to add custom functionality (IEC 61131 compliant).
- ProNest® CNC nesting software for optimal plate utilization and embedded process control.
- SureCut™ technologies (True Hole®, Rapid Part™ and True Bevel™) for improved cut quality, productivity, and operating cost.
- Remote Help™ for system diagnostics and troubleshooting via the internet.
- Global sales and service.

Application Sample

1. CNC control

2. THC lifter

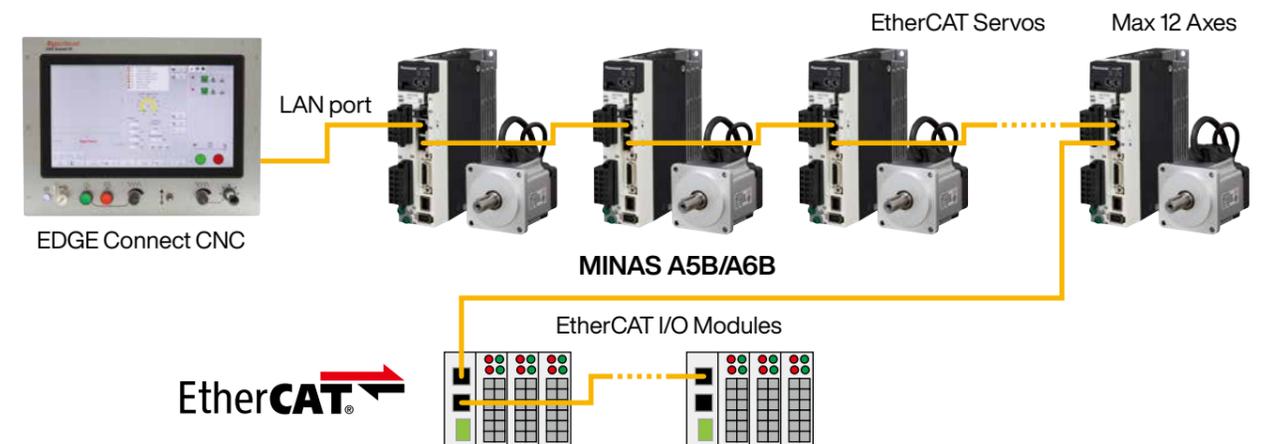

3. Plasma cutting tool

4. Office CAM

Software CNC

COSTANTINO CNC

System Configuration

- Software CNC Costantino
- Panel PC or Industrial PC
- EtherCAT Bridge for connecting servodrivs and I/Os

Features

Costantino is a **SoftCNC** that can be completely customized by OEM customer to create their own CNC solution, using proven and robust components.

Costantino **runs on any IPC** so you can choose your favorite brand that can guarantee international support on hardware components. It runs completely independent on Windows using its dedicated CPU processors in a multicore environment using its dedicated memory amount and its Ethernet controller.

Costantino connects with servo and IO devices of any brand using its integrated **EtherCAT master and configurator**. If customer wishes to use different fieldbus such as **Mechatrolink or CANopen**, Costantino can interface an ISAC-provided EtherCAT slave device that provides compatibility with all of these interfaces, and more. In addition to the natively supported fieldbuses, OEM customers can add support to any other fieldbus using an SDK that allow to easily develop by themselves or using ISAC engineering help.

Costantino comes with a PLC environment that is compatible **IEC61131-3**, so you can program it with any of the languages that are part of the standard: ST, IL, LD, FBD, SCD. In addition, you can create FBs in C language and thus reuse components written for different hardware solutions.

Costantino CNC interprets **G-codes** (ISO6983) with some features that are important in many application; with 25000 blocks/sec and more than 250 blocks of look ahead, it is one of the fastest CNC in the market.

- All movements are under **Jerk** control for tooltip and joints, this guarantees the best mechanics lifetime and performance;
- It runs up to 8 different interpolation programs at the same time, and handle auxiliary axes for clams, loaders and unloaders, or tool change, for a total of 128 axes;
- It supports **High Speed Machining**, that keeps cutting feedrate constant, reduces machining timing, and reduces machine vibrations;
- It comes with high accurate vibration suppression algorithms, following error compensation, velocity feed forward and many other tools to achieve the best cutting results;
- It compensates **tool length and radius**;
- It can handle online tool measures, tool wearing and life, and complex tool change procedure;
- It includes **5 axis machining interpolator** to program tool tip in machines equipped with bi-rotative heads, tilting tables, and even robots.
- It comes with a powerful **simulation engine** capable of showing results on the material before machining takes part.

Application Sample

- Stone Cutting
- Metal Milling
- Thermal Cutting (Plasma, Laser, Oxi)
- Waterjet
- Glass Cutting
- Glass Engraving
- Wood Working
- Dental Applications

Programmable Automation Control

PAC ILIUM

Features

Ilium is a newly developed PAC (Programmable Automation Controller) based on more than 10 years of ISAC experience in the field. It includes all main functionalities needed to build an Industrial Automation application, all in one device: **PLC Logic Execution + Motion Control + Communication and integration with other software components + HMI**.

Those functionalities **do not interfere between each other**, as it is possible to use more than one core of the processor; all of the tasks are executed with **high precision** and with **defined execution times**. Ilium interfaces with other devices through an Ethernet port that supports **EtherCAT or Powerlink**. Using the ISAC Bridge, Ilium supports many other fieldbuses (**CANopen, Mechatrolink, Analog interface** with position reading through **Encoder, SSI or ENDAT, Pulse/Direction or Stepper interface**). Ilium offers complete diagnostic tools for faults and anomalies detected on the I/Os peripherals and on the servo drivers. All of the errors are stored, allowing to analyze them at a later time, even in the case of unattended operation.

Ilium is available in **two formats**: the application is **portable** between different formats, the development tools are the same, as well as the application libraries.

Ilium Embedded is a compact device, powerful enough to drive **up to 11 EtherCAT axes**. It is available with **touch screen**, it supports **USB, COM** ports, external **HDMI** video, one **Ethernet** port for programming and Web interfaces.

It does not contain moving parts, all of the components are non-removable, few Watts are enough to allow it to run.

Ilium soft-Motion is a **real-time software** that runs on an IPC; it uses exclusively **a part of the hardware resources**: one or more cores of the CPU, a portion of RAM, one Ethernet port; communication and HMI is managed by Windows. **You can choose the PC**: choose the ISAC model that suits your needs, or your preferred IPC supplier.

Ilium soft-Motion comes with no performance compromises, and offers the flexibility and the power of the PC to realize a customized user interface, using ISAC tools or alternative ones.

Ilium offers powerful and integrated development tools in order to make easier the PLC logic development and its debug, the start-up of the machine or of the plant, and its maintenance. You can develop the application in the IEC61131 standard languages (ST, IL, LD, FBD, SCD). Program the PLC logic with Multiprog, from Phoenix Contact Software. You can also use ANSI C, and compile in native code, in order to obtain the maximum performance and reliability, to create whole tasks with this language, or to create FBs to be used inside Multiprog. Ilium supports PLCopen MC part 1 and 2, version 2.0. The supplied FBs includes Cams (programmable from PLC logic or to be created from sampling), Gears, Electric Shafts, Phasing, Slave Synchronous Movement (referred on more Masters), all movements based on space or speed control, with speed, acceleration and Jerk control to assure fluid movements and the dampening of the resonances. The servo drivers can be tuned using the integrated diagnostic tools, as the oscilloscope, and all of the parameters will be stored and sent to the servo drivers by Ilium itself, making the replacing of servo drivers very easy.

ISAC ILIUM: TRY TO STOP IT!

EtherCAT Closed Loop Stepper Drives

CS3E Series

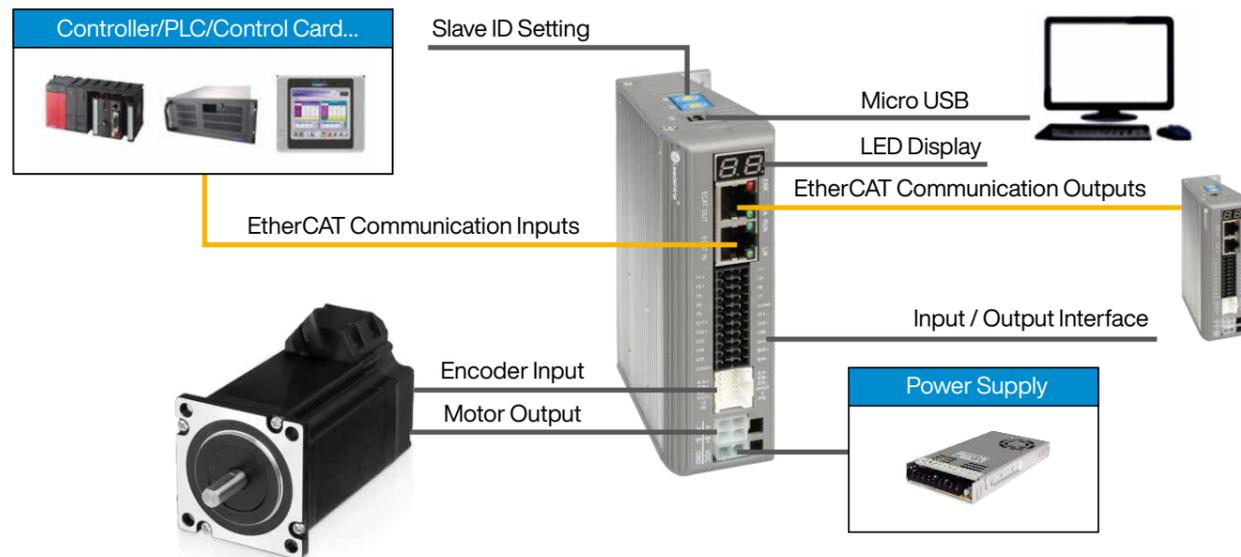

Features

- No loss of step, Smooth, Quick, Accurate, Low heating
- Support CANopen over EtherCAT (CoE) control and CiA 402
- Operation modes: Cyclic Synchronous Position (CSP), Profile Position (PP), Profile Velocity (PV) and Homing (HM)
- Compatible with major EtherCAT masters and slaves
- Stepper motors with 1000, 2500, 5000, and 10000 PPR encoders

Application Sample

- Packing machines
- Electronic equipment
- Stage entertainment equipment
- CNC Machines

System Configuration

EtherCAT Stepper Drives

EM3E Serie

Features

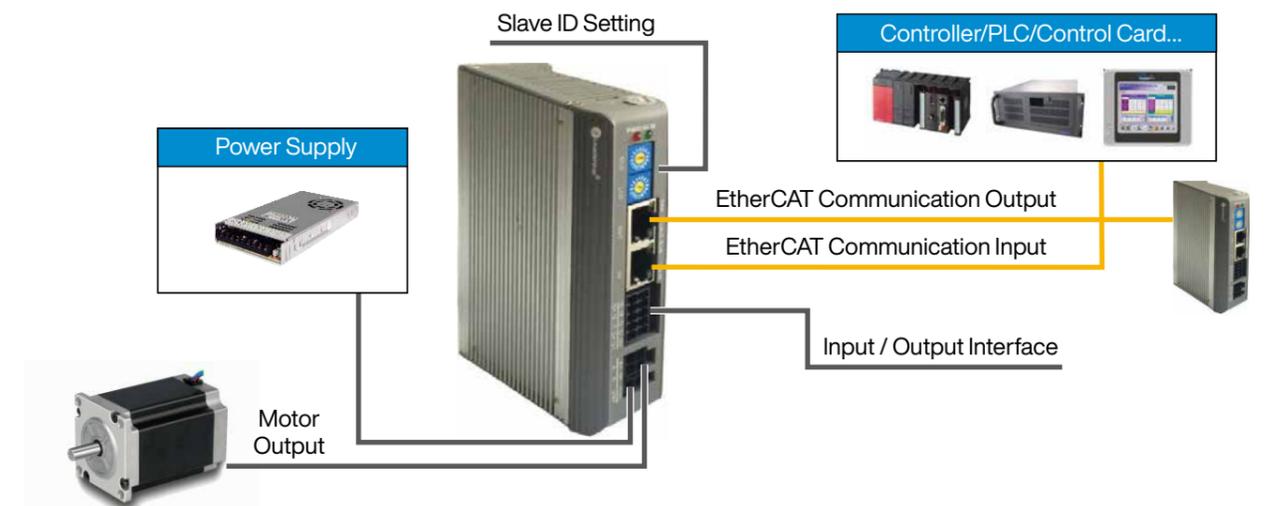

- Low noise and vibration, smooth motion
- CANopen over EtherCAT (CoE) with full support of CiA402, 100 Mbps full-duplex
- Support operation modes: Profile Position, Profile Velocity, Cyclic Synchronous Position, Homing
- 5 digital inputs, 2 optically isolated digital outputs for EM3E-522 / 556 / 870
7 digital inputs, 7 optically isolated digital outputs for EM3E-A882
- Operation modes: Cyclic Synchronous Position (CSP), Profile Position (PP), Profile Velocity (PV) and Homing (HM)
- Compatible with major EtherCAT masters and slaves

PC Based Controller

RT-C Language Controller

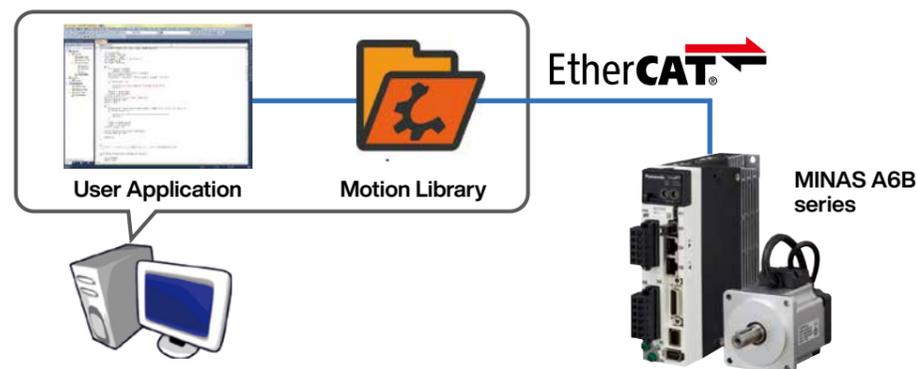

Cooperate with Windows / Multi-core CPU support /
Developed with Visual Studio

Features

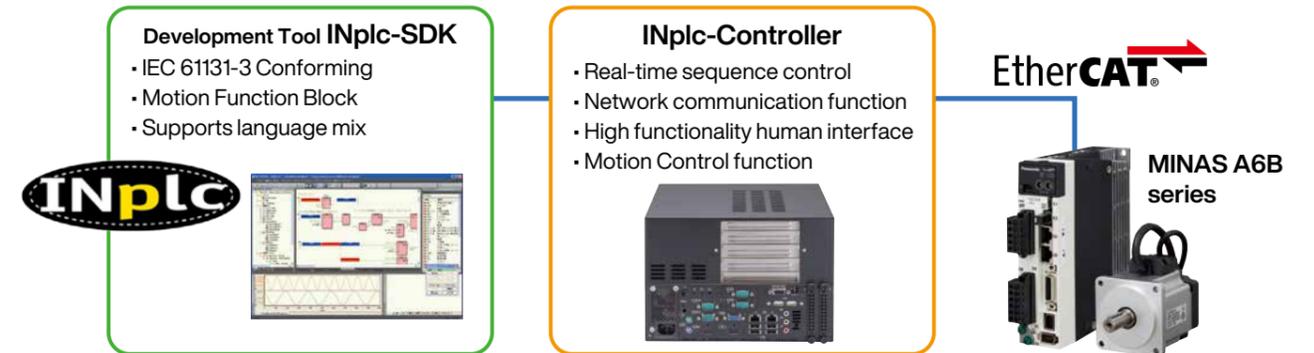

- RT-C Language Controller for Windows can give determinism to ensure predictable behaviors and can support real-time tasks to standard Windows platforms.
- Though Windows is a global standard on human machine interfaces (HMI) and on other general purpose operating system (GPOS) functions, but only Windows cannot provide deterministic supports for real-time application needs.
- RT-C Language Controller is a controller which can achieve 100 μ s period high-speed real time control. You can realize both real time instrument control function and multi-purpose Windows function on 1 PC platform. since it can also run on Windows.
- RT-C Language Controller which makes use of PC platform can offer unmatched performance since it uses latest Intel CPU.
- In developing control program, since it adopts the integrated development environment "Visual Studio" which is the most popular all over the world, if you have experienced Windows programs with C# language, you can smoothly introduce it to your systems.

