

## Starter Kit FP-I4C

### Industry 4.0 connector FP-I4C

- › for everything in IoT that requires remote operation, assistance and alarms. The FP-I4C gives you full insight into all IoT devices with real-time status alerts and early warnings.
- › 2 Ethernet ports to operate in different networks or as switch
- › RS232 and a second isolated RS232/RS485 interface
- › 2 USB ports for communication and for USB memory sticks
- › Maintenance free Real Time Clock
- › 2.4GB internal memory for user data

### “CORVINA” Remote maintenance & Monitoring Solution

- › is a safe, Open VPN and SSL-based solution that allows remote administration of industrial plants and equipment. Corvina serves as a platform which makes it easy for you to administer your IIoT business

## Special starter kit for your Industry 4.0 project

The starter kit contains an FP-I4C, the Corvina license and the corresponding PLC

### Starter-Kit, FP-I4CF0H

#### FP-I4C + Corvina + FPOH

- › 2 Ethernet ports as a hub
- › Ethernet/IP
- › High processing speed of 10ns per basic instruction
- › 16 inputs / 10 outputs (transistor)

### Starter-Kit, FP-I4CF0R

#### FP-I4C + Corvina + FPOR

- › Max. 64 inputs / 64 outputs (transistor) or 54 output relay
- › Max. 24 analog inputs / 12 analog outputs
- › Program memory: 16k to 32k steps

The FP-I4C is the connector to cloud solutions and databases.

- › OPC-UA as client and server
- › Supports OpenVPN/Cloud service/MQTT
- › Connectivity to SQL databases
- › Cloud service connection for maintenance
- › WYSIWYG editor for web pages
- › Retrofit: Existing systems to I4.0
