NEW
Thru-beam Type
Digital Displacement Sensor

CMOS Type

HG-T SERIES

CE
(Excluding SC-HG1-USB)

FDA

The Industry's Highest-Class*
Measurement Accuracy Is
Now Yours.

* Among thru-beam type digital sensors, as of January 2019 in-company survey

Ultra-slim

HG-T series

8 mm 0.315 in

The ultra-slim unit with a thickness of 8 mm 0.315 in allows easy installation in a limited space such as the inside of equipment.

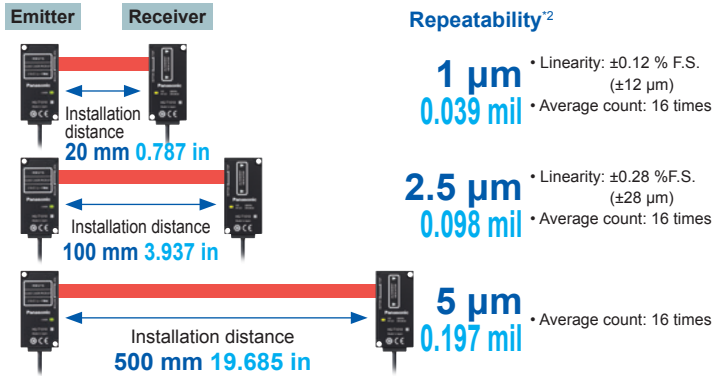

Wide-angle measurement

The belt-shaped laser beam with a measurement width of 10 mm 0.394 in is used for measurement of dimensions and positions.

Industry's highest*1 measurement accuracy

The HG-T series boasts repeatability*2 of 1 μm 0.039 mil and offers the highest*1 measurement accuracy in the industry.

- Sampling cycle setting can be selected from two options. Standard: 1 ms, High speed: 0.5 ms.
- Average count setting can be selected from 11 options. 1 time, 2 times, 4 times, 8 times, 16 times, 32 times, 64 times, 128 times, 256 times, 512 times, 1,024 times
- *1 As of January 2019, in-company survey
- *2 This is the P-P value of digital measurement value with half shading at the middle position of the installation distance.

Two types of sensor heads are available.

Two types of sensor heads, one with a standard type receiver and the other with a slim type receiver, are available.

Side view attachment is available (optional). HG-T1010

Side view attachment (optional) is available for the standard type sensor head HG-T1010. This attachment can bend the laser beam at a right angle to allow flexible installation of the sensor head.

Side view attachment HG-TSV10

Two M2 (length 4 mm 0.157 in) screws with washers are attached.

Application example: Lithium-ion battery winding section

Use of the side view attachment enables the installation of the sensor head closer to the winding section than when a conventional sensor head is used, thus contributing to the improvement of winding accuracy.

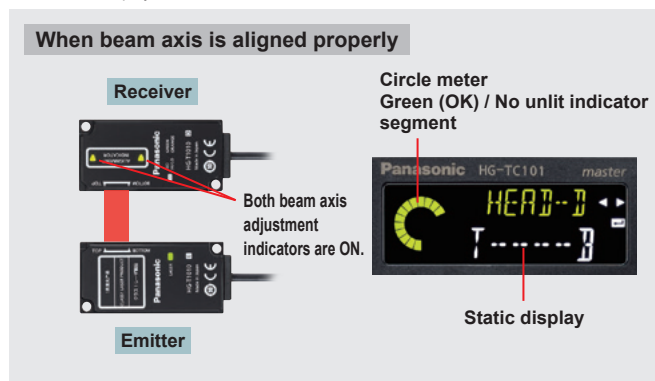

- * Two side view attachment units are required when using the attachment on both emitter and receiver.
- * The slim type sensor head HG-T1110 cannot be mounted with the side view attachment.
- * Be sure to confirm proper detection using actual equipment in advance when using the side view attachment.

Ease of Installation

Beam axis adjustment assist function

The standard type sensor head **HG-T1010** indicates the direction of receiver displacement relative to the emitter on the controller's display screen and with the beam axis adjustment indicators on the receiver in an easy-to-understand fashion.

* The slim type sensor head **HG-T1110** displays the displacement information only on the controller's display section.

Automatic emitter / receiver cable recognition

The **HG-T** series automatically recognizes the positional relationship of the emitter and receiver connected to the sensor head connection cable at the time the controller is turned ON. This function eliminates the need for identifying the correct cables to connect to the emitter and receiver. Wiring can be completed by simply attaching the connectors to the emitter and receiver.

Emitter and receiver can be connected to either connectors!

* The sensor head connection cable is branched into two cables on the sensor head connecting side, but the two cables can be connected interchangeably to the emitter and receiver.

Die-cast aluminum case

The sensor head case is made of light and strong die-cast aluminum. It minimizes measurement fluctuations due to temperature effects. The die-cast aluminum case does not easily become distorted in shape by tightening of mounting screws as compared to a resin case. It is highly resistant to deterioration due to ageing. This robust case helps prevent deviations of beam axis alignment.

IP67 protection

The **HG-T** series features a protection structure of IP67 (IEC) so it can be used in a place where the product may be exposed to water or large amounts of dust.

* Note that if the beam emitting / receiving surfaces of the sensor head are adhered with water or dust, correct measurements become inaccurate.
* The sensor head is watertight, but the connectors are not structurally resistant to dust, water or corrosion. Therefore, the **HG-T** series cannot be submerged in water or placed under falling water for measurement operation. Be sure to use the product in an appropriate environment.