System Configuration

PC Based Controller

INplc PLC based on IEC61131-3

Features

INplc-Controller with "INplc Runtime License"

The most advantageous point of INplc is that it can be used with Windows together.

It is a multifunctional controller equipped with not only PLC applications but also C language applications / HMI applications.

You can use add-in boards or field buses as I/O interfaces of INplc.

EtherCAT is also contained in the field bus category which INplc supports.

You can develop and maintain PLC programs on standard Windows PC platforms using it. The created PLC programs can be downloaded to PLC controllers via network.

- INplc has corresponded to 5 languages in accordance with IEC61131-3 that IEC (International Electrotechnical Commission) provides.
- You can code different languages together in INplc-SDK environment.
- INplc-SDK also allows you to convert across languages.

INplc is a real software-PLC in accordance with IEC61131-3.

INplc adopts MULTIPROG & ProConOS (by PHOENIX CONTACT Software, Germany) which have achieved a lot of satisfactory results in the world. And INplc-Controller adopts INtime and a standard Windows computer as its basic structure.

Therefore,

- No specialized hardware is needed.
- Efficient hardware can be selected from among marketed commodities. From high-end systems to embedded-systems, you can construct various systems with a high-flexibility.

PC-Based, Advanced Soft Motion Controller

WMX3 with EtherCAT

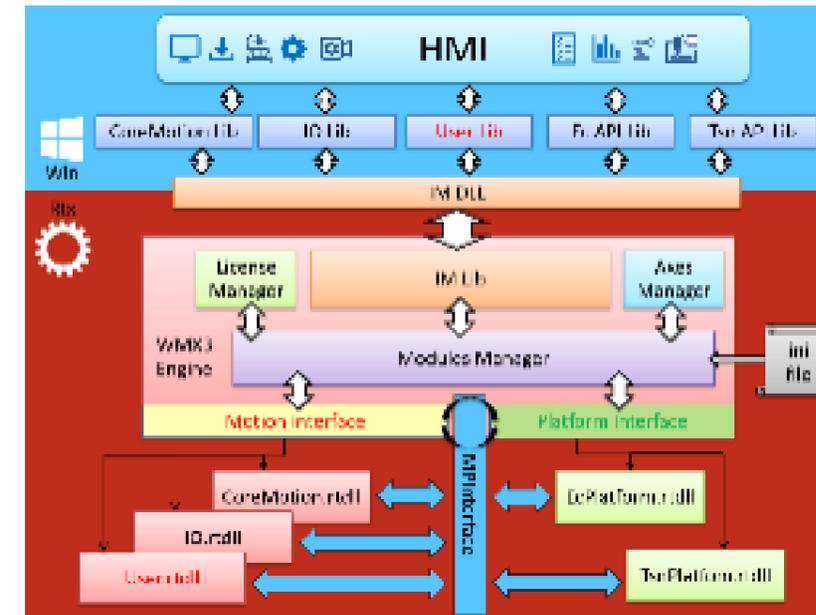

Features

- Soft Motion Controller WMX3 is a patented software which turns any Windows PC with multi-core CPU a high-speed real time controller for intricate industrial machines. No additional proprietary hardware interface modules or components are necessary.
- WMX3 streamlines its operation systems; it integrates operation screens, image processing and device control applications up to 128-axis.
- Wiring can be reduced by networking. Furthermore, wiring man-hours and material reduction can be realized. Contributes to noise immunity.
- Small cost effective Windows PC enables real time logging simultaneously with controlling various industrial devices. Allows the accumulation of data in the edge PC and instantly retrieves it whenever necessary for its host systems.
- Over 500 API functions for C/C++ and .NET functions for EtherCAT communications, motion control, and I/O control are available to develop original user motion applications.
- Exclusively developed EtherCAT SoftMaster is highly compatible with other slave machines on the market. Allows 32-axis high-speed synchronous communication at 250 μ s. Full customer support for transmission and connection problems.
- SDK installed with WMX3 allows for customized motion control systems for various operation needs.

Open Innovation

- Allow customers implement own algorithm as Real-Time engine based on opened architecture of WMX3.
- Provide Wizard and Add-on in Visual Studio for convenient development using WMX3 SDK.

Robot Control Package (Option)

- Real-time synchronization control is possible with only one computer with up to 128 axes, including robots and general-purpose axes.
- Control application can be independently developed through APIs of robot option.
- Provide kinematics, reverse kinematics and closed linkage machines for various industrial robots. (6-axis vertical poly joints, SCARA, delta, etc.)
- Support structure and link offset.

GMC-110F

EtherCAT General Motion Controller

16-axis EtherCAT-based Motion Controller

Features

1 Intelligent PC-based motion controller : GMC-110F

GMC-110F presents intelligent PC-Based motion controller for machine automation. It integrates NexCOBOT's general motion control software, NexGMC, to perform real-time motion control and supports standard EtherCAT slaves. GMC-110F also provides windows APIs for general motion control application and an integrated development environment to speed up development time for automation users.

2 Motion Control Functions

- Single-axis motion control up to 16axes
- Group motion control up to 2 groups
- Single-axis control: PTP, Jog, Halt, Stop, Speed/ACC/DEC override, blending
- Axes group control: PTP, Linear, Circular, Speed/ACC/DEC override, blending
- Supported Group Types: Cartesian coordinates machine (XY, XYZ table, XYZ&Θ)
- Support standard EtherCAT slaves
- Support C/C++, C#, VB.Net and Python for user programming
- Provide motion configuration tool - NexMotion Studio

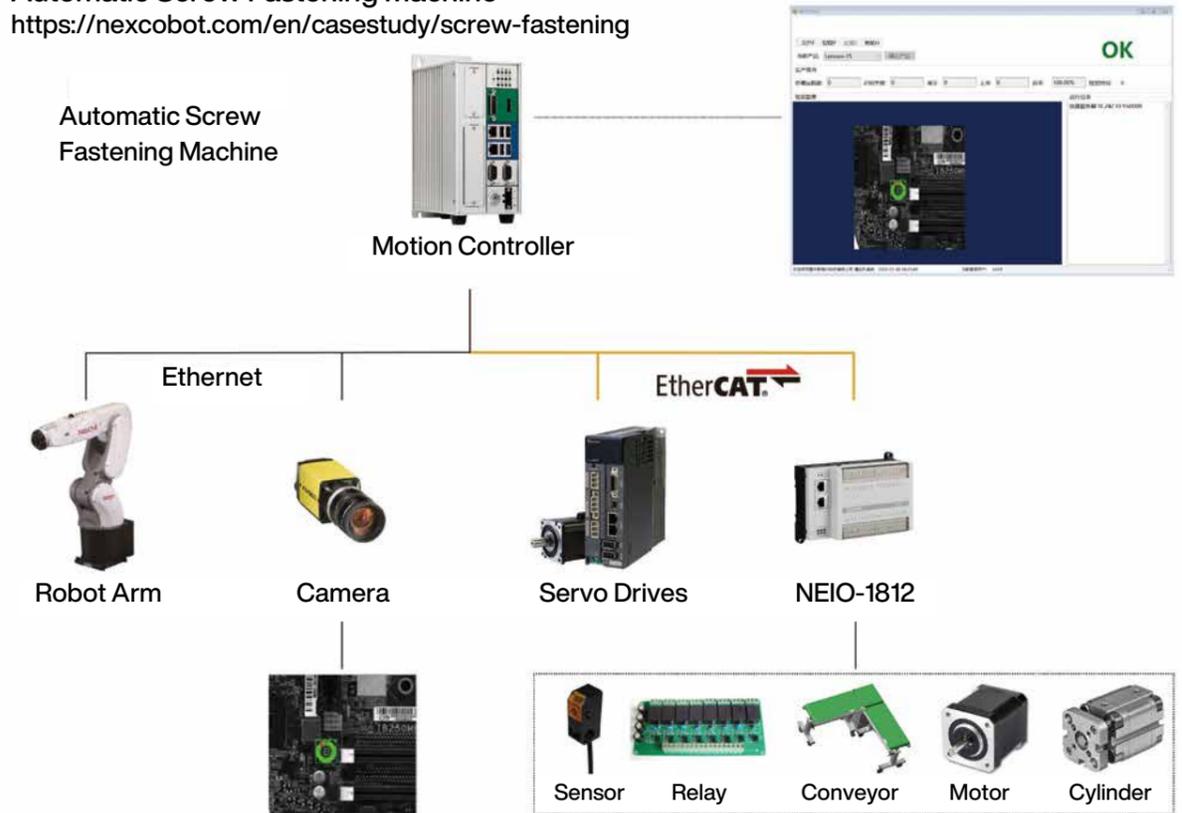

3 Platform Information

- Intel® Celeron® processor J1900 Quad Core
- 1 x EtherCAT port, 1 x Intel I210IT GbE LAN port
- 1 x USB 3.0, 3 x USB 2.0
- Dual display: DVI-I, DP
- Operation system: WES7P + Realtime OS

PC Based Fine Motion/ PC Based Motion Library

RTMC64-EC/ RTPL-EC

PC Based Fine Motion is a controller software for EtherCAT.

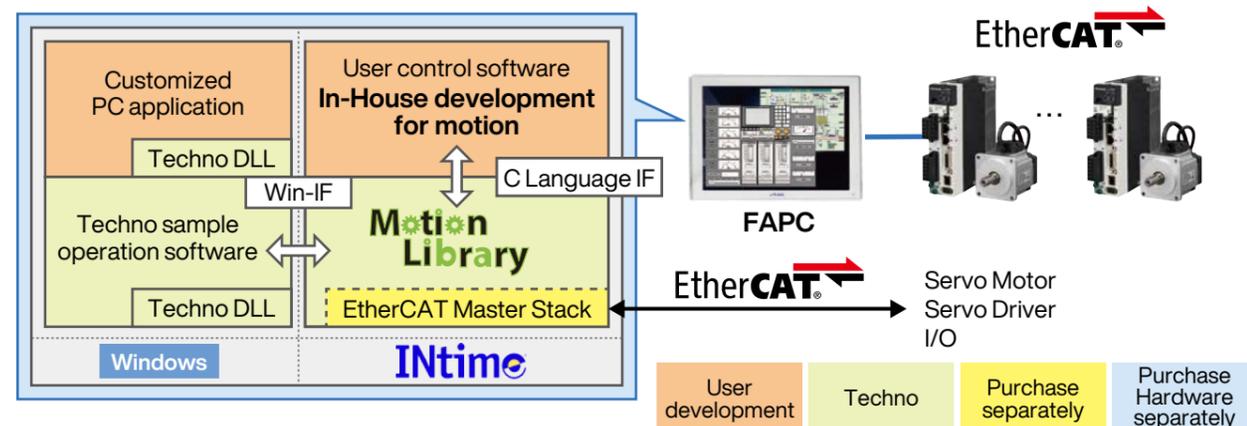

FAPC (Factory Automation PC)

Features

Your PC becomes a high performance motion controller. PC Based Fine Motion whose ability is several hold higher than that of a general NC or a robot controller controls at most eight precise machines by one PC. The reliability of your controller can be improved by "INtime" and FAPC(Factory Automation PC).

Motion Library

Features

- Semiconductor-fabrication equipment
- Electronic equipment production line
- Printing System
- Other multi axis control devices

Specification

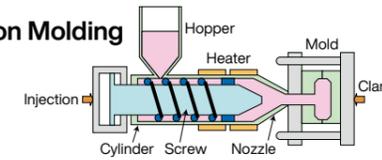

High-speed 0.25 msec / 32-Axis 0.5 msec / 64-Axis	PC Based Fine Motion 	G code / Techno code Simple operating program
Reliability Not depend on Windows	Batch control Control multiple machines such as precision cutting, robot, molding, injection, deburring.	Abundant motions Fully equipped motion functions Operate immediately
Multi Axis Control 64-Axis / 8 task	Precision cutting Bending Robot Jointed Robot Coordinate Measuring Machine Servo Press SCARA Robot	PLC/Image processing Easily cooperate with various software
8 task controlled simultaneously One PC controls 8 machines	• High reliability by INtime, not depending on Windows • Make user enable to control precise machines without special knowledge	

Application Sample

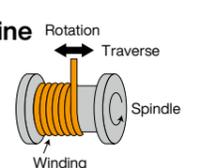

- Precision cutting
- Robot
- Laser cutting

Injection Molding

Programmable Automation Controllers

Power Family

Application Sample

- Plane cutting machines (Plasma, Laser, Oxy, Waterjet, Diamond disk)
- Stone working machines (Bridge saws, Polishing, CNC contouring)
- Woodworking machines (CNC for drilling, routing, tenoning, sawing)
- Metal machining (3-5 axes milling, parallel & automatic lathe turning)
- Textile (Cutting, Sewing, Labelling, Finishing & Washing)
- Pick & Place with Articulated, Cartesian, SCARA or DELTA robots
- Packaging and all sort of automatic machines

Features

All controllers of the **Power family** are equipped with 32 bit Risc (Reduced Instruction Set Computer) CPU to allow use of a sole **Real Time Multitasking Operative System (OS)** to manage PLC, CNC, HMI and IT tasks. The scale between the different models depends on:

- CPU with different clock (132 or 264 MHz) and cores (1 or 2)
- Memory architectures with different parallelism (16 or 32 bit)

The **compiler**, which generates the executable code, is integrated in the firmware of the controller so the system becomes completely autonomous and independent from the evolutions of the consumer world (PC) and **unaffected by computer viruses**.

