Panasonic

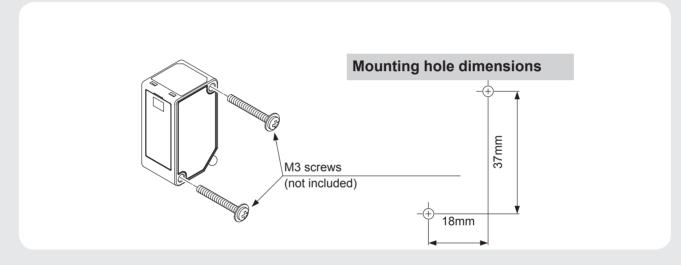

HG-C measurement sensor

Easy user guide

Please follow the procedure from step 1 to 5.

Mounting

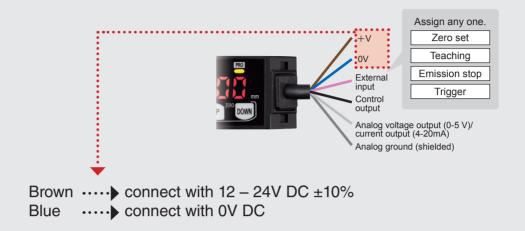

Adjust the height of the sensor.

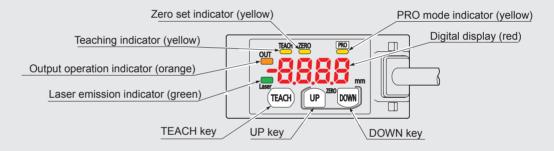

Example: HG-C1050-P Adjusted height 50mm

Product No	Measurement center distance and	Analog output		Cable length
	measuring range	Voltage output	Current output	
HG-C1030-F	30±5mm	0 to +5V	4 to 20mA	2m
HG-C1030	30 ±5mm	0 to +5V	4 to 20mA	2m
HG-C1050-F	50 ±15mm	0 to +5V	4 to 20mA	2m
HG-C1050	50 ±15mm	0 to +5V	4 to 20mA	2m
HG-C1100-F	100 ±35mm	0 to +5V	4 to 20mA	2m
HG-C1100	100 ±35mm	0 to +5V	4 to 20mA	2m
HG-C1200-F	200 ±80mm	0 to +5V	4 to 20mA	2m
HG-C1200	200 ±80mm	0 to +5V	4 to 20mA	2m
HG-C1400-F	400 ±200mm	0 to +5V	4 to 20mA	2m
HG-C1400	400 ±200mm	0 to +5V	4 to 20mA	2m

Part description

Remote zero-adjustment

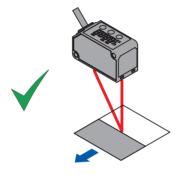

Press and hold the keys UP and DOWN simultaneously for 3 seconds

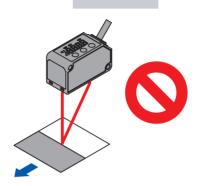

Measuring (analog)

Correct

Incorrect

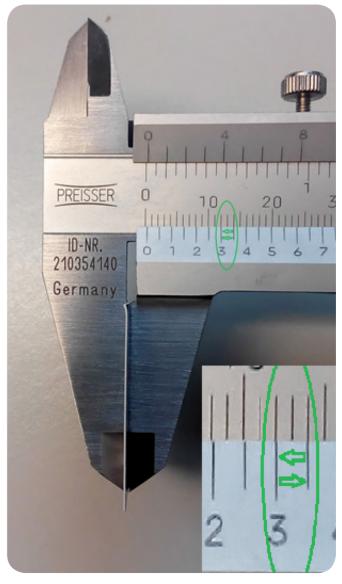

Zero point setting

Measuring

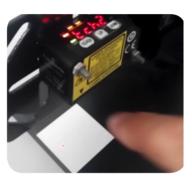

Limit teaching (digital)

- a) Position sensor without objects
- b) Press TEACH key once

- c) Position object underneath the sensor
- d) Press TEACH key once

If the limit teaching is successful, the word "good" will appear on the display.