High-performance Controller

III Dual display for added indication flexibility (equipped with NAVI function)

The 2-line digital display simultaneously shows head measurement (measured value) and judgment value (calculated value).

III All-direction LCD

The high-contrast LCD provides sharp and clear indications and wide viewing angle.

III Equipped with intuitive circle meter

Values between allowable maximum and minimum values are indicated in green. Values outside of the allowable range are indicated in orange. This provides at-a-glance understanding of the margin to the tolerance limits.

Higher than maximum value

Lower than minimum value

III Five types of detection modes

Industry's First!*

Auto edge detection mode

Edge detection can be started from either the TOP or BOTTOM without registering the detection direction. This eliminates the need for checking the detection direction.

* As of January 2019, according to in-company survey

Edge detection mode

External form / width detection mode

Inside diameter / gap detection mode

Central position detection mode

Monitoring of effects caused by stains

Notifies when the detection performance decreases due to accumulated stains.

Decrease in the amount of received light due to accumulated stains

An alarm is output when the amount of received light decreases below the threshold value, with the condition of the reference waveform considered as 100 %.

Alarm output

Checks the degree of contamination based on the amount of light of the reference waveform (considered as 100 %).

Stain check setting items

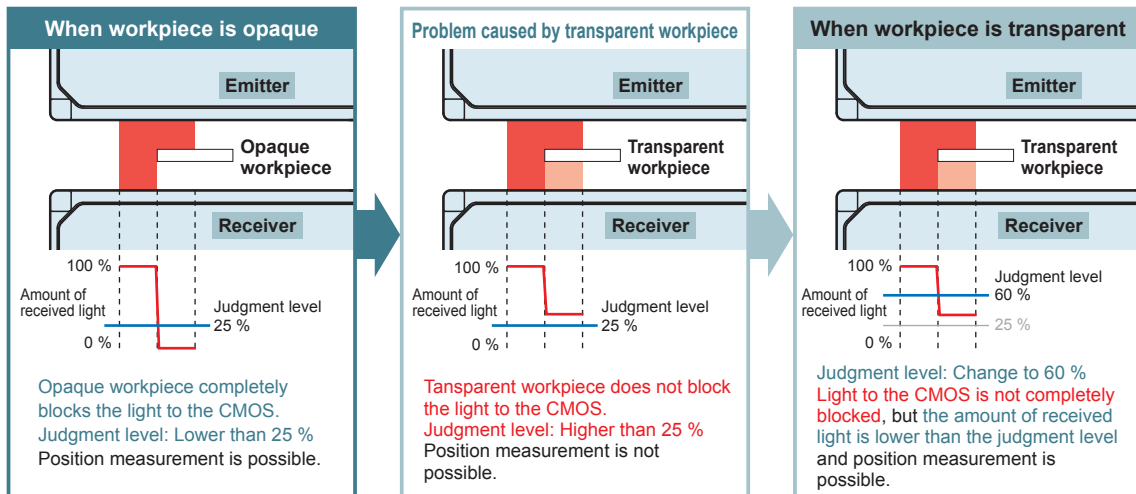

One of the following four settings can be selected.

- Low sensitivity setting ON (LOW) [default]
- High sensitivity setting ON (HIGH)
- User setting ON (USER)
Adjustable in the range of 50 to 95 %
- Stain check OFF (OFF)

* The reference waveform can be confirmed by using the "HG-T Configuration Tool" USB-based PC setting software and SC-HG1-USB USB communication unit. For details, refer to page 6.

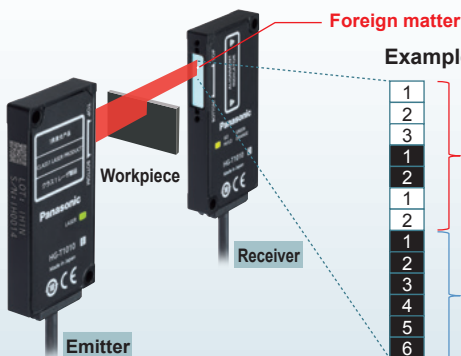

Stable measurement of even transparent workpieces

The judgment level can be adjusted according to the degree of transparency.

Elimination of effects caused by fine foreign matters

The judgment filter value can be adjusted for the prevention of erroneous detections due to fine foreign matters.
The judgment filter value can be set to a desired value between 3 and 50.

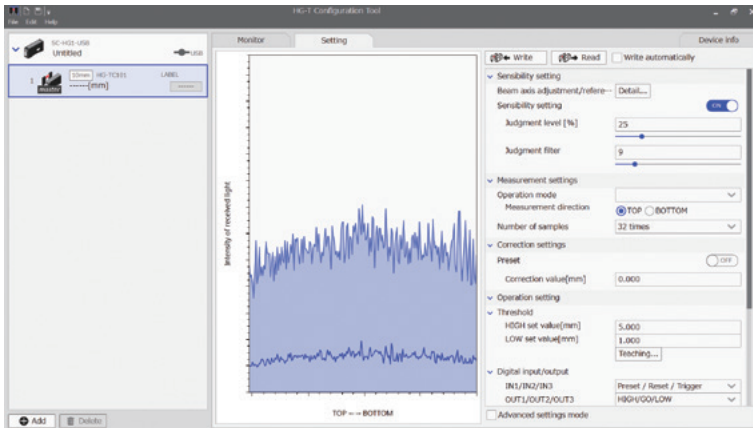

Convenient Tool Software

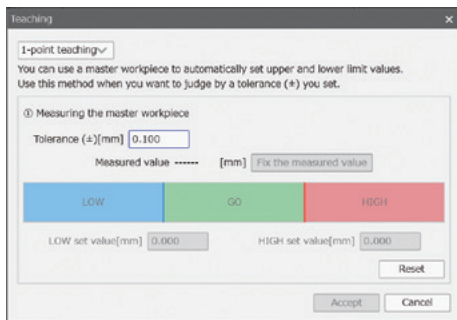

Combined use of the USB-based PC setting software, “HG-T Configuration Tool,” and the USB communication unit, “SC-HG1-USB,” enables confirmation and change of current values and settings in the HG-T series using a PC.