There are two main executors, each one with its set of instructions:

- **PLC executor** which cycles continuously between the first and the last instruction of the PLC program
- **CNC executor** which starts only on request, it can be put on hold or deleted and it ends after the last instruction of the CNC program

CNC executor can process up to **5 CNC** task at the same time. Their execution are transferred in a buffer (**Look Ahead**) where they are processed to obtain effective trajectories of the interpolated axes. The commands inserted in ISO editor (the user program written in **G-code**) are interpreted and executed launching the execution of different blocks present in the BLC editor.

The OS manages many types of communication ports:

- **Ethernet** with the support of TCP/IP, FTP and ModbusTCP protocols; **OPC server** and **WEB server** are also available
- **RS232/RS485** serials with **Modbus** protocol (ASCII and RTU)
- **USB** which can connect **MSD** (Mass Storage Device) of different types and with more memory volumes, **HID** (Human Interface Device) like keypads / mouse and tracking devices like Gamepad

It can manage up to **28 axes** in point to point, gearing, camming and interpolation mode. Their trajectory can be shaped via many different levels of **Jerk** in order to reduce the inertial effect of load without great loses in performances.

Motion Coordinator and EtherCAT Interface Modul

Motion Coordinator MC664 /MC664-X Panasonic EtherCAT Interface Module

Features

- Up to 128 Axes
- Servo period 50 µsec minimum (8 axes)
- Precise 64 Bit Motion Calculations with Quad Core Cortex A9 1 GHz Processor (P862)
- Dedicated Communications Core (P862)
- Built-in EtherCAT Port
- EtherCAT, Sercos, SLM and RTEXT Digital Drive Interfaces
- Linear, Circular, Helical and Spherical Interpolation
- Flexible CAM shapes, Linked Motion
- EnDAT, BISS and SSI Absolute Encoder Supported
- Hardware Linked Outputs for Camera / Laser Contro
- Ethernet-IP / Modbus TCP / Ethernet Interface Built-In
- Anybus-CC Module for Flexible Factory Comms Including ProfiNet/Profibus
- IEC 61131-3 Programming
- Multi-tasking BASIC Programming
- Text File Handling
- Robotic Transformations
- SD Memory Card Slot
- CANopen + EtherCAT I/O Expansion
- Backlit LCD Display
- RoHS and CE Approved

Motion Coordinator and EtherCAT Interface Module

Motion Coordinator MC6N-ECAT

Features

- Up to 64 EtherCAT Digital Drive Axes
- Supports Position, Speed and Torque Drive Modes
- Up to 1024 EtherCAT I/O
- EtherCAT CoE, SoE, FoE
- Linear, Circular, Helical and Spherical Interpolation
- Flexible CAM shapes, Linked Motion
- Isolated Encoder Port
- EnDAT and SSI Absolute Encoder Supported
- Hardware Linked Output for Camera / Laser Control
- Ethernet-IP / Modbus TCP / Trio ActiveX / TCIP/ Uniplay HMI / UDP / Ethernet Interface Built-In
- 1GHz i.MX7 Dual ARM Cortex A7 Core Process
- IEC 61131-3 Programming
- Multi-tasking BASIC Programming
- Text File Handling
- Robotic Transformations
- 4 high speed registration inputs
- Isolated RS232 and RS485 ports
- SD Memory Card Slot
- EtherCAT I/O Expansion
- CANopen I/O Expansion
- Backlit LCD Display
- RoHS and CE Approved

Motion Coordinator and EtherCAT Interface Module

Motion Coordinator PC-MCAT Ethercat Master

Features

- Motion + PC Solution for Automation Machinery
- Fanless compact PC with E3845 Quad Core Atom Processor at 1.91 GHz
- Powerful up to 64 Axis EtherCAT Based Trio Motion Coordinator
- RTX64 Real Time Extension to allow Motion + Windows Running Directly on Their Own Processor Cores
- Plug and Play EtherCAT Configuration Expandable Support for Servo Drives, I/O and Devices From Over 100 Manufacturers
- Programmable In Easy Trio BASIC, built-in IEC 61131 or PC based Programming Languages Such As 'C'
- 4 GByte RAM + 64 GByte Upgradable SSD
- Windows Operating System
- Built-in Additional GBit Ethernet Port For Vision Cameras

IEC61131-3 Standard Industrial IoT Controller

CONPROSYS PAC (Programmable Automation Controller) Solution

Configurable Type

EtherCAT Module
CPS-PCS341EC-DS1-1201
Modbus Module
CPS-PCS341MB-DS1-1201

Features

IEC 61131-3 Standard CODESYS Programming

Equipped with the PLC engine "CODESYS," which continues to be used more and more commonly in the global market. Applications can be developed in programming languages, such as Ladder/SFC/Function Block etc., that comply with international standard IEC 61131-3.

Integrated Development Environment Provided free of charge

An integrated development environment for developing applications is provided free of charge. This makes it possible to seamlessly perform all the required development such as control logic and field bus I/O.

Supported integrated development environment: V3.5 SP7 Patch 2 or later
Supported languages: LD / SFC / FBD / ST / IL / CFC

Integrated Type

EtherCAT Module
CPS-PC341EC1-9201
Modbus Module
CPS-PC341MB-ADSC1-9201

Features

Equipped with Field-Bus Master Functions

EtherCAT / Modbus Supported

Equipped with an open-field network EtherCAT / Modbus master function. In the CODESYS integrated development environment, fieldbus I/O can be directly assigned to variables in the same manner as the built-in I/O and the stack I/O.

SCADA / MES / ERP Linking Built-in OPC-UA Server

OPC-UA is essential for the M2M communication. The controller has a built-in server function. This enables the safe and stable exchange of data with SCADA software and MES/ERP systems.

Equipped with a Web HMI Engine Web Monitor Function

The controller has a built-in web server function and tools for creating screens for use on the web. This makes it possible to easily view equipment information without using a cloud server or a similar device.

Linear and direct drive (DD) motor control

MINAS A6L series

Manufacturer/Distributor: Panasonic Industry Co., Ltd.

A6SL, A6SM

High-precision and high-speed advancement of linear motor / direct drive motor control driver inheriting the basic control performance of the A6 series

Motor

- Various motors such as 3-phase cored/coreless, shaft motor and DD motor

Scale

- Serial communication incremental/absolute and A/B/Z phase pulse scale

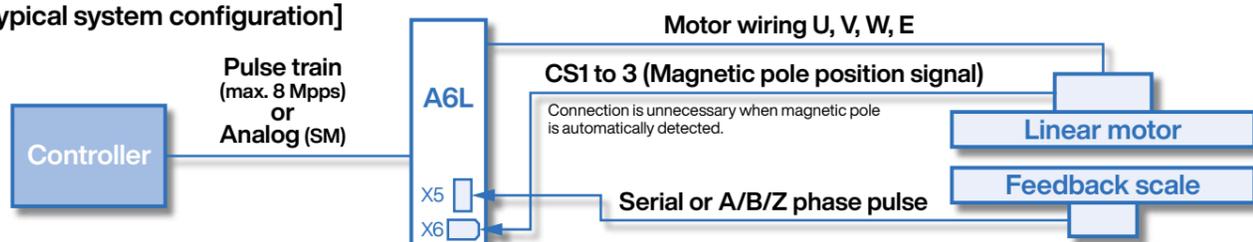

Magnetic pole detection

- Both with and without hole sensor signal (automatic detection)

Setup

- Automatic setup of magnetic pole, scale direction, gain, etc.

[Typical system configuration]

[Setup] - Please ask us to get this software.

Automatic Setup

Automatically sets various parameters such as magnetic pole, scale orientation and gain accordingly to the motor specification.

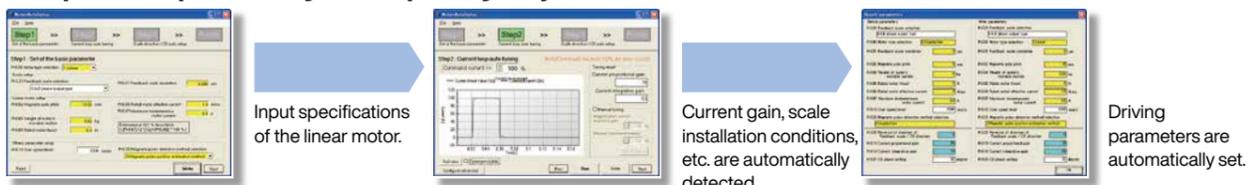

Drastically reduced setup time.

Automatic Magnetic Pole Detection

When CS signal is not available, the automatic magnetic pole detection function will detect the magnetic pole position of the linear motor.

Short adjustment time without magnetic pole sensor

Simple setup for easy and speedy adjustment

[Lineup]

	SM [Standard]	Specifications	SL [Pulse and I/O input only]

Voice Coil Motor

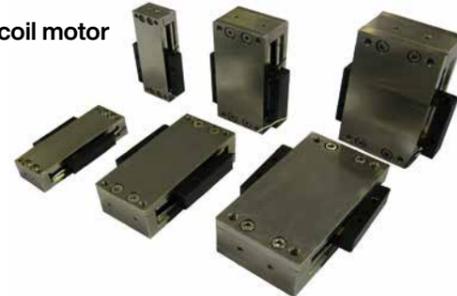

AVM Series / AVA Series

High-precision, high-response, small-stroke linear compact motor ideal for the tip of mechanical devices

Cylindrical Type
Voice Coil Motor
AVM Series

Square voice coil motor
AVA series

Features

- Two types are available to suit your needs
- Ideal for small linear drive (small stroke, small thrust)
- Usage
Ideal for linear drive of the tip of a mechanical device

Linear Motor

AUM Series / AJM, AQM, AKM Series / ACR Series

Achieves compactness of the motor by increasing thrust with our unique winding technology

Iron Core Type Linear Motor
AJM, AQM, AKM Series

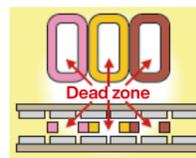

Ironless Type Linear Motor
AUM Series

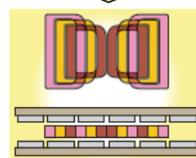

Arc type linear motor
ACR Series

Features

- Various types are available according to the application
- Achieves small to maximum thrust
- Two types are available: a low-speed type with series winding and a high-speed type with parallel winding.
- For coreless type, compactness is realized by coil mounting technology.
AUM, AWM and ALM series
- For the core type, the magnetic flux density is increased to increase the thrust.
AJM, AQM and AKM series
- Arc-shaped type realizes rotary drive
ACR series

Common products

Made by Aciris
By wrapping around
Compact coil

Direct Drive Rotary Motor

ADR Series / ACW Series

Achieves compact motor with original winding technology and cogging-less with original stator technology

ADR-A series

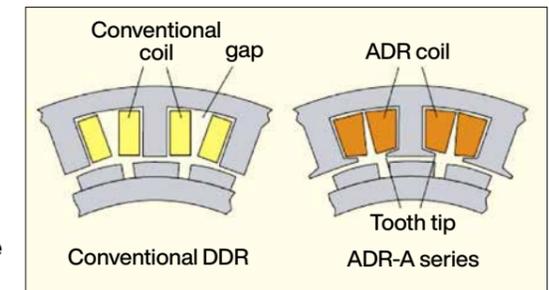

ACW series

ADR-F series

Features

- 5 types are available to suit your needs
ADR, AXD, ACW, ACD, AXM series
- Achieves extremely small to large torque
- Low speed type with series winding and parallel winding
Two types of high-speed type are available
- Compact and cogging-less type with core
ADR series and AXD series
- Achieves low-speed stable operation with the coreless type
ACW series and ACD series

Various stages

DGL Series / Gantry Stage

Various stages based on voice coils, linears, and direct drive motors are also available.

Linear motor with core, coreless linear motor

LMA, LMG, LMS, ILF+, ILM+

Linear motor with high propulsion

Features

1 Linear motor series with LMA core

High rated thrust

2 Linear motor series with LMG core

Compact and high instant maximum thrust

3 Linear motor series with LMS core

Compact and high continuous thrust

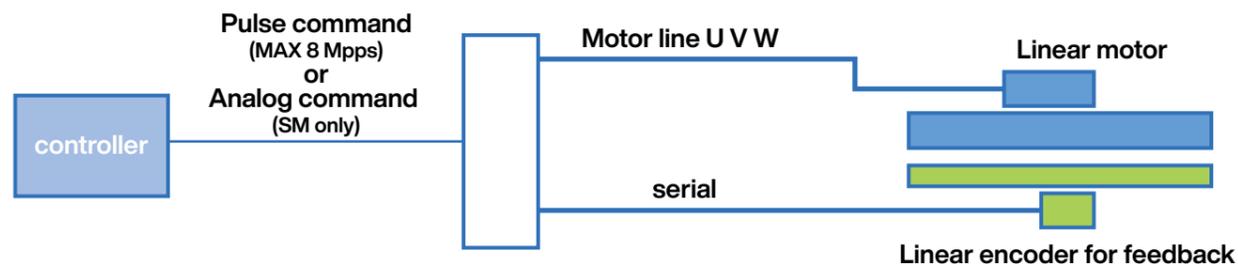

4 ILF + Coreless Linear Motor Series

Movable child with reduced weight

5 ILM + coreless linear motor series

Compact and high thrust

System Configuration

Others

● Widely used in machine tools, semiconductor manufacturing equipment, FPD manufacturing equipment, etc.

