 **WARNING**

- Make sure to perform maintenance of the light curtain in accordance with the instruction manual of the light curtain.
- Light curtain cannot be used as a retroreflector. Avoid installing the light curtain as a retroreflector when this product is applied.
- The mirror part of this product is made of glass. Note that if it is broken, the glass shards may fly apart.
- Do not use if crack or breakage appears on the reflective surface of this product. Proper sensing range may not be maintained due to diffusion or refraction.
If crack or breakage appears on the reflective surface of this product, replace the product.
- Do not use if dirt, water, or oil, etc. is attached to the reflective surface of this product. Appropriate sensing range may not be maintained due to diffusion or refraction.
- When adjusting beam channels with a laser alignment tool, etc., take sufficient care that the laser beam reflected by this product is not entered the eyes.
- Failure to follow the above items may result in death or serious injury.

- This product is a corner mirror for the light curtain **SF4D** series, **SF4B** series or **SF2B** series.
- Multiple surfaces can be protected with 1 set of the light curtains.
- In the case of the **SF4D** series, up to 3 sets can be installed. In the case of the **SF4B** series or **SF2B** series, up to 2 sets can be installed.

- Following parts are packed.

Model No.	Corner mirror	L-shaped mounting bracket	M5 (length 10mm) hexagon-socket-head bolt with washer	Intermediate supporting bracket

- This product has been developed / produced for industrial use.
- Avoid dust, dirt, and steam.
- Take care that the product does not come in contact with oil, grease, organic solvents such as thinner, etc., strong acid or alkaline.
- Avoid using this product in places where it may come in contact with corrosive gas, etc.
- Do not use this product in places subject to intense vibrations or shocks that cause misalignment of installation.

⚠ WARNING

- Due to misaligned installation, if the receiver of the light curtain directly receives the beam from the emitter of the light curtain without involving this product, the hazard may not be protected.
- If the receiver of the light curtain receives the beam from the emitter of the light curtain that is reflected by a glossy object, the hazard may not be protected.
- To avoid the above hazardous situation, be sure to understand the contents below sufficiently, and follow the installation requirements when installing this product and the light curtain. Failure to follow the installation requirements may result in death or serious injury.

⊘

⊘

- The installation area is different between the light curtain.
- Only one **RF-SFBH-□** can be installed for the emitter (or receiver) of the light curtain in the installation prohibited area. Install the receiver (or emitter) of the light curtain, or another **RF-SFBH-□** in the installation permitted area.

- Since the emitter (or receiver) of the light curtain and the **RF-SFBH** (2) cannot be installed in the installation prohibited area, be sure to install them in the installation permitted area.
- Since a glossy object cannot be installed in the installation prohibited area either, be sure that no glossy object is present in the installation prohibited area.
If there is no choice to have a glossy object in the installation prohibited area, take countermeasures such as painting, masking, roughening the glossy surface, or changing the material of the glossy surface, etc.
- Failure to fulfill the above installation requirements leads to an unintended faulty light received condition, and that may result in death or serious injury.

- Installable distance is determined by multiplying the sensing range of the applied light curtain by attenuation rate of the sensing range (refer to the following table) that corresponds to the number of this products to be installed.
- When the light curtain and this product are installed as follows,
Installation distance (A + B + C + D) ≤ Sensing range of the light curtain × Attenuation rate of the sensing range
- Installation distance of each A, B, C and D should be 0.3m or more.

The installation distance (A + B + C +D) when installing the light curtain **SF4D-H20** and 3 pcs. of **RF-SFBH-□** should be as follows.

- Sensing range of the light curtain **SF4D-H20**: 15m (long mode)
- Attenuation rate of the sensing range when 3 pcs. of **RF-SFBH-20** are installed: 70%

Installation distance (A + B + C + D) ≤ Sensing range of the light curtain × Attenuation rate of the sensing range,

Installation distance (A + B + C + D) $\leq 15 \text{ (m)} \times 70 \text{ (\%)} \leq 10.5 \text{ (m)}$

Install the emitter and the receiver of the light curtain and 3 pcs. of **RF-SFBH** so that the installation distance (A + B + C + D) is 10.5m or less.

- Install this product so that the reflection angle θ is $60^\circ \leq \theta \leq 100^\circ$.

1. Mount the attached L-shaped mounting bracket on the top (bottom) of this product with three M5 (length 10mm) hexagon-socket-head bolts with washers.
The tightening torque should be 1.5N·m or less.

The angle of this product can be adjusted by 45° each as follows.

2. Mount the L-shaped mounting bracket on the mounting surface with two M5 hexagon-socket-head bolts (please arrange separately).

- The intermediate supporting bracket is composed of the following parts.

1. Mount the attached L-shaped mounting bracket on the A part of the intermediate supporting bracket with three M5 (length 10mm) hexagon-socket-head bolts with washers.
The tightening torque should be 1.5N·m or less.

The angle of this product can be adjusted by 45° each as follows.

-
- M5 (length 12mm) hexagon-socket-head bolt with washer (Accessory)
- B part of the intermediate supporting bracket
- A part of the intermediate supporting bracket
- Pushing hole

-
- Back side of the
corner mirror

-
- <Top view of the corner mirror>
- Back side of the corner mirror
- A part of the intermediate supporting bracket
- B part of the intermediate supporting bracket

- Grooves

-
- M5 (length 12mm) hexagon-socket-head bolts with washers (Accessory)

-
- Front side of the corner mirror
- L-shaped mounting bracket (Accessory)
- M5 hexagon-socket-head bolt (Please arrange separately.)

- The angle of this product can be adjusted by 45° each. In addition, the angle can be minutely adjusted in the range of $\pm 30^\circ$.

- Make sure to conduct an operation test with the test rod enclosed with the light curtain, after installing this product and the light curtain.
- As a daily inspection, conduct the operation test with the test rod enclosed with the light curtain, before the operation.
- The operation test should be performed just in front of the emitter or receiver of the light curtain, just in front of this product, and the middle of each area.