USB-based PC setting software

HG-T Configuration Tool

Settings such as name, judgment level and filter value can be changed for each controller while observing the waveform.

- Compatible communication unit: SC-HG1-USB
- Supported OS: Microsoft Windows® 7 (32-bit / 64-bit)*1, Microsoft Windows® 8 (8.1) (32-bit / 64-bit), Microsoft Windows® 10 (32-bit / 64-bit)
- Required hard disk space: 100 MB or more
- Required USB port: USB 2.0

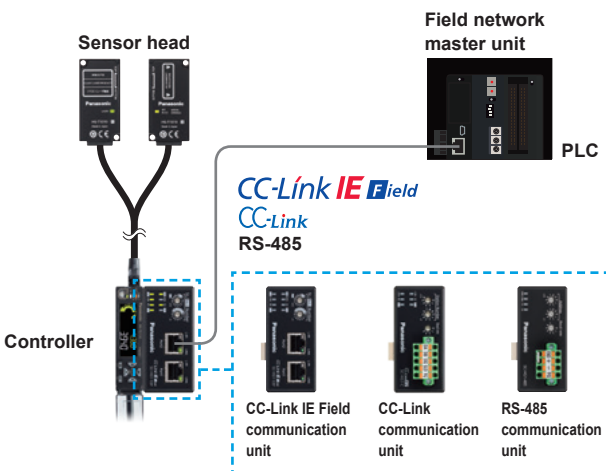

*1 In the case of a PC running Microsoft Windows® 7, “Microsoft .NET Framework 4.5.1” is required.

*2 Microsoft and Windows are registered trademarks or trademarks of Microsoft Corporation in the U.S. and/or other countries.

The USB-based PC setting software, “HG-T Configuration Tool,” can be downloaded free from our website.

System configuration

Connecting to PLC

Connecting to PC

Communication units for field networks such as CC-Link as CC-Link IE Field are available so the HG-T series can be linked with a production system for IoT application.

Applications

Measurement of meandering on lithium-ion battery winding machine

Thanks to the compact design, the sensor head can be installed at a location close to the winding core. This improves the meander measurement accuracy.

Glass substrate positioning

The judgment level adjustment function ensures stable detection and measurement of even transparent workpieces.

Detection of clearance between rollers

The clearance between rollers can be measured for stabilizing the workpiece quality. The compact head is easy to install.

Shaft diameter measurement

Shaft diameters can be measured. The original head structure and proprietary algorithm achieve stable detection without being affected by secondary reflections by metal surfaces.

Measurement of motor shaft eccentricity

Shaft eccentricity can be measured by using the central position detection mode and measuring the distance to the shaft center.

Communication unit for digital displacement sensor

Directly send the measurement values of multiple sensors to a host!

CC-Link IE Field / CC-Link communication unit

The communication unit for digital displacement sensor can be used to connect directly to a CC-Link / CC-Link IE Field network. This lets you acquire digital data and ON / OFF information in real-time without a program. In addition, you can change controller settings and log measurement data via the CC-Link / CC-Link IE Field network, so you can also use the system for preventative maintenance of digital displacement sensors.

Note: When connected to a communication unit for digital displacement sensor, up to 14 slave units can be connected per master unit

CC-Link IE Field communication unit
SC-HG1-CEF

CC-Link IE Field

Communication speed:
1 Gbps

iQSS support is planned

CC-Link communication unit
SC-HG1-C

CC-Link

Communication speed:
10 Mbps (max.)

Supports iQSS

USB communication unit

The USB communication unit provides convenient functions that facilitate the setting of the HG-T series while observing the waveform of received light by operating the dedicated USB-based PC setting software. The USB-based PC setting software can be downloaded free from our website.

ORDER GUIDE

Sensor heads

| Type | Appearance | Measurement width | Installation distance | Repeatability (Note 1) | Laser class | Model No. |
|--|--|-------------------|-------------------------------|--|--|---|
| Measurement width 10 mm 0.394 in | Standard type  | 10 mm 0.394 in | 0 to 500 mm 0 to 19.685 in | 1 μm 0.039 mil { Installation distance: 20 mm 0.787 in } 2.5 μm 0.098 mil { Installation distance: 100 mm 3.937 in } 5 μm 0.197 mil { Installation distance: 500 mm 19.685 in } | Class 1 { IEC / JIS / GB / FDA (Note 2) } | HG-T1010 |
| | Slim type  | | | | | Emitter: 8 × 30 × 60 mm 0.315 × 1.181 × 2.362 in Receiver: 8 × 30 × 60 mm 0.315 × 1.181 × 2.362 in |

Notes: 1) This is the P-P value of digital measurement value with half shading at the middle position of the installation distance.
 2) This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