Built-in direct motor

TMB + series, TMK series

Built-in direct motor with maximum propulsion at high moments

Features

1 TMB + Built-in Direct Motor series

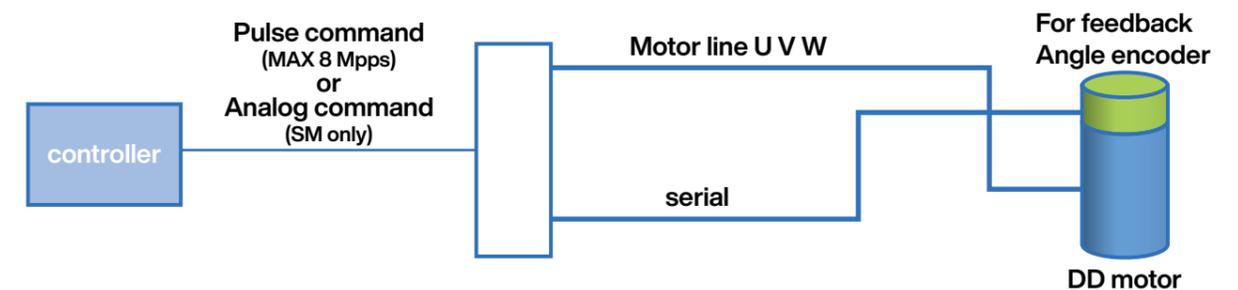

Supports up to 800 mm caliber
Instantaneous maximum torque up to 20800 N·m
Maximum rotation speed 5450 r/min
Water cooling available

2 TMK Built-in Direct Motor series

Supports diameters up to 1070 mm
Instantaneous maximum torque up to 42900 N·m
Maximum rotation speed 4590 r/min
Water cooling available

System Configuration

Others

● Widely used in machine tools, semiconductor manufacturing equipment, FPD manufacturing equipment, etc.

Linear motor with core

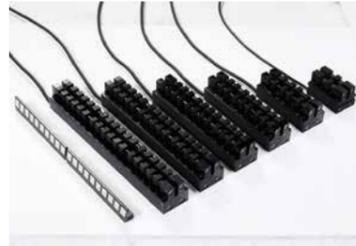

1SL type, 2L type, 3L type

Due to the existing double-sided structure and KOVERY's original core design
New concept Linear Motor development

KOVERY's Linear MOTOR

Vertical arrangement of permanent magnets > Magnetic attraction cancellation

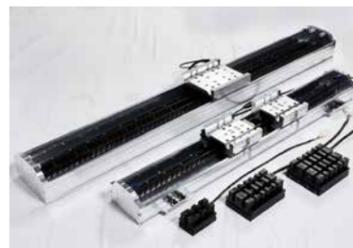

1SL-PP type

2L-PP type

3L-PP type

Linear robot

Features

1 Optimal for ultra-precision positioning linear drive with core

By canceling the magnetic attraction with the vertical arrangement of the permanent magnets, the burden on the support mechanism is reduced and nanometer-class ultra-precision positioning is possible.

2 Providing customers with easy-to-use linear motors

By canceling the magnetic attraction force, the deformation of the device due to the magnetic attraction force is small, the degree of freedom in structural design of the XY stage is high, and the assembly work and handling are easy and convenient.

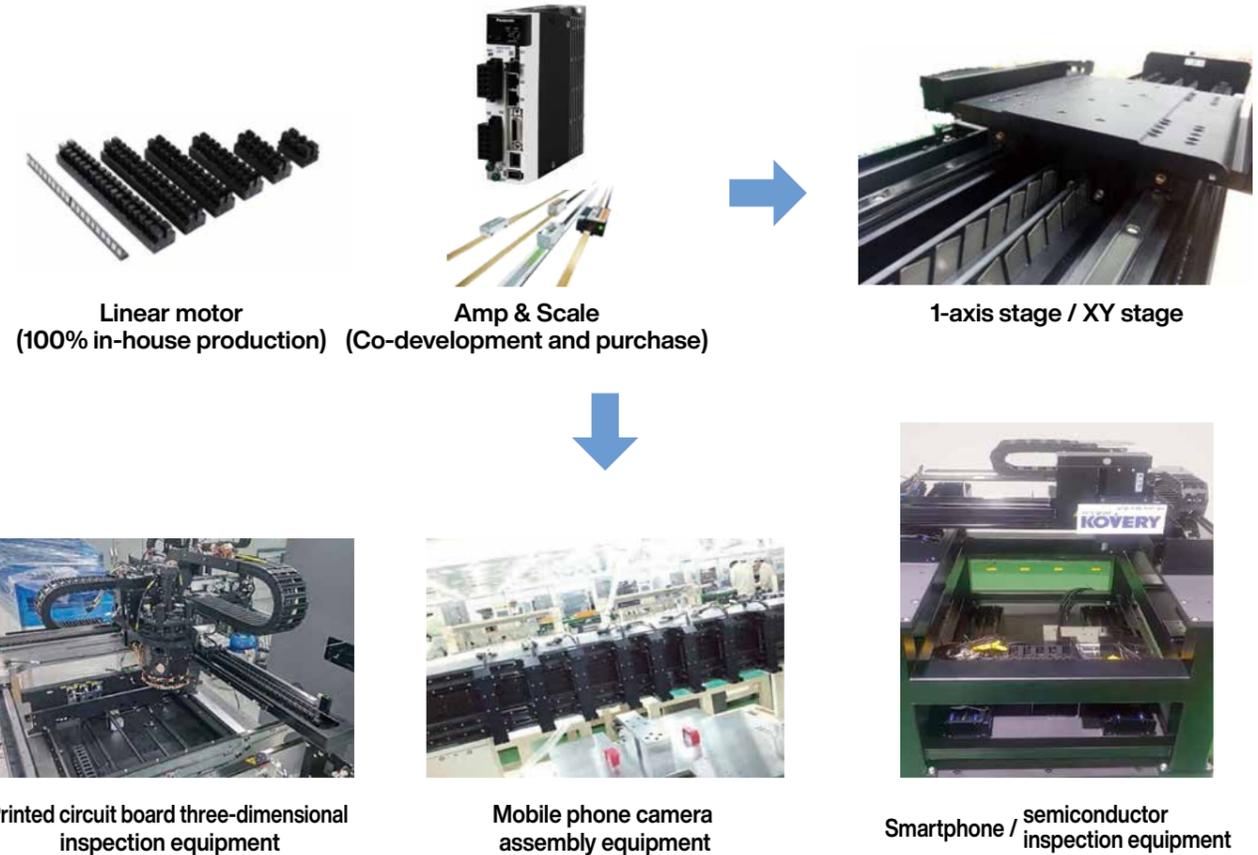

3 High degree of freedom in motor capacity selection

Our unique motor design combination supports from 30 N to 20000 N. Securing the number of world-class motor models (more than 50 models, custom models can be handled promptly)

4 Easy realization of ultra-high speed drive

By canceling the magnetic attraction force, the noise and vibration of the LM Guide is small, and ultra-high speed drive (5 m / sec, or more is possible) can be easily realized.

Application Sample

Others

- We can design and manufacture up to XY stages equipped with KOVERY motors.
- We can design and manufacture various linear servo system configurations.
- Promptly responds to required specifications not found in standard motor models

Tubular Linear Motor

Series P10-54

Principle

Features

- Controlled by standard third-party servo drives
- 230 VAC and 3x400 VAC Technology
- Forces up to 900 N
- Speed up to 11 m/s
- Stroke range up to 2'000 mm
- A/B incremental encoder 1 μm
- Extremely high dynamics
- Rotating push-pull TWIN connector for power and encoder cables
- One-piece clamping flange

Linear Shaft Motor / Linear Shaft Motor Stage

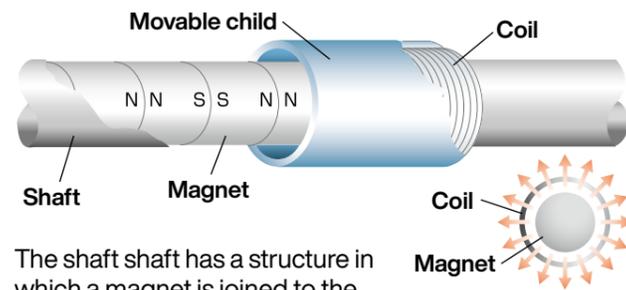

S series • L series / SLP series

Coreless technology with linear shaft motors

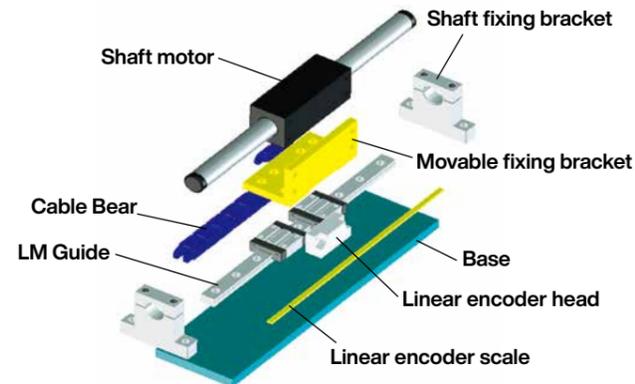

Construction

Operating principle

The shaft has a structure in which a magnet is joined to the north and south poles, and when a current flows through the coil, a magnetic field is generated and thrust is generated.

Specification configuration

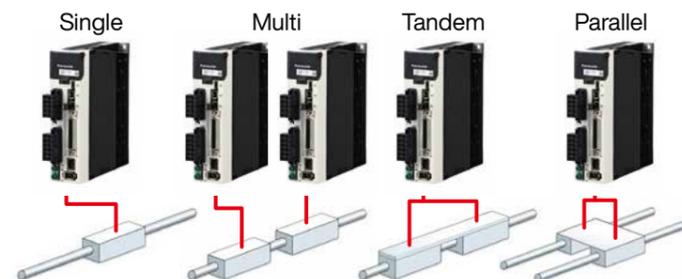

Features

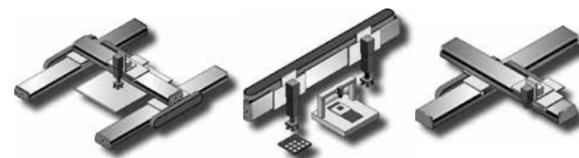

- Coreless Technology
- Zero Cogging
- High Force and High Precision
- Energy Efficient
- Simple Design and Easy Integration

Application Sample

S series • L series

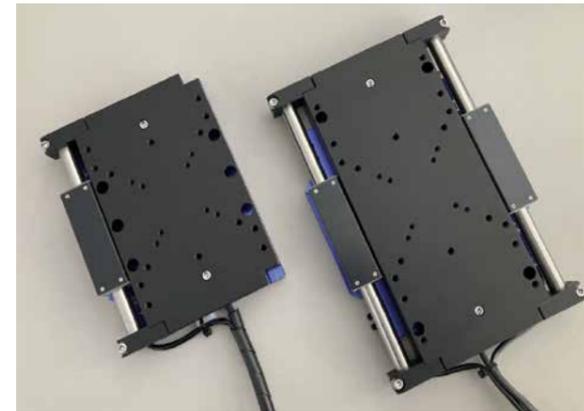

SLP series

Linear Shaft Motor Nano Positioning Stage

SPS series

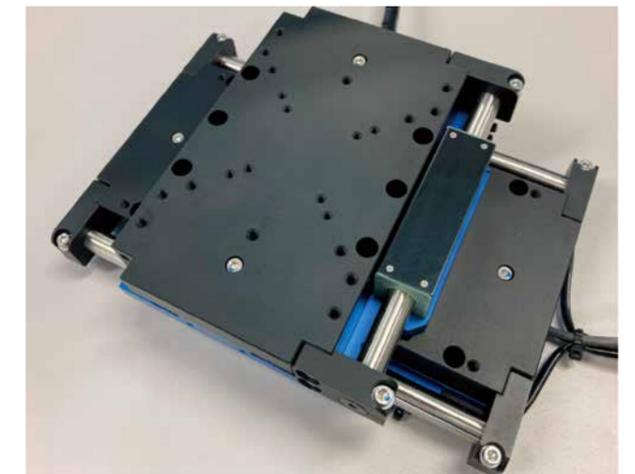

Features

- Uses ultra-low vibration, high-performance linear shaft motor
- High rigidity and high accuracy, using cross roller guide
- Zero cable resistance and high durability due to the moving shaft structure
- Thrust can be doubled by selecting the parallel option of the motor.
- Can be stacked and used as an XY stage
- Abundant encoder options (resolution 1 μm to 0.002 μm, AB phase incremental / absolute serial selection)
- 50 mm / 100 mm / 150 mm strokes are available

Application Sample

Used as an image processing inspection device, analysis equipment, micromachining machine, life science equipment such as precision laser processing cell analysis, optical equipment, replacement from ball screws and piezo XY stages

Sales area

Linear Motor Table

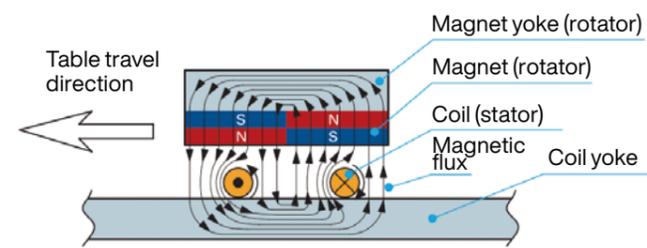

Nano Linear NT Series

Ultra-Compact, State-of-the-Art Linear Motor Table!

How It Works

Standard Type
NT...V

In the Nano Linear NT, the coil is subject to horizontal force due to magnetic flux constantly working vertically through the magnet and coil yoke, and rotational flux generated around the coil by the coil current (Fleming's left-hand rule). By switching the coil current direction relative to the magnetic flux direction, continuous thrust force in a single direction can be obtained, and linear motion of the rotator is maintained.

Features

1 Ultra-Low Profile

Since an IKO miniature linear motion rolling guide is used for the moving table guidance, the compact size of this part results in an ultra-low profile, unique to IKO.

2 Large Thrust Force

A high-performance neodymium magnet is used, providing high-speed and highly responsive positioning.

3 High Level of Cleanliness

By using a driving method without moving cables and minimal mechanical contact parts, less dust is generated which results in a high level of cleanliness.

4 Ultra-Compact Design

A relentless emphasis on compact design has resulted in sectional height of 14 mm for NT55V and 16 mm for NT80V.

5 Vertical Mounting

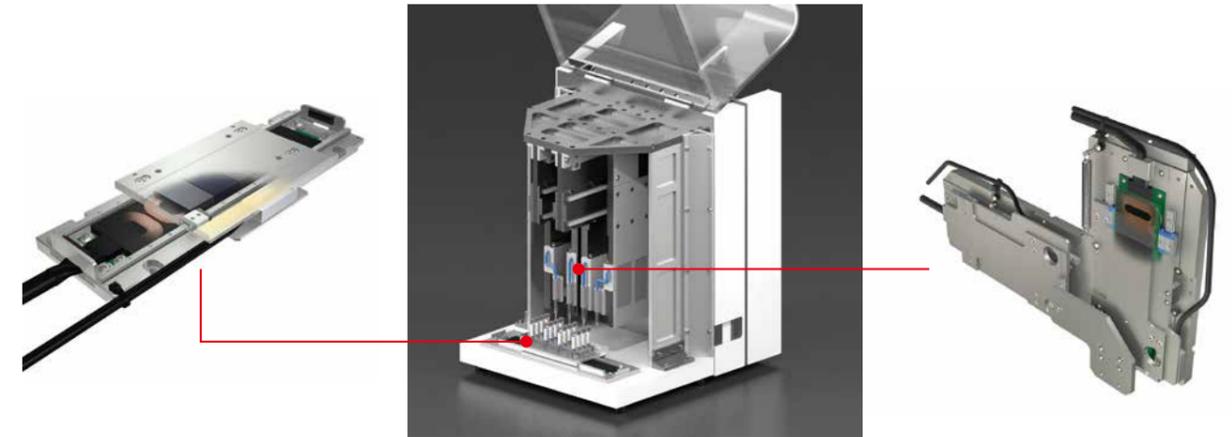

The integration of an individual spring system balance mechanism enables a vertical mounting structure with table fall prevention.

6 Compatible Amplifiers

Servo amplifier A6 family: MADL*****
(Contact IKO for combination details)

Example of Use (Medical Equipment: Reagent Application Machine)

- Products Used
- Standard Type NT...V
 - High Thrust Pick & Place Unit NT90XZH

Product Introduction

Standard Type
NT...V

Optimized component parts result in a Linear Motor Table which offers superb cost-performance while remaining ultra-compact.

High Accuracy Type
NT...H

With positioning accuracy and running straightness within 1 μm, smooth, high-accuracy operation is achieved at a level comparable to air static pressure bearings.

High Thrust Pick & Place Unit
NT90XZH

By using a link mechanism to drive the moving table, tact time is reduced with a balance of higher thrust force and lighter moving parts.

Coreless Linear Motor

Sodick V series

Internal cooling structure * Patented in JAPAN, USA, CHINA ↑

CA 144N-576N CAV3 220N-660N
CB SERIES 1200N-2133N
CG SERIES 3432N-4800N

Features

In linear motors that will be assembled at the internal of machine tools, the generated heat must not influence the machine. Sodick linear motors have special cooling structure internal. And, In servo motors that will be assembled at the side of machine tools, the generated heat influence the machine a little.

Ironcore Linear Motor

Sodick V series

↑ Internal cooling structure * Patented in JAPAN, USA, CHINA

CM SERIES 190N-1172N
CE (M) 800N-1600N CE (L) 1600N-6400N
CE (W) 4800N-7200N CE (W2) 6400N-9600N

Features

In linear motors that will be assembled at the internal of machine tools, the generated heat must not influence the machine. Sodick linear motors have special cooling structure internal. And, In servo motors that will be assembled at the side of machine tools, the generated heat influence the machine a little.

Special

Sodick performs the design of a special motor according to a customer's demand.

← Circular Arc Motors

DD motor and the circular arc motor of ironcore and coreless motors are designed by Sodick.

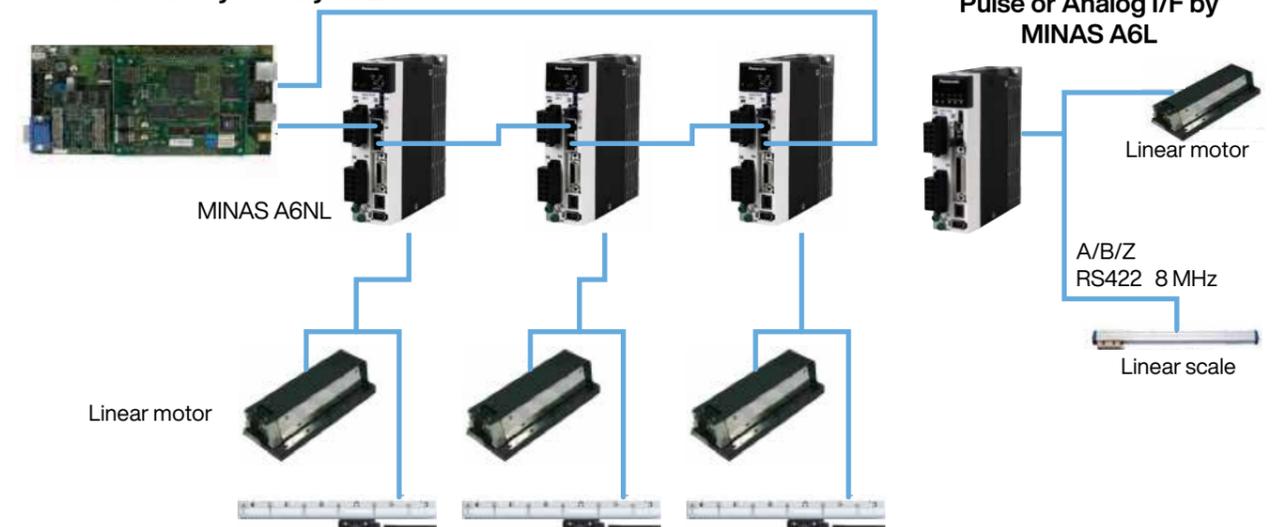

Ultra Vacuum Linear Motors →

The linear motor corresponding to the vacuum of Sodick is equipped with the system which can be efficiently cooled also in a vacuum.

Servo actuator

DD Motor (ZMD series)

Realizing outstanding high speed and precision performances thanks to its small and compact design

Features

1 Outer rotor mechanism

The outer diameter's compact design enables to drive directly the roller, making it suitable for indexing rotation

2 High-resistance bearings

Simple and rigid structure for a higher load resistance

3 Hollow diameter $\phi 50$ mm

Wiring and piping can be easily stored in the hollow space of the motor, reducing the installation space.

4 Low price

Model's size reduction leads to a more competitive price matching today's markets needs

5 Short lead time/ quick delivery

The reduction of the components and a smarter stock arrangement critically reduce the production lead time

What is a Direct Drive Motor?

A DD Motor can transmit the torque of the electric motor directly to the driving objects, without the use of any reductions such as belts, pulleys or reduction drives.

High efficiency

Low noise

Outstanding precision

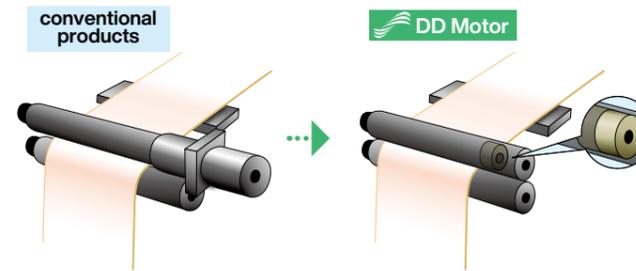

High reliability

Maintenance-free

Application Sample

The installation of the DD Motor enables more efficient operations and it doesn't require any maintenance

Roller-drive application e.g.

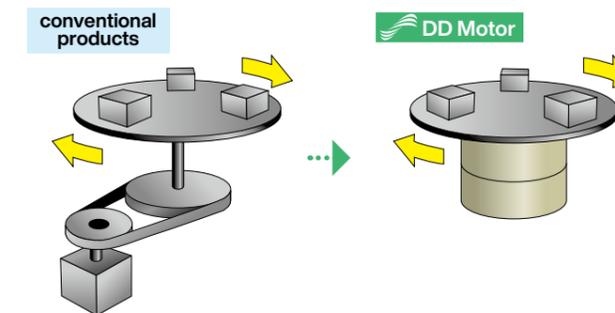

- Thanks to the outer motor, it's possible to build the motor inside the roller, saving space
- It works smoothly, avoiding uneven operations or movements

<Other possible applications>

- Printing equipment
- Coating machines
- Film-manufacturing machinery
- Roll-feeders

Indexing rotation application e.g.

- Space-saving design for a more compact structure
- As no reduction device is needed, it's possible to avoid complex installations, improving its efficiency and reliability with no back-lash

<Other possible applications>

- Semiconductor making equipment
- Devices for manufacturing
- liquid crystal display panels
- Assembling robots
- All kind of indexing applications

Ironcore and ironless linear motors

T- and U-Series

Ironcore T-Series

Ironless U-Series

Features

1 High force density

More force in a smaller packing means lowering footprint

2 Low thermal resistance

Allowing good heat transfer

3 Ironcore linear motors

Low cogging for smooth motion and position accuracy

Approved for CSA, CE, and RoHS

Optional watercooling for TL- and TBW-series

4 Ironless linear motors

High acceleration and dynamics

No cogging, extremely low force ripple

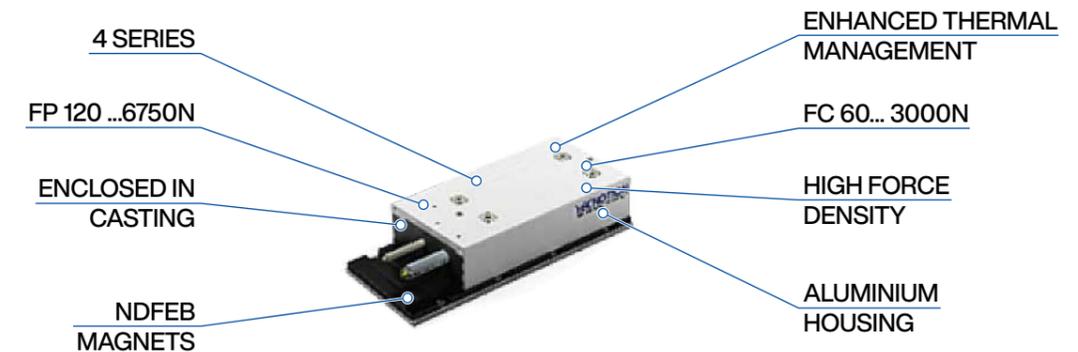

Approved for CE and RoHS

Also available as vacuum-rated motors

*1 There is the difference of resolution and maximum rate from the specification by original supplier as per the servo driver limitation of maximum pulse frequency. The maximum pulse frequency is 4 Gpps for A6 series. We show the value of A6 family on this table.

Feed back scale application example

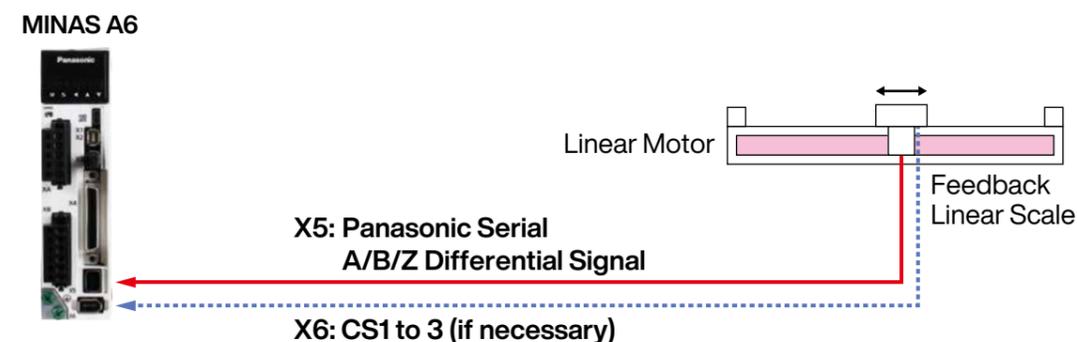

Full Closed Control Linear type

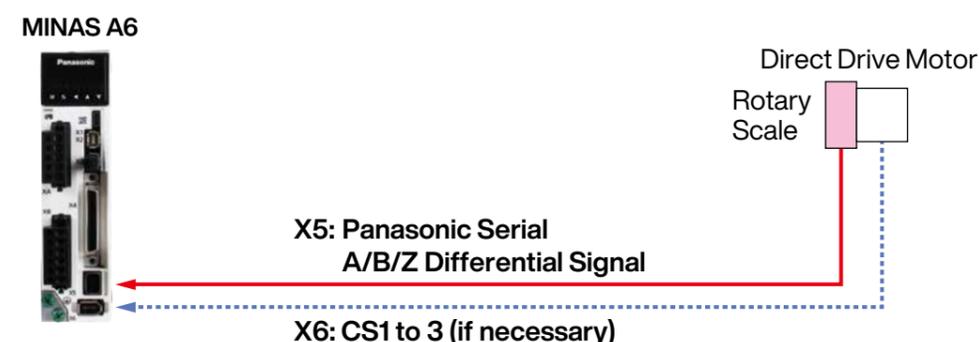

Full Closed Control Rotary type

Linear Motor Control Linear Type

DD Motor Control Rotary type

*2 Please contact us when you study the system with a scale because the driver and the scale combination has restriction as per the feedback system between full closed control system and linear system.