Sensor head connection cables

| Type | Appearance | Model No. | Cable length | Description |
|--|------------|------------------|----------------|---|
| Sensor head connection cables  | | CN-HT-C2 | 2 m 6.562 ft | This cable is used to connect the sensor head to the controller. The cable is branched into two cables on the sensor head connecting side, but the two cables can be connected interchangeably to the emitter and receiver. |
| | | CN-HT-C5 | 5 m 16.404 ft | |
| | | CN-HT-C10 | 10 m 32.808 ft | |
| | | CN-HT-C20 | 20 m 65.617 ft | |

Controllers

| Type | Appearance | Model No. | Output | Maximum number of connectable controllers |
|-------------|---|---|-------------------------------|--|
| Master unit |  | HG-TC101 | NPN open-collector transistor | Up to 15 slave units can be connected per master unit (Note) |
| | | HG-TC101-P | PNP open-collector transistor | |
| Slave units |  | HG-TC111 | NPN open-collector transistor | |
| | | HG-TC111-P | PNP open-collector transistor | |
| | Wire-saving type |  | HG-TC113 | |

Note: When connected to a communication unit for digital displacement sensor, up to 14 slave units can be connected per master unit.

ORDER GUIDE

Communication units for digital displacement sensors

| Type | Appearance | Model No. | Description |
|-------------------------------------|--|-------------------|--|
| USB communication unit (Note 1) |  | SC-HG1-USB | When used together with the "HG-T Configuration Tool" USB-based PC setting software, current values and settings in the HG-T series can be confirmed or changed on the PC screen. * The USB-based PC setting software, "HG-T Configuration Tool," can be downloaded free from our website. • Communication specification: USB 2.0 Full Speed (Note 2) • Communication protocol: Proprietary protocol • USB port: USB Mini-B (1 port) • Number of connectable units Controller: Up to 15 units (1 master unit, 14 slave units) per SC-HG1-USB unit |
| CC-Link IE Field communication unit |  | SC-HG1-CEF | Can directly send high-accuracy measurement values to a CC-Link IE Field host device. • Communication method CC-Link IE Field • Number of connected units Host (CC-Link IE Field): Max. 121 units (1 master station, 120 slave stations) Controllers: Maximum of 15 units (1 master, 14 slaves) per SC-HG1-CEF unit |
| CC-Link communication unit |  | SC-HG1-C | Can directly send high-accuracy measurement values to CC-Link Master. • Communication method Switchable CC-Link Ver.1.10 or 2.00 • Number of occupied station CC-Link Ver.1.10: 4 stations, CC-Link Ver.2.00: Switchable 2 or 4 stations • Number of connected units Controllers: Maximum of 15 units (1 master, 14 slaves) per SC-HG1-C unit |
| RS-485 communication unit |  | SC-HG1-485 | Can directly send high-accuracy measurement values by RS-485 communication • Communication protocol MODBUS (RTU / ASCII) / MEWTOCOL-COM • Number of connected units Host (RS-485): 1 to 99 units when MODBUS (RTU / ASCII) is used, 1 to 64 units when MEWTOCOL-COM is used Controllers: Maximum of 15 units (1 master, 14 slaves) per SC-HG1-485 unit |

Notes: 1) The USB communication unit cannot be used with contact-type digital displacement sensors **HG-S** series.
 2) Dependent on PC environment.

End plates

| Type | Appearance | Model No. | Description |
|------------|---|-----------------------------------|---|
| End plates |  | MS-DIN-E 2 pcs. per set | Always use this when connecting controllers and a digital displacement sensor communication unit. |

OPTIONS

| Type | Appearance | Model No. | Description |
|--|---|-----------------|--|
| Side view attachment |  | HG-TSV10 | Designed for exclusive use with the HG-T1010 standard type sensor head. This attachment can bend the laser beam at a right angle, thus allowing flexible installation of the sensor head. Two M2 (length 4 mm 0.157 in) screws with washers are attached. * Two pieces of attachment are required when using the attachment on both emitter and receiver. * Be sure to confirm proper detection using actual equipment in advance when using the attachment. |
| Computer software for CC-Link IE Field / CC-Link |  | SC-PC1 | A PC installed with this software can be used to monitor the current values of the digital displacement sensor, to create a CSV file of setting information, to display the log data, to create a CSV file of log data, etc. via Mitsubishi Electric PLC (MELSEC series). • Compatible communication units for digital displacement sensor: SC-HG1-CEF, SC-HG1-C • Supported OS: Microsoft Windows® 7 (32-bit), Japanese version • Required hard disk space: 50 MB or more |

| | Ambient humidity | | 35 to 85 % RH, Storage: 35 to 85 % RH | | | | |
| | Voltage withstandability | | 1,000 V AC for one minute between all supply terminals connected together and enclosure | | | | |
| | Insulation resistance | | 20 MΩ, or more, with 250 V DC megger between all supply terminals connected together and enclosure | | | | |
| | Vibration resistance | | 10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude (10 to 58 Hz), Maximum acceleration 49 m/s ² (58 to 150 Hz) in X, Y and Z directions for two hours each | | | | |
| | Shock resistance | | 98 m/s ² acceleration (10 G approx.) in X, Y and Z directions five times each | | | | |
| Material | | | Case: Polycarbonate, Cover: Polycarbonate, Switches: Polyacetal | | | | |
| Cable | | | 0.2 mm ² 2-core (brown and blue lead wires) / 0.15 mm ² 7-core composite cable, 2 m 6.562 ft long | 0.15 mm ² 7-core composite cable, 2 m 6.562 ft long | | — | |
| Net weight | | | 140 g approx. | | 60 g approx. | | |

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were as follows: supply voltage +24 V DC, ambient temperature +20 °C +68 °F.

- 2) When connected to a communication unit for digital displacement sensor, up to 14 slave units can be connected per master unit.
- 3) Current consumption does not include analog current output.
- 4) Linearity is a value calculated from digitally measured values at F.S. = 16 mA for current output or F.S. = 4 V for voltage output.
- 5) When slave units are connected to the master unit, the maximum sink current / source current of control output and ambient temperature vary depending on the number of connected slave units as shown below.

| Number of connected slave units | Maximum sink current and source current of control output | | Ambient temperature |
|---------------------------------|---|-------|-------------------------------------|
| | When communication unit is connected | | |
| 1 to 7 units | 1 to 6 units | 20 mA | -10 to +45 °C +14 to +113 °F |
| 8 to 15 units | 7 to 14 units | 10 mA | |

- 6) Average count (response time) is for when the sampling cycle is set to 1 ms (standard sampling). Response times differ when the sampling cycle is set to 0.5 ms (high-speed sampling).
- 7) Do not use or store in an environment that has been pressurized to an air pressure higher than the atmospheric pressure at 0 m.

SPECIFICATIONS

Communication units for digital displacement sensors

| Designation | | USB communication unit |

| Item | Model No. | SC-HG1-USB |
| Compatible controllers | | HG-TC□ |
| Maximum number of connectable controllers | | Maximum of 15 controllers (one master, 14 slaves) per SC-HG1-USB unit |
| Supply voltage (Note 3) | | 24 V DC ±10 %, including ripple 0.5 V (P-P) (Within specified power supply voltage range) |
| Current consumption | | 50 mA or less |
| Communication method | | USB 2.0 Full Speed (Note 4) |
| Communication protocol | | Our dedicated protocol |
| USB port | | USB Mini-B (1 port) |
| Pollution degree / Operating altitude | | 2 / 2,000 m 6561.680 ft or less (Note 5) |
| Environmental resistance | Protection | IP40 (IEC) |
| | Ambient temperature | -10 to +45 °C +14 to +113 °F (No dew condensation or icing allowed), Storage: -20 to +60 °C -4 to +140 °F |
| | Ambient humidity | 35 to 85 % RH, Storage: 35 to 85 % RH |
| | Voltage withstandability | 1,000 V AC for one min. between all supply terminals connected together and enclosure |
| | Insulation resistance | 20 MΩ or more, with 250 V DC megger |
| | Vibration resistance | 10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude (10 to 58 Hz), Maximum acceleration 49 m/s ² (58 to 150 Hz) in X, Y and Z directions for two hours each |
| Shock resistance | | 98 m/s ² acceleration (10 G approx.) in X, Y and Z directions five times each |
| Material | | Enclosure: Polycarbonate |
| Weight | | Net weight: 35 g approx., Gross weight: 95 g approx |

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) USB 2.0 (Mini-B) cable for the connection of a PC is not provided with the product. Please purchase a USB 2.0 (Mini-B) cable.
 3) Power is supplied from a connected controller / master unit.
 4) Dependent on PC environment.
 5) Do not use or store in an environment that has been pressurized to an air pressure higher than the atmospheric pressure at 0 m.

| Designation | | CC-Link IE Field communication unit |
|---|--------------------------|--|
| Item | Model No. | SC-HG1-CEF |
| Regulatory compliance | | EMC Directive, RoHS Directive |
| Compatible controllers | | HG-TC□, HG-SC□ |
| Maximum number of connectable controllers | | Maximum of 15 controllers (one master, 14 slaves) per SC-HG1-CEF unit |
| Supply voltage (Note 2) | | 24 V DC ±10 %, including ripple 0.5 V (P-P) |
| Current consumption | | 200 mA or less |
| Communication method | | CC-Link IE Field |
| Remote station type | | Remote device station |
| Network No. setting | | 1 to 239 (decimal) [1 to EF (hex)] (0 and 240 or more: Error) (Note 3) |
| Cyclic transmission (Maximum number of links per station) | | RX / RY: 128 points each (128 bits), 16 bytes RW / RWw: 64 points each (64 words), 128 bytes |
| Transient transmission | | Server function only, data size 1,024 bytes |
| Station No. setting | | 1 to 120 (decimal) (0 and 121 or more: Error) |
| Baud rate | | 1 Gbps |
| Transmission line types | | Line, star (mixing of line and star types is possible), ring |
| Maximum transmission distance | | 100 m 328.084 ft |
| Maximum number of connectable units | | 121 units (1 master station, 120 slave stations) |
| Cascade connection levels | | Maximum 20 |
| Pollution degree / Operating altitude | | 2 / 2,000 m 6561.680 ft or less (Note 4) |
| Environmental resistance | Protection | IP40 (IEC) |
| | Ambient temperature | -10 to +45 °C +14 to +113 °F (No dew condensation or icing allowed), Storage: -20 to +60 °C -4 to +140 °F |
| | Ambient humidity | 35 to 85 % RH, Storage: 35 to 85 % RH |
| | Voltage withstandability | 1,000 V AC for one min. between all supply terminals connected together and enclosure |
| | Insulation resistance | 20 MΩ or more, with 250 V DC megger between all supply terminals connected together and enclosure |
| | Vibration resistance | 10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude (10 to 58 Hz), Maximum acceleration 49 m/s ² (58 to 150 Hz) in X, Y and Z directions for two hours each |
| Shock resistance | | 98 m/s ² acceleration (10 G approx.) in X, Y and Z directions five times each |
| Material | | Enclosure: Polycarbonate |
| Communication cable | | Ethernet cable that satisfies 1000BASE-T standard Category 5e or higher (Double-shielded / STP, straight cable) (Note 5) |
| Weight | | Net weight: 100 g approx., Gross weight: 150 g approx. |