ENCLOSED ENCODERS

ENCLOSED LINEAR ENCODERS

NEW S3 / G3 / L3 SERIES

ABSOLUTE GLASS

S3BP - G3BP SERIES
(MINAS A6)

ABSOLUTE STEEL TAPE

L3BP SERIES
(MINAS A6)

Features

- The most robust optical encoder
- 3STATECH Technology
- Connectivity to MINAS series
- Vibration resistance of 30 G
- Longest absolute solution
- Linear Resolution up to 1 nm

ANGULAR ENCODERS

S2 / H2 SERIES

ABSOLUTE GLASS

S2 - H2 SERIES
(MINAS A6)

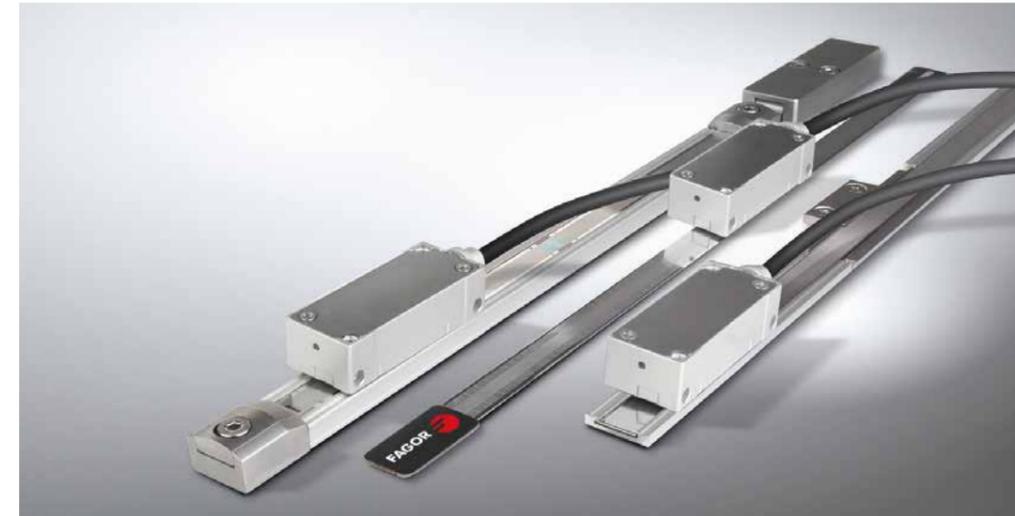

Features

- The most robust optical encoder
- 3STATECH Technology
- Connectivity to MINAS series
- Great accuracy at high speeds
- Angular Resolution up to 29 bits

EXPOSED LINEAR ENCODERS

L2 SERIES

ABSOLUTE TYPE/INCREMENTAL TYPE

EXA, EXG & EXT SERIES
(MINAS A6)

Features

- The most robust optical encoder
- Connectivity to MINAS series
- All mechanical type solutions
- Longest absolute solution

Absolute Exposed Linear Encoder / Absolute Linear Encoder with Scale Housing

LIC 419□P series · LIC 319□P series / LC 195P series · LC495P series

Features

1 High interpolation accuracy

Linear encoder with absolute and incremental tracks

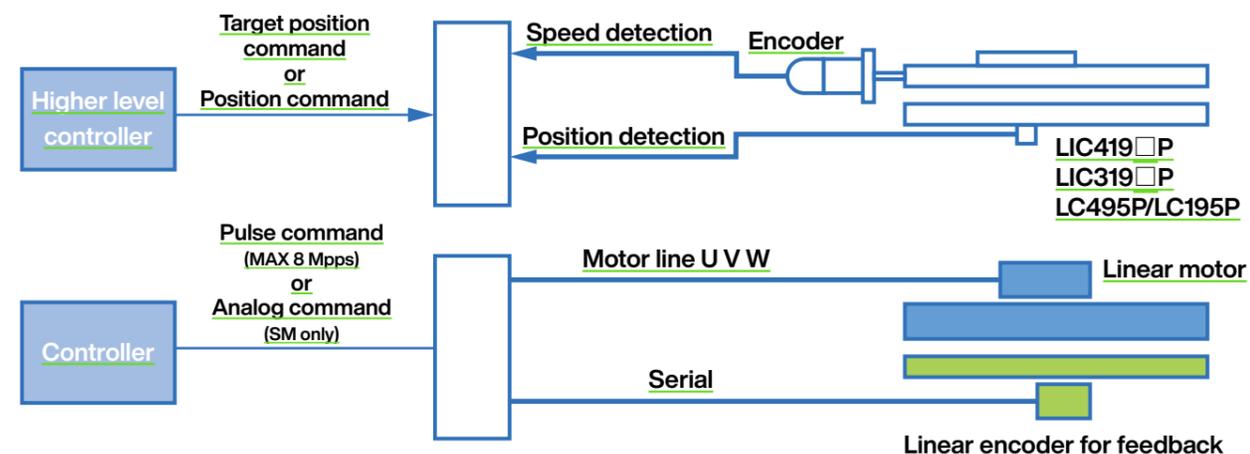

2 Fast scanning speed and high resolution

- Selectable resolution of 10 nm, 5 nm or 1 nm
Up to 10 m/sec possible LIC 419□P series
- 10 nm resolution
Up to 10 m/sec possible LIC 319□P series
- Selectable resolution of 1 nm or 10 nm
Up to 3 m/sec possible LC 195P series / LC495P series

3 Resistant to dirt and easy to install

- Mounting gap tolerance LIC4199P ± 0.25 mm LIC 419□P series
- Mounting gap tolerance LIC3199P ± 0.25 mm LIC 319□P series
- High reliability with double sealing lip
IP64 is possible by injecting clean compressed air LC 195P series / LC495P series

System Configuration

Absolute Angle Encoder without Integral Bearing / Absolute Linear Encoder with Scale Housing

ECA series / RCN series

Features

1 High absolute accuracy

- Angle encoder that guarantees up to ± 1.5 seconds (depending on the encoder diameter)..... ECA series
- Angle encoder that guarantees up to ± 1 second..... RCN series

2 Large hollow diameter

- Supports hollow diameters up to 512 mm ECA series
- Supports hollow diameters up to 100 mm RCN series

3 Dirt resistant design

IP64 is possible RCN series

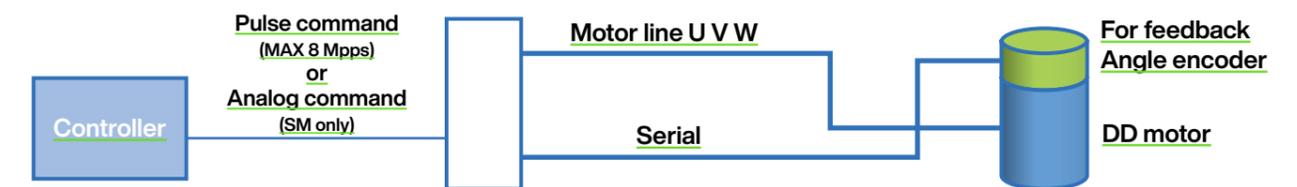

4 Built-in stator coupling

..... RCN series

5 Easy mounting

Centering with 3 points (centering) ECA series

Feedback Scale

SR70, SR80 series / SL700 series / SmartSCALE / BF1 series

Slim type / Magnetic detection system
Absolute scale

SR77 series
(A6 family)

Slim type / Magnetic detection system
Incremental scale

SR75 series
(A6 family)

Robust type / Magnetic detection system
Absolute scale

SR87 series
(A6 family)

Robust type / Magnetic detection system
Incremental scale

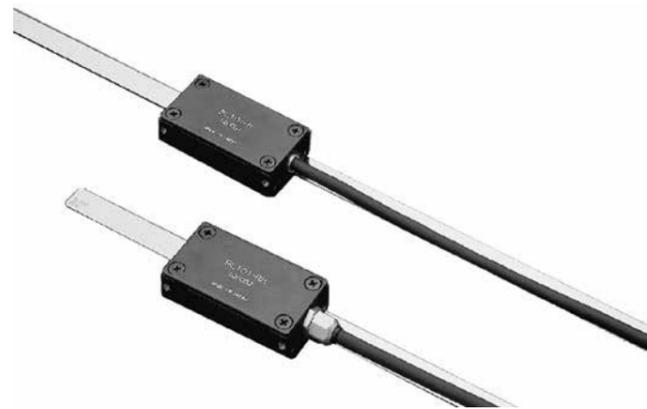

SR85 series
(A6 family)

Features

- Magnetic detection system with excellent resistance to dust, oil and water
- Magnetic absolute scales (SR77/SR87) up to 10 nm resolution with 200 m/min response speed
- Slim type allows installation in narrow space (SR77/SR75)
- High rigidity provide resistance to shock and vibration (SR87/85 series)

Separate type / Magnetic detection system
Incremental scale Digiruler

SL700 + PL101RP/RHP
SL710 + PL101RP/RHP
SL720 + PL101RP/RHP (Special model)
(A6 family)

Features

- High speed response with serial interface for MINAS series
- High speed response (10 m/s) and high resolution (0.1 μm)
- Magnetic digital scale technology produces real-time measurement data
- Magnetic detection system with excellent resistance to dust, oil and water (Maintenance free, IP67 grade model available)
- Wide variety of measurement length available from 50 mm to 100000 mm

Separate type / Magnetic detection system
Incremental scale

SQ10 + PQ11
SQ10 + PQ10 + MQ10
(A6 family)

Features

- Maximum response speed 3 m/s, Maximum resolution 0.05 μm, and 5 μm accuracy
- Individual non-contact component design
- Space-saving small head (W 33 mm × D 16 mm × H 8 mm)
- Signal LED display for ease of installation

High-resolution reflective type
Laserscale

BF1 series
(A6 family)

Features

- High-resolution reflective Laserscale with signal wavelength of 250 nm
- Easy to check signal with LED
- Increase mounting tolerance enable easy installation. (Pitching/Rollin/Yawing : ±20 min)

Linear Scale

ABS AT500 series / ST700 series / ST1300 series

ABS AT500 series

High Rigid SC type

High Resolution H type

ST700 series/ ST1300 series

ABS ST700 series
Electromagnetic induction type

ABS ST1300 series
Photoelectric type

Features

- Many years of experience that has opened up the absolute system solution in the world with collaboration of MINAS series originally.
- By changing from the Incremental scale system to the absolute scale, machine homing becomes unnecessary for AT500 and ST700 series.
- Absolute use, Photoelectric, Electromagnetic detection method, High resolution, High accuracy, non-contact type and so on support various applications widely.

Application Sample

ABS AT500 series

- Machining Center
- Lathe Machine
- Grinding Machine

ST700 series/ ST1300 series

- Semiconductor machine
- LCD manufacturing machine

Rotary Scale

MPZA series MPRZ series

Absolute open type Rotary scale

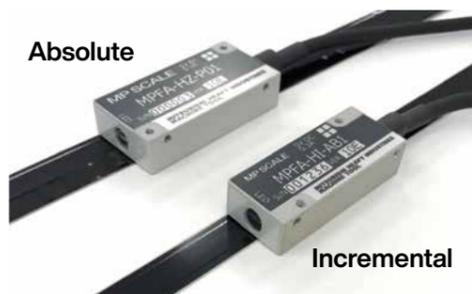

Features

- 1 Can be used without worrying about the usage environment**
Since it is an electromagnetically coupled scale, even if dust, oil, condensation, etc. adhere to the scale, it will not interfere with position detection. No dust cover is required. Also, there is no need to worry about deterioration over time.
- 2 High resolution and accuracy**
Both the MPZA series and MPRZ series have a resolution of 0.043×10^{-3} degrees and an accuracy of 2 seconds (MPRZ-18072A).
- 3 Excellent responsiveness**
It can respond even at high speed rotation of 10000 rpm. (MPRZ-18072A only, 5000 rpm)
- 4 High repeatability**
Since it is read by the detection pattern on the entire circumference instead of reading by the detection head, the error due to misalignment can be canceled and high repeatability can be obtained.

Linear scale

MPFA series

Open tape type low price scale

The scale is 0.4 mm thick (Including double-sided tape)

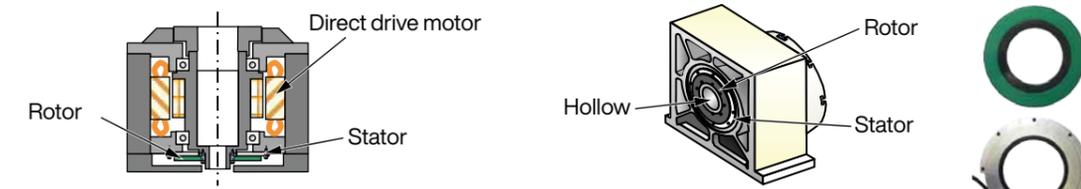

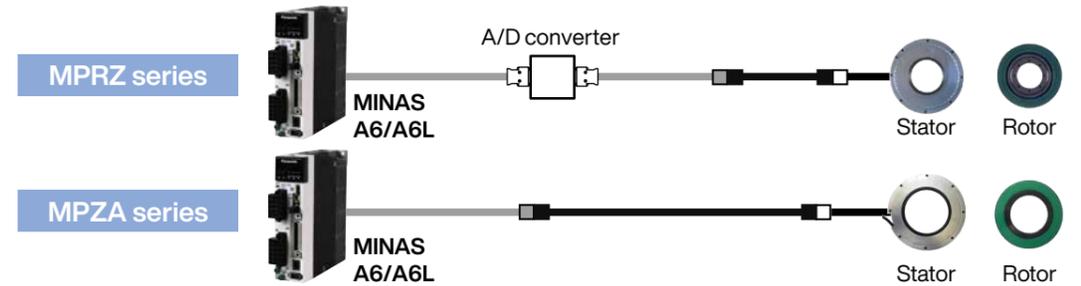

The scale can be cut to any length and used

Features

- 1 Can be used without worrying about the usage environment**
Since it is an electromagnetically coupled scale, even if dust, oil, condensation, etc. adhere to the scale, it will not interfere with position detection. No dust cover is required. Also, there is no need to worry about deterioration over time.
- 2 Scale can be cut to any length**
Both absolute and incremental scales are tape type with a thickness of 0.4 mm. The scale can be cut and used at any position.
- 3 The scale is easy to install with double-sided tape**
The scale can be easily attached with the included double-sided tape. If you attach the scale to an iron plate etc., it can be attached and detached with bolts.
- 4 Supports adjustment and operation check when mounting the head**
Software: MP-View can be used to easily adjust the head mounting and check the operation.

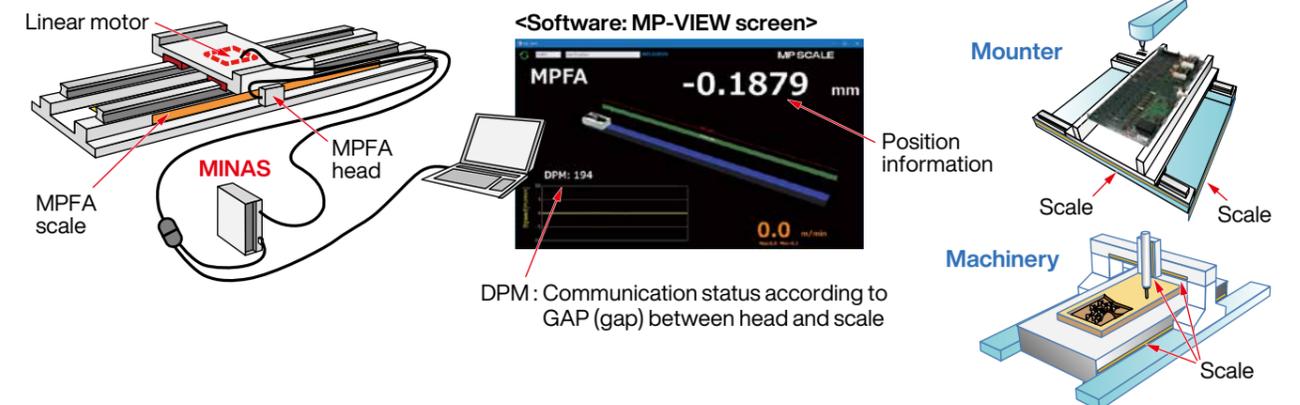

System Configuration

Rotary Scale

Attach the stator to the fixed part and the rotor to the rotating part.

Optical linear scale

RESOLUTE™ series, EVOLUTE™ series, FORTiS series

Optical open absolute linear scale

RESOLUTE™ series

RESOLUTE™
RELA, RSLA

RESOLUTE™
RTLA30-S

Optical open ring scale

RESOLUTE™ series

Vacuum compatible lead head and
RESA ring

Atmospheric lead head and
REXA ring

RESOLUTE™
FASTRACK/ RTLA30

RESOLUTE™
RKLA30-S

Features

- The industry's first unique signal-track scale
- Determines absolute position upon power-up
- Range of scales for a variety of applications
- Low SDE for smooth velocity control
- Worldwide subsidiary support network

Features

- Large-diameter hollow ring scale allows angle measurement even in systems that require cable wiring, etc.
- High-precision type RESA ring scale and ultra-high-precision * type REXA ring scale are available. * When using 2 heads
- The RESA ring scale can be easily and accurately mounted by fixing the patented taper.
- The REXA ring scale achieves ultra-high accuracy by suppressing deformation of the ring with a ring that is difficult to deform and suppressing eccentricity with two lead heads.
- Supports ultra-high vacuum applications by using a vacuum-compatible lead head

Optical open absolute linear scale

EVOLUTE™ series

EVOLUTE™ FASTRACK/RTLA50
EVOLUTE™ RTLA50-S

Features

- Based on RESOLUTE™ technology, which has already been proven in many industries
- Mounting height tolerance is 500 µm, which is 2.5 times that of general optical encoders.
- Wide tolerance allows for short installation time and improved resistance to dirt.
- RTLA50 scale with two fixing methods (gluing / track) can be used

Optical closed linear scale

FORTiS series

Features

- FORTiS is made for use in harsh environments such as machine tools, and two scales with different shapes are available.
- No need to change the design to replace from the most used competing manufacturer in machine tools
- Excellent sealing performance can significantly reduce the flow rate of blow air, making it possible to build a high-performance sustainable system.
- Since the inside of the main body is a non-contact structure, it is possible to acquire accurate position information, and since there are no mechanical parts inside, easy installation is realized.
- Has class-leading 30 G vibration resistance and can be incorporated into applications such as heavy cutting.
- Improved reliability by adopting the same optical system as RESOLUTE and EVOLUTE, which have high resistance to grain stains and grease stains.

Language

Absolute Exposed Linear encoder

MC 15P series

MC 15P MP :

Steel scale tape is drawn into the aluminum extrusions and fixed at center

MC 15P MK :

Steel scale tape cemented on mounting surface

Features

1 Maximum measurement length

Optical absolute linear encoder that can handle up to 6 m

2 Small and lightweight design

Scanning head size 36 mm x 13.5 mm x 14.8 mm head mass 18 g or less * (* cable not included)

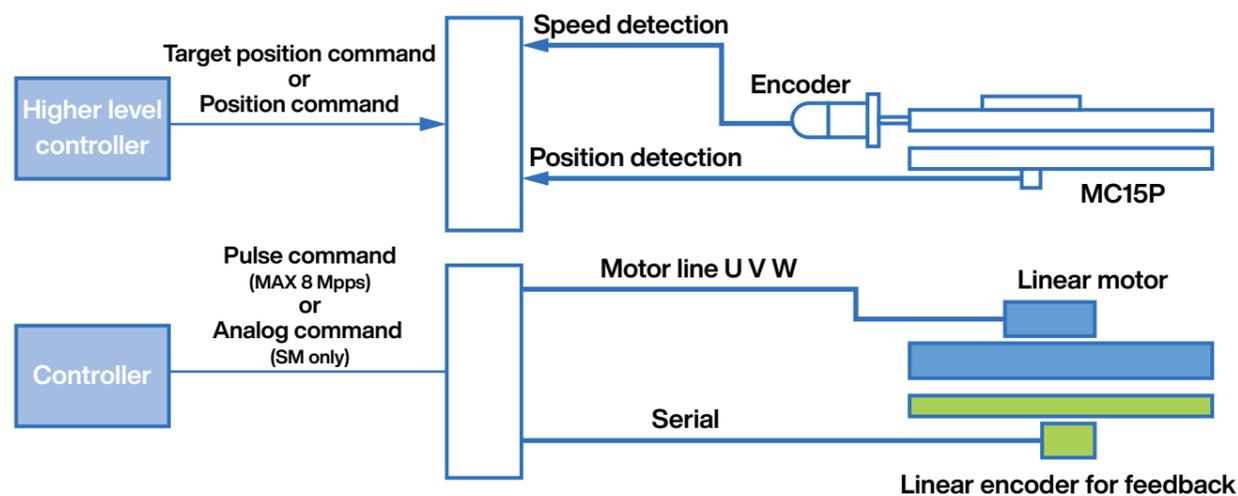

3 High speed and high resolution

Supports up to 10 m / sec with 50 nm resolution

4 Easy to mount

Mounting gap tolerance ± 0.25 mm

System Configuration

Others

- Type to insert the scale into the holder (MP) and type to paste it directly (MK)
- Widely used in high-speed, high-precision semiconductor manufacturing equipment and FPD manufacturing equipment, secondary battery manufacturing equipment

Absolute Angle Encoder without Integral Bearing

MCR15P series

High positioning accuracy, high interpolation accuracy, absolute angle encoder

MCR 15P

Features

1 High absolute accuracy

Angle encoder that guarantees up to ± 10 seconds (Depending on the diameter of the encoder)

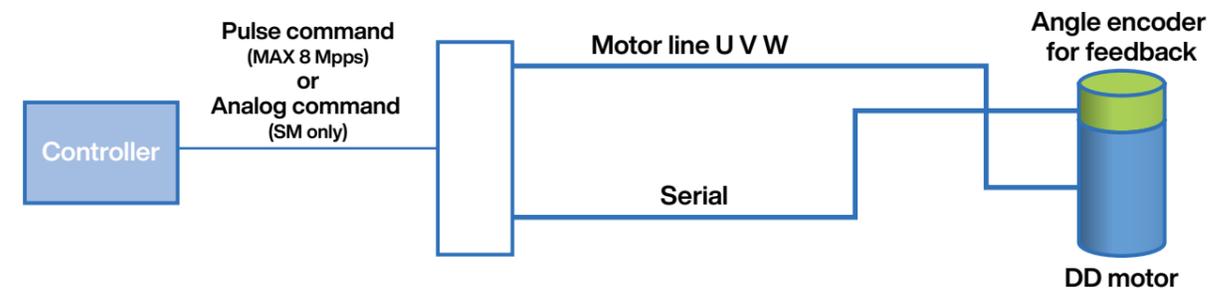

2 Large hollow diameter

Supports hollow diameters up to 330 mm

3 Easy mounting

Centering with 3 points (centering)

System Configuration

Others

- Machine tools (head shafts, tool shafts) Glass processing machines Widely used in case processing machines such as smartphones

Magnetsensor

MSK200/1

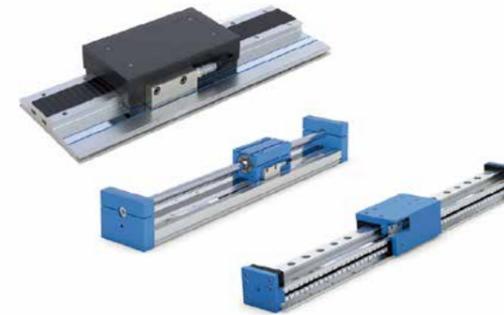

Features

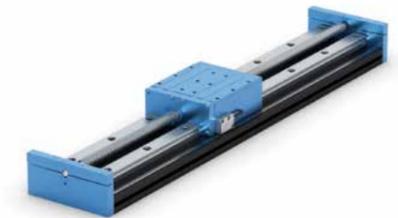

- Small, compact designs
- Wear-free and maintenance-free
- Insensitive to dirt, humidity and condensation
- Provides personalized options for the customer
- High repeat accuracy and high resolution of Measurement for high-speed position feedback

Application Sample

Application Sample

Linearmotors

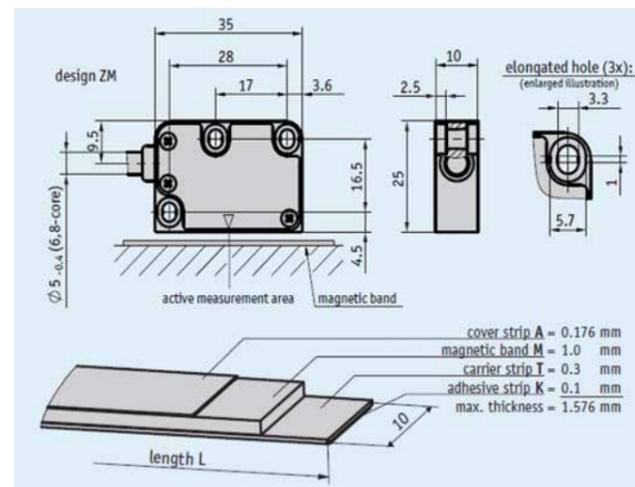

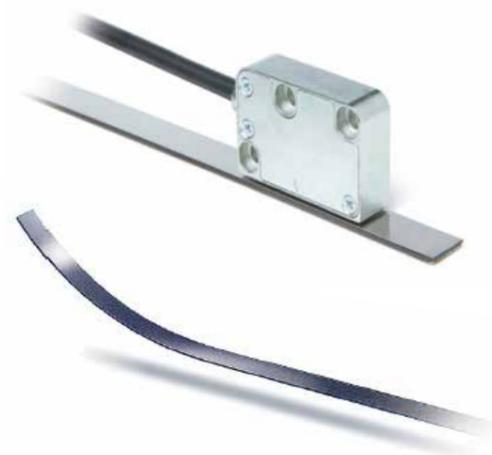

Position feedback of screw drive system

Gantry Axes

Torque motors

The incremental linear encoder of a magnetic type

SENSOR / PSLH Series, SCALE / PSLG Series

This encoder has achieved an excellent total performance.

Features

- 1** It is high-speed serial communications corresponding to the MINAS series.
- 2** This encoder is strong in the environment of the magnetic noise, oil, and dust.
- 3** A miniaturization and an excellent cost performance are achieved by the internal manufacturing of the MR element.
- 4** Accuracy is improved by an original magnetization pattern. It is a tough encoder structure in the extrinsic noise.

Sales area

Japan Worldwide response

Precision Positioning Stage

PG Series / KX Series / KXS Series.

● **PG Series**

Item	Description	
Travel length	13 / 15 / 30 / 50 mm	
Table size	40 × 40 mm ~ 70 × 110 mm	
Ball screw	Shaft diameter	φ6 mm
	Lead	1 mm
Main materials	Stainless	
Finishing	Electroless nickel plating	
Resolution (Pulse)	23 bit encoder (8388608 P/R)	
Accuracy	Uni-directional positioning accuracy	6 μm/13 mm ~ 12 μm/50 mm
	Repeatability	±0.5 μm
	Max Speed	50 mm/sec
	Load capacity	10 kgf (98 N)

(Note) Accuracy specifications are for reference only.

● **KXL Series**

Item	Description	
Travel length	30/50/75/100/150/200/300 mm	
Table size	60 × 60 mm	
Ball screw	Shaft diameter	φ6 mm
	Lead	1 mm (TL: 30 mm ~ 75 mm) / 2 mm (TL: 30 mm ~ 300 mm)
Main materials	Stainless	
Finishing	Electroless nickel plating	
Resolution (Pulse)	23 bit encoder (8388608 P/R)	
Cover	Covered / Uncovered	
Accuracy	Uni-directional positioning accuracy	5 μm/30 mm ~ 25 μm/300 mm
	Repeatability	±0.5 μm
	Max Speed	50 mm/sec / 100 mm/sec
	Load capacity	12 kgf (117.6 N)

(Note) Accuracy specifications are for reference only.

● **KXS Series**

Item	Description	
Travel length	100/200/300/400/500 mm	
Table size	180 × 180 mm	
Ball screw	Shaft diameter	φ 15 mm
	Lead	5 mm / 10 mm
Main materials	Aluminum	
Finishing	Anodic oxide coating	
Resolution (Pulse)	23 bit encoder (8388608 P/R)	
Cover	Covered / Uncovered	
Accuracy	Uni-directional positioning accuracy	5 μm/100 mm ~ 40 μm/500 mm
	Repeatability	±1 μm
	Max Speed	200 mm/sec / 400 mm/sec
	Load capacity	30 kgf (294 N)

(Note) Accuracy specifications are for reference only.

【Applicable drive / motor type】 A6 family Drive : M*DL**** Motor : M*MF***L***

*1 Set the torque limit of the servo amplifier so that the torques does not exceed the momentary maximum torque of the compact actuator.
*2 Value calculated from the rated torque of the motor where the ambient temperature is 20 °C.
When the ambient temperature is 40 °C, the torque will be 75 % of the rated torque.

*1 : Repeated positioning accuracy with one swing

*2 : The maximum speed may not be reached depending on the short travel distance or operating conditions.

*3 : The rated thrust and maximum payload are values assuming that the installed motor outputs the rated torque.

*4 : When using in a clean environment, attach a suction air-joint. The cleanliness is the degree of cleanliness when used at 1000 mm / sec or less.

*5 : The required suction amount varies depending on the usage conditions and environment.

AC Servo Actuator / AC Servo Motor

SHA-P Series, FHA-Cmini Series / PMA Series

AC servo actuator docked with Harmonic Drive®, a speed reducer for precision control, and an AC servo motor

Features

1 SHA-SG Both compact shape and high output torque

The built-in Harmonic Drive® realizes high output torque in spite of its compact shape. You can choose the most suitable model from a wide variety of model numbers and reduction ratios.