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) Power is supplied from a connected controller / master controller.
 3) For the network No. setting on this product, convert the network number to hex and set the hex value.
 4) Do not use or store in an environment that has been pressurized to an air pressure higher than the atmospheric pressure at 0 m.
 5) Use CC-Link Partner Association recommended cable.

| Designation | | CC-Link communication unit | | | | |
|---|--------------------------|--|---------------------|-----------------------|-----------------------|-------------------------|
| Item | Model No. | SC-HG1-C | | | | |
| Regulatory compliance | | EMC Directive (Note 2), RoHS Directive | | | | |
| Compatible controllers | | HG-TC□, HG-SC□ | | | | |
| Maximum number of connectable controllers | | Maximum of 15 controllers (one master, 14 slaves) per SC-HG1-C unit | | | | |
| Supply voltage (Note 3) | | 24 V DC ±10 %, including ripple 0.5 V (P-P) | | | | |
| Current consumption | | 80 mA or less | | | | |
| Communication method | | Switchable CC-Link Ver.1.10 or 2.00 | | | | |
| Remote station type | | Remote device station | | | | |
| Number of occupied station | | CC-Link Ver.1.10: 4 stations, CC-Link Ver.2.00: Switchable 2 or 4 stations | | | | |
| Station No. setting | | 1 to 64 (0 and 65 or more: Error) | | | | |
| Baud rate | | 10 Mbps | 5 Mbps | 2.5 Mbps | 625 kbps | 156 kbps |
| Maximum transmission distance | | 100 m 328.084 ft | 160 m 524.934 ft | 400 m 1,312.336 ft | 900 m 2,952.756 ft | 1,200 m 3,937.008 ft |
| Pollution degree / Operating altitude | | 2 / 2,000 m 6561.680 ft or less (Note 4) | | | | |
| Environmental resistance | Protection | IP40 (IEC) | | | | |
| | Ambient temperature | -10 to +45 °C +14 to +113 °F (No dew condensation or icing allowed), Storage: -20 to +60 °C -4 to +140 °F | | | | |
| | Ambient humidity | 35 to 85 % RH, Storage: 35 to 85 % RH | | | | |
| | Voltage withstandability | 1,000 V AC for one min. between all supply terminals connected together and enclosure | | | | |
| | Insulation resistance | 20 MΩ or more, with 250 V DC megger between all supply terminals connected together and enclosure | | | | |
| | Vibration resistance | 10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude (10 to 58 Hz), Maximum acceleration 49 m/s ² (58 to 150 Hz) in X, Y and Z directions for two hours each | | | | |
| Shock resistance | | 98 m/s ² acceleration (10 G approx.) in X, Y and Z directions five times each | | | | |
| Material | | Enclosure: Polycarbonate | | | | |
| Communication cable | | Specified cable (shielded twisted cable) (Note 5) | | | | |
| Weight | | Net weight: 80 g approx., Gross weight: 130 g approx. | | | | |

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) If our product will be incorporated in a customer product that will comply with the EMC Directive, install our product in a conductive box in accordance with "PLC User's Manual [Published by Mitsubishi Electric Corporation]".
 3) Power is supplied from a connected controller / master controller.
 4) Do not use or store in an environment that has been pressurized to an air pressure higher than the atmospheric pressure at 0 m.
 5) Use only a special-use communication cable that is approved by the CC-Link Partner Association.

| Designation | | RS-485 communication unit |
|---------------------------------------|--------------------------|--|
| Item | Model No. | SC-HG1-485 |
| Regulatory compliance | | EMC Directive, RoHS Directive |
| Compatible controllers | | HG-TC□, HG-SC□ |
| Supply voltage (Note 2) | | 24 V DC ±10 %, Ripple P-P 10 % or less (Within specified power supply voltage range) |
| Current consumption | | 40 mA or less |
| Communication method | | Two-wire half duplex communication |
| Synchronization method | | Start-stop synchronization |
| Communication protocol | | MODBUS (RTU / ASCII) / MEWTOCOL-COM |
| Baud rate | | 1.2 kbps / 2.4 kbps / 4.8 kbps / 9.6 kbps / 19.2 kbps / 38.4 kbps / 57.6 kbps / 115.2 kbps |
| Electrical characteristics | | Complies with EIA RS-485 |
| Number of connectable units | Host (RS-485) | 1 to 99 units when MODBUS (RTU / ASCII) is used, 1 to 64 units when MEWTOCOL-COM is used |
| | Sensors | Maximum of 15 controllers (1 master, 14 slaves) per SC-HG1-485 unit |
| Stop bit length | | 1 bit / 2 bits |
| Parity check | | Even / Odd / None |
| Data bit length | | 8 bits (RTU) / 7 bits (ASCII) |
| Pollution degree / Operating altitude | | 2 / 2,000 m 6561.680 ft or less (Note 3) |
| Environmental resistance | Protection | IP40 (IEC) |
| | Ambient temperature | -10 to +45 °C +14 to +113 °F (No dew condensation or icing allowed), Storage: -20 to +60 °C -4 to +140 °F |
| | Ambient humidity | 35 to 85 % RH, Storage: 35 to 85 % RH |
| | Voltage withstandability | 1,000 V AC for one min. between all supply terminals connected together and enclosure |
| | Insulation resistance | 20 MΩ or more, with 250 V DC megger between all supply terminals connected together and enclosure |
| | Vibration resistance | 10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude (10 to 58 Hz), Maximum acceleration 49 m/s ² (58 to 150 Hz) in X, Y and Z directions for two hours each |
| Shock resistance | | 98 m/s ² acceleration (10 G approx.) in X, Y and Z directions five times each |
| Material | | Enclosure: Polycarbonate |
| Total extension distance | | Communication cable: 1,200 m 3,937.008 ft or less between SC-HG1-485 (terminal) and PLC |
| Weight | | Net weight: 75 g approx., Gross weight: 120 g approx. |
| Accessory | | Termination resistor switching jumper pin: 1 pc. |

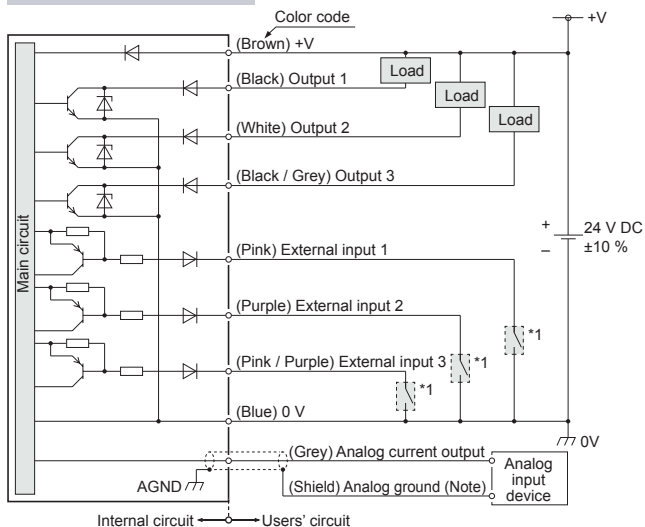

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) Power is supplied from a connected controller / master controller.
 3) Do not use or store in an environment that has been pressurized to an air pressure higher than the atmospheric pressure at 0 m.

I/O CIRCUIT DIAGRAMS

For communication unit for digital displacement sensors, refer to the instruction manual.
The instruction manual can be downloaded from our website.

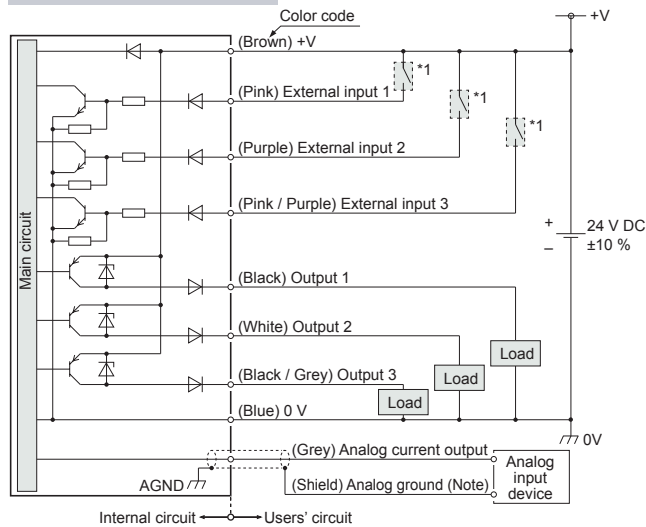

NPN output type

HG-TC101 / Master unit

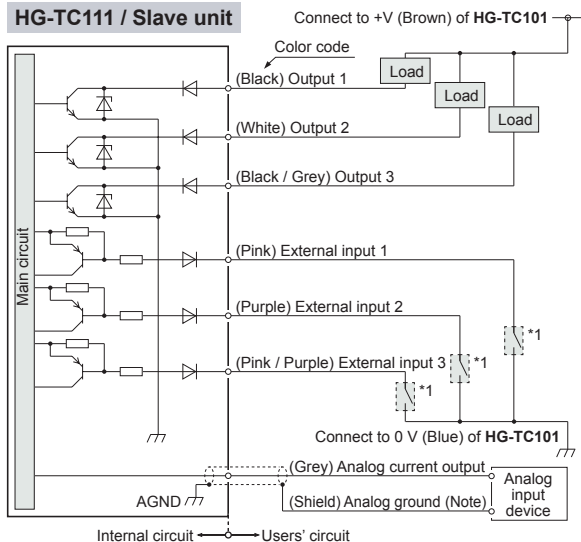

PNP output type

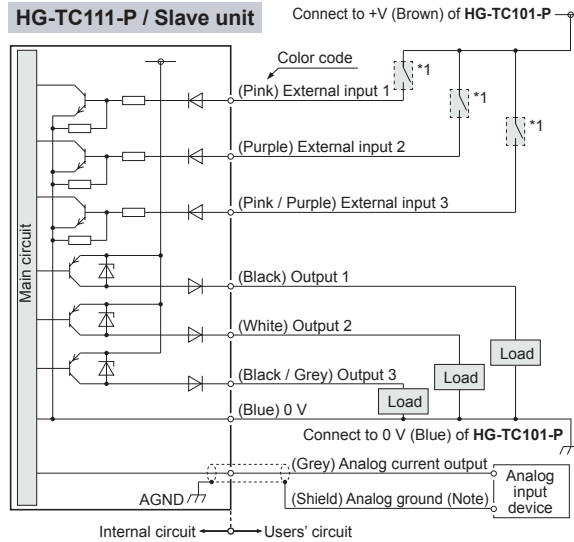

HG-TC101-P / Master unit

HG-TC111 / Slave unit

HG-TC111-P / Slave unit

* 1

Note: Use shielded wire for the analog output.