2 SHA-CG Guarantees high output shaft runout accuracy and rotation accuracy

Although it has a built-in speed reducer, it guarantees high rotation accuracy and output shaft surface runout accuracy, and is equipped with a hollow shaft. It has achieved a torque volume ratio that is more than five times that of direct drive motors for the same application.

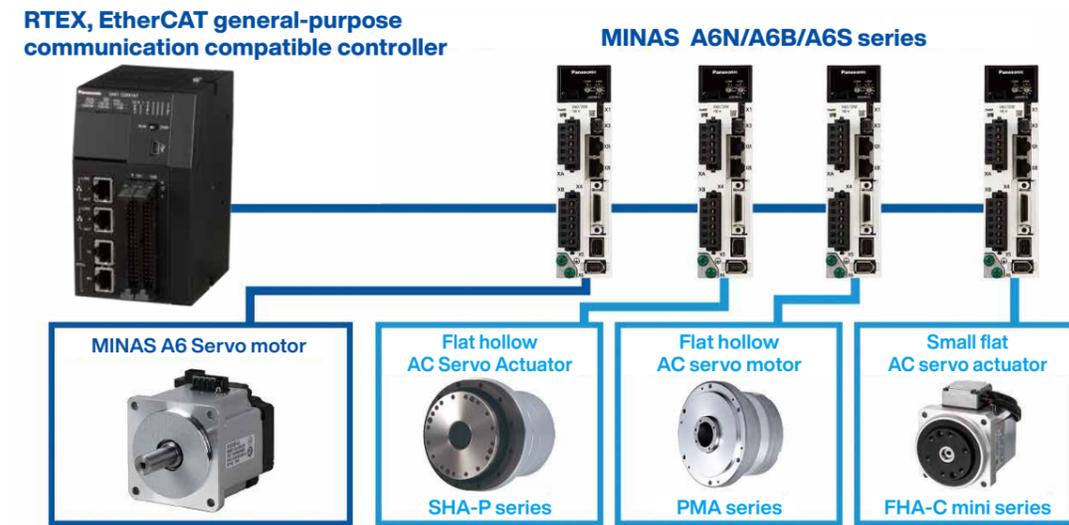

3 FHA-Cmini Small and flat shape like no other

The maximum torque can be selected from 4.8 Nm, 11 Nm, and 28 Nm in 3 sizes of □ 50 mm, □ 60 mm, and □ 75 mm. By combining Harmonic Drive®, servo motor, and cross roller bearing, it can be used for small but high-end equipment.

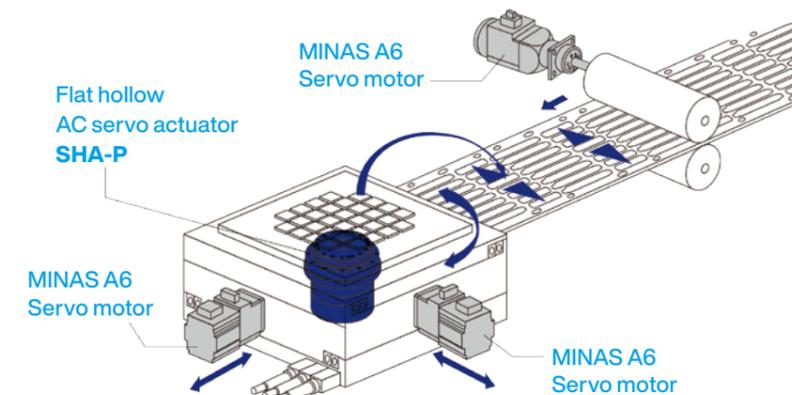

4 Hollow hole structure that allows layout of PMA wiring and piping

This is our standard lineup of AC servo motors with a hollow hole structure for the motor shaft. You can lay out wiring and piping in the center of rotation without offsetting the motor.

Compact Actuator AF series

AF017N/042N/080N/125N/380N/500N/050C/120C/200C/320C

Solid type
AF-N

Hollow shaft type
AF-C

Features

1 High precision, stiffness, quality

Integrating Panasonic servo motors with large industrial robot market share Precision Reduction Gear RV

2 Compact

Compact drive unit is made possible by machining gear directly onto motor shaft

3 High versatility

Compatible with the MINAS-A6 family of standard servo drivers

Merit 1
Compact design

Before
The total length is extended due to the input gear and coupling.

After
The machining of gears onto the motor shaft results in a very compact design; **up to 23% shorter than conventional models.**

With the AF series...

Merit 2
Greater reliability

Before
Machining is very difficult, resulting in axial runout, poor concentricity accuracy, and producing abnormal noise.

After
Shipped after machining and assembly, **no need to worry about abnormal noise.**

With the AF series...

Merit 3
Greater quality

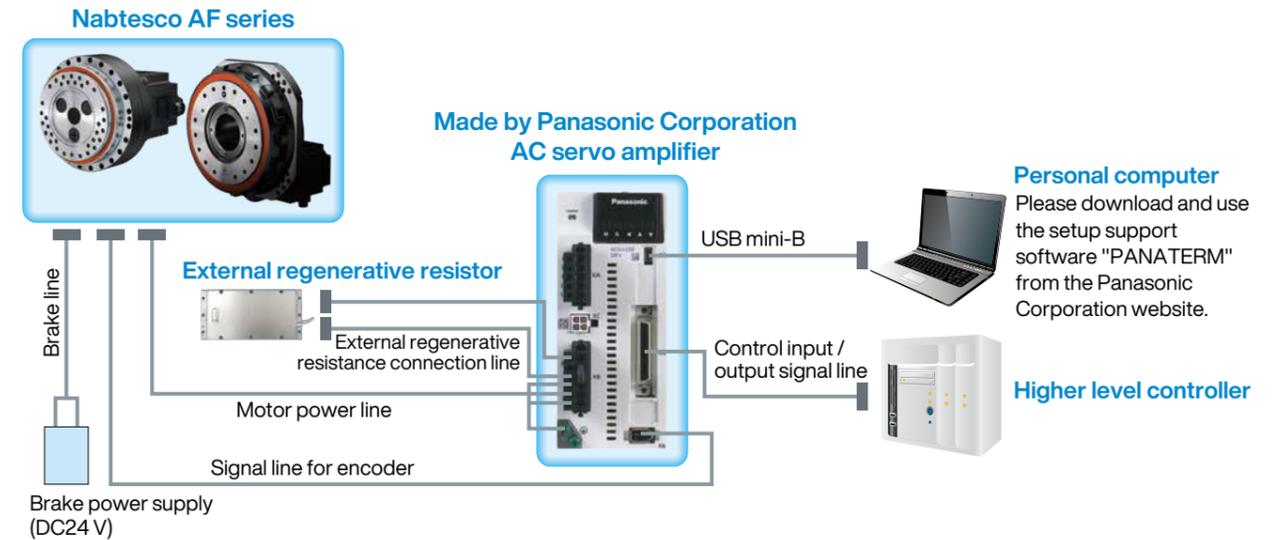

Before
O-ring or liquid sealant
Oil seal
O-ring
Greasing can be troublesome, If seals are forgotten, grease can leak

After
Already contains grease; **no need to worry about leaking.**

With the AF series...

Precision Positioning Stage

PG Series / KX Series / KXS Series.

PG Series

Compact

High Rigidity

KXL Series

Broad Selection

High Rigidity

KXS Series

Long stroke

High load capacity

【Applicable drive / motor type】

A6 family

Drive : M*DL*****

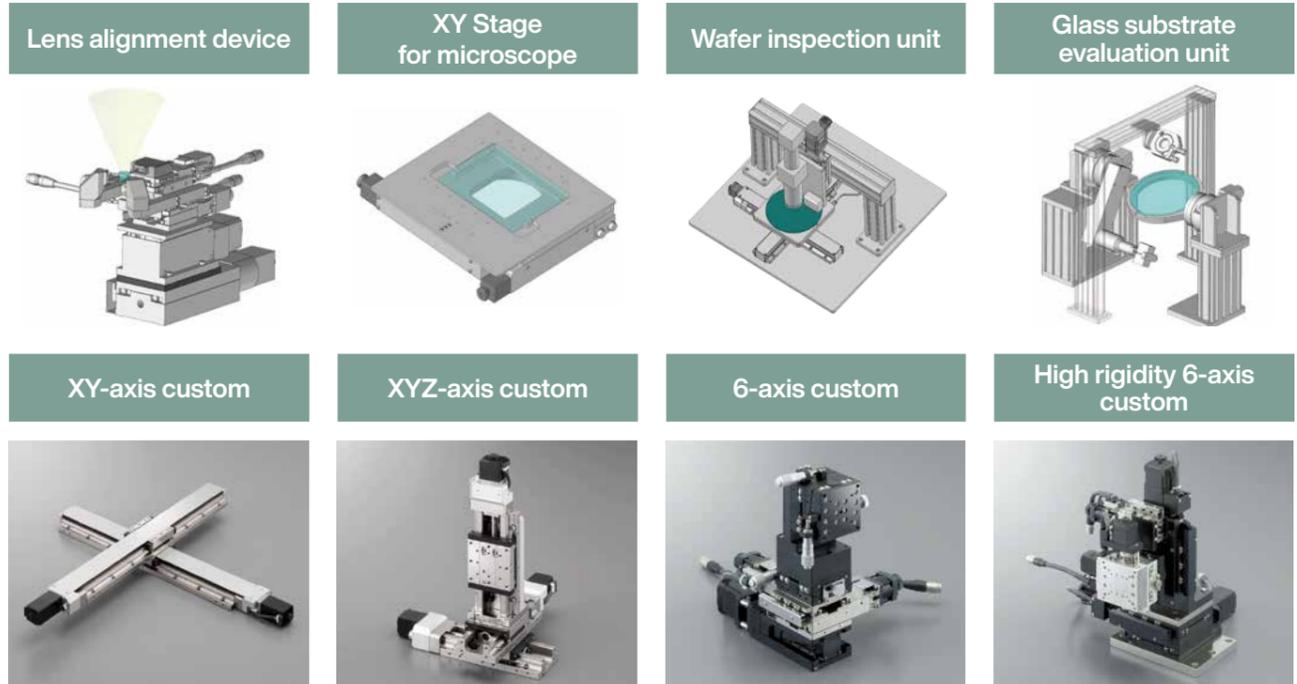

Motor : M*MF*****L***

Please contact the following address for the details of the combination.

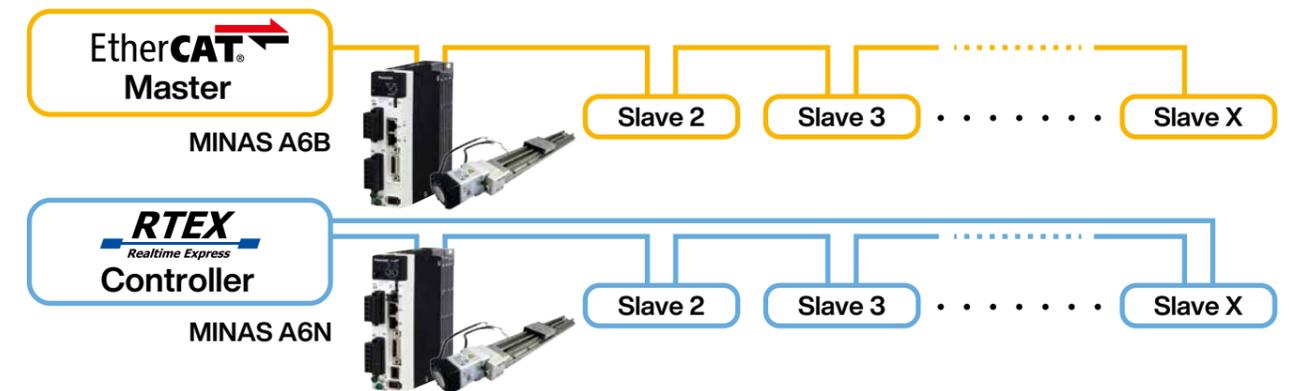

Features

- 1 Combine MINAS A6 family (EtherCAT/RTEX supported) with Precision Positioning Stages.
- 2 Ideal for automation process which requires high precision.
- 3 Compact, high rigidity, broad range of travel length selection, weight multiplication accuracy $\pm 0.5 \mu\text{m}$.
- 4 Supporting long travel length (up to 500 mm) and high load capacity.

Application Sample

In addition to standard catalog products, we provide custom made stage products according to your requirement. Please feel free to contact us for details.

Motorless single axis actuator Robonity series

Basic model "LBAS" Advanced model "LGXS"

Features

1 Abundant variations Find the perfect specifications right away

With a wide variety of lead lengths and strokes, you can choose the model of the size and specifications you want.

2 Long stroke Can also be used for long-distance transportation

The stroke can be selected from 50 mm to 1450 mm. It is also ideal for long-distance transportation.

3 Easy to select Immediately understand tact and life

You can calculate the cycle time, guide and ball screw life on the website.

LBAS | Basic model

High rigidity

Compact

Low cost

● Easy change of motor mounting direction

The motor mounting direction can be easily changed with dedicated parts.

Standard specifications

Motor bending specifications

Standard

Left mounting

Right mounting

Bottom mounting

● Reduction of installation man-hours

1. The main body can be installed from the top and bottom without removing the exterior parts.
2. There is a reference surface on the side of the main body and a knock hole on the bottom for easy installation.

● Easy maintenance

Grease nipples on the side of the slider can be used to lubricate drive parts.

LGXS | Advanced model

High accuracy
accuracy grade C5

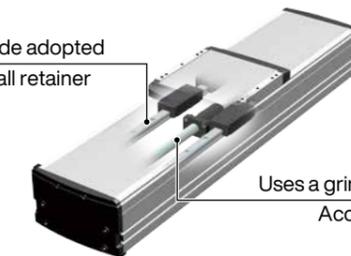

High durability

Clean specification
standard support

● High precision

- Uses a grinding ball screw
- Ball screw accuracy: Accuracy grade C5
- Repeated positioning accuracy: $\pm 5 \mu\text{m}$

LM guide adopted
With ball retainer

Uses a grinding ball screw
Accuracy grade C5

● Clean specifications standard support

Since a dustproof stainless steel sheet is used on the upper surface of the main body, it can be used in a clean environment simply by attaching a piping joint and sucking.