* 1

Note: Use shielded wire for the analog output.

PRECAUTIONS FOR PROPER USE

Refer to the instruction manual for details.
The instruction manual can be downloaded from our website.

- This catalog is a guide to select a suitable product. Be sure to read instruction manual attached to the product prior to its use.

- Never use this product as a sensing device for personnel protection.
- When using sensing devices for personnel protection, use products that meet the laws and standards for personnel protection that apply in each region or country, such as OSHA, ANSI and IEC.

User's Manual available for download

The HG-T series User's Manual is available for download from our website.

Cautions for laser beams

- This product is classified as a Class 1 Laser Product in IEC / JIS / GB standards and in FDA* regulations. Do not look at the laser beam through optical system such as a lens.
- The warning label and the proof label are attached to the product. Handle the product according to the instruction given on the label.

* This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

PRECAUTIONS FOR PROPER USE

Refer to the instruction manual for details.
The instruction manual can be downloaded from our website.

Sensor head

Mounting

- The light emitting and receiving surfaces of the sensor head must be free of water, oil, fingerprints, and other substances that refract light as well as dust, grit, and other objects that intercept light.
- Do not allow ambient light such as sunlight to directly hit the light receiving section of the sensor head. In particular, if precision is required, use this product by mounting a douser (or similar material) on the sensor head.
- A serial number is marked on each opposite surface of the light emitting and receiving surfaces of the sensor head. Use a pair of emitter and receiver that have the same serial number.

- For the installation of sensor heads, use M3 screws and tighten to the torque of 0.5 N·m. M3 screws are not provided with the product.

Controller

Mounting

Mounting

1. Insert the rear of the mounting part into the DIN rail.
2. While pressing down on the rear of the mounting part, insert the front of the mounting part into the DIN rail.

Removal method

1. Grasp the product and push forward.
2. Lift the front to remove.

Attaching the sensor head connection cable

Mounting

1. Insert the sensor head connection cable into the connector for the sensor head connection cable on the controller.

Removal method

1. Grasp the controller, and while pressing on the lock release lever on the connector of the sensor head connection cable, pull toward you to disconnect.

Note: If you attempt to disconnect the cable by pulling it without pressing the lock release lever, cable wire breakage and connector damage may occur.

Connection

- Always shut off the power before connecting a slave unit to or disconnecting a slave unit from the master unit. Risk of controller damage if you attempt connection with the power on.
- Insert the male connector firmly into the female connector. Risk of controller damage if not completely connected.
- When connecting slave units to a master unit, connect only NPN output types, or only PNP output types. Dissimilar output types cannot be connected together.

- To connect units, the units must be mounted on a DIN rail. Attach end plates **MS-DIN-E** (optional) so as to enclose the connected units at the ends.

- If the **HG-TC** controller is used together with the **HG-SC** controller for contact-type digital displacement sensor **HG-S** series, make sure to use the **HG-SC** controller manufactured in and after February, 2019. Furthermore, connect the slaves units of the same series to the side closer to the master unit and the slave units of the other series to the far side.

Common

Wiring

- The product is designed to fulfill the specifications when combined with the **HG-T** sensor head and **HG-TC** controller. If the product is used in combination with other products, it not only fails to meet the specifications but also generates a malfunction in some cases.
- For the controller DC power supply, only use a power supply that is isolated by means of an isolation transformer or otherwise.
- Risk of short-circuiting and damage to the controller or power supply if a transformer such as an auto transformer is used. Risk of short-circuiting and damage to the controller or power supply if incorrectly mounted or connected.

- Make sure that the power supply is off while performing wiring or expansion work.
- After you have completed wiring work, check the wiring carefully before switching on the power.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- Verify that the supply voltage variation is within the rating.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- Make sure that stress by forcible bend or pulling is not applied directly to the sensor cable joint.

Others

- This device has been developed / produced for industrial use only.
- Do not use this product outside the range of the specifications. Risk of an accident and product damage. There is also a risk of a noticeable reduction of service life.
- Do not use during the initial transient time after the power supply is switched on.
- To ensure performance, use the product at least 30 minutes (warm-up time) after the power is turned ON.
- This product (controller and sensor head receiver) uses an EEPROM. The EEPROM has a service life of one million setting operations.
- This product is suitable for indoor use only.
- Avoid dust, dirt, and steam.
- Take care that the product does not come in direct contact with organic solvents such as thinner.
- Take care that the product does not come in direct contact with strong acid or alkaline.
- Take care that the product does not come in direct contact with oil or grease.
- Do not use in an environment containing inflammable or explosive gases.
- Performance may not be satisfactory in a strong electromagnetic field.
- The sensor head is watertight, but the connector is not dustproof, waterproofing, or corrosion-resistant due to its structural reasons, so measurements cannot be taken under the water or in the rain. Pay attention to the environment where the product is used.
- This product is a precision device. Do not drop or otherwise subject to shock. Risk of product damage.
- Never attempt to disassemble, repair, or modify the product.
